FUN Show & Auction On Horizon Solid Start To 2013

Holiday activities and shortened schedules slowed sight-unseen trading over the electronic dealer-to-dealer networks in the last week. Stocks fared better with the largest point gain ever recorded on the first day of trading, and recorded the biggest upward move since December 2011, with the Dow jumping 308 points to 13,413. This leap, following the announcement of the short-term agreement preventing the fiscal cliff helped propel the index over 8% from last year's first day of trading at 12,397. Precious metals are in fairly good shape compared to where they began 2012. Gold settled at \$1,688 in its first day of trading, up over \$88 an ounce for the year. Platinum led the bullion trio with a 9% increase from 2012 while Silver is up \$1.42, or 5%. The overall sight-unseen market for certified coins is healthy as the CCDN Coin Market Index is up 4% from the first issue published in January of last year.

Silver Commems stood up well to the often encountered discounting pressures associated with a soft market segment during the holiday season. Only a few issues headed south over the past two weeks of sight-unseen trading. Robinsons in PCGS MS66, which held up well all throughout last year, fell from their even \$300 Bid position to settle back by \$35 while Vermont Halves in NGC MS63 surrendered all of the little bit of gain they achieved during the same time frame to relapse back to a Bid of \$200. 1916 McKinley Dollars are the only disappointment among Gold Commems as NGC MS66 examples lost \$25. An example of the 1893-S Morgan Dollar will be among the highlighted items going before the gavel at the Heritage FUN auction next week in Orlando. This Dollar, with a mellow russet toned obverse, is graded NGC MS64 and will be featured along with two Cameo designated 1895 Proofs, one graded PCGS PR65 and the other in NGC PR67. Another rarity among the Dollar lots that will be offered up at this major auction event is a CAC approved 1901 Morgan in PCGS MS64 plastic and a very rare 1921 Matte/Satin Proof Peace Dollar, graded NGC PR64, of which NGC has handled all 20 known examples. This particular coin is one of six graded as such with only five finer. The disposition of the Cardinal Collection by Stack's Bowers, coupled with the sale of another significant offering of late 18th century Type by Heritage during next week's annual FUN Show in Orlando, is expected to foment additional interest and demand for material representing our nation's earliest coinage. Six-digit Bids are already registered among

several lots which includes a wonderful 1793 Wreath Cent of the Lettered Edge variety, graded NGC MS66BN, and a 1794 Flowing Hair Dollar in PCGS XF45. Sure to add a considerable amount of spectacle to this event is the offering of a magnificent Branch Mint Proof striking of the famed 1838 O Capped Bust Half Dollar, graded PR64 by PCGS. For the time being, the Type segment within the sight-unseen marketplace remains solid as neither any Mint State nor any Proof issues have undergone Bid changes since our last report.

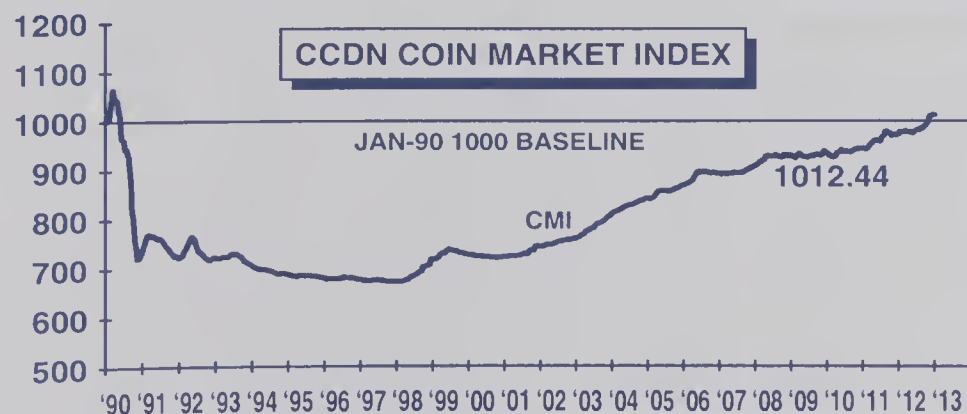

1937-D 3-Legged Buffalo Nickels rarely fail to attract serious contenders at auction, regardless of the grade. An NGC AU50 took in a cool \$1,668 during this past weekend's Teletrade session, and this same auction pulled in the same amount for a rather seldom seen 1914/3 Buff in PCGS AU53. On-line Bidders participating in the Florida auction are already anxiously contending to take possession of a gorgeous, 1939-D Mercury Dime, graded PCGS MS69FB. Even at this numerically elite grade, however, there are 18 other such Full Banded Mercs certified by both services combined. Several key and semi-key

date Walking Liberty Halves in Choice and Gem are included among the lots featured during the upcoming auction including a 1918-S, 1920-D, a CAC/+ 1920-S, 1921, and 1923-S, all graded PCGS MS65. While Bidders still appear resistant to paying more than \$90 for any of the most common-date Walkers in MS65, they're offering \$50 more for any of the 36 certified examples of the 1946-S in PCGS MS67.

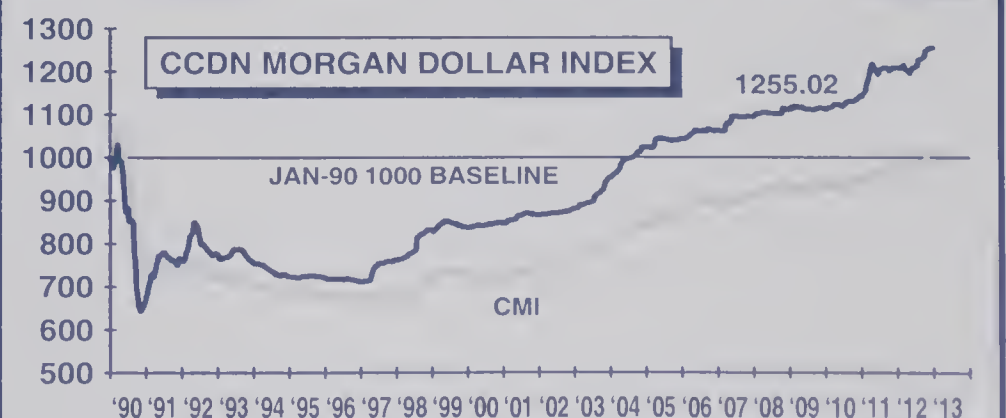

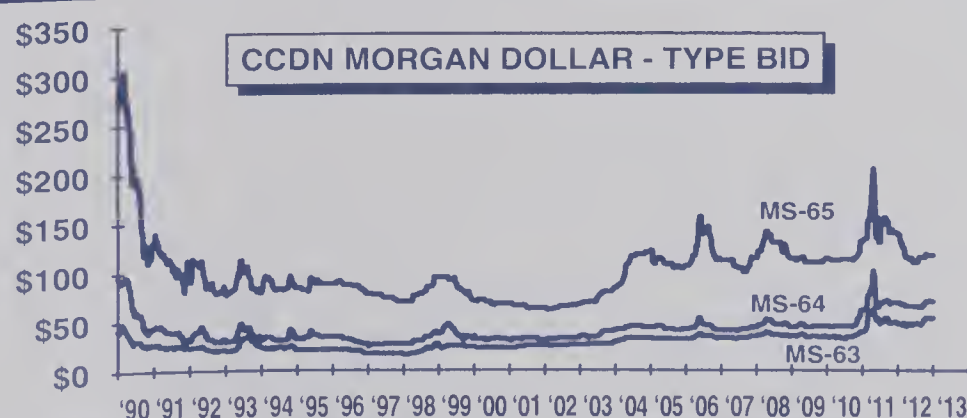

Despite recent gyrations, Gold Spot ended 2012 up by 6% from the previous year and some market analysts believe it should regain the \$1,700 per ounce level before too long. Type III \$20 Libs in PCGS MS63 and MS64 are shrugging off the doldrums of a relatively flat Gold Spot, as these generic issues are up since last year by 17% and 11%, respectively.

Of course, dealers are preparing for the big 58th annual FUN show with some already in Orlando conducting business. This show's performance, traditionally viewed as a bellwether for the upcoming year is scheduled for January 10-13 with an auction by Heritage slated for the 9th-14th. We have listed some of the many highlights herein.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Jumps to New Heights!

Five short years ago, CAC was established by leading members in the numismatic industry who recognized the need for a higher level of grading. While still in its youth, CAC has revolutionized the market and continues to experience impressive growth.

In short order, CAC's green sticker is trusted by dealers and collectors, signifying the mark of quality within a grade. To date, CAC has examined over 400,000 coins valued at \$1.8 Billion, awarding the green sticker only if a coin meets CAC's stringent standards. What's more, CAC provides liquidity to the market. Since its inception, CAC has purchased coins in excess of \$275,000,000.

Coins honored with the CAC sticker make it easy to identify those that are truly solid for the grade. Want confidence? Look for the green sticker.

"Because Confidence is Priceless"

Market Awaits Orlando Results

\$24,200 Buys 1914-D \$2½ Sight-Unseen

Very little activity is occurring within the dealer-to-dealer trading networks with virtually the entire numismatic fraternity in Orlando attending the FUN show and auction. A mere \$200K traded sight-unseen through the Certified Coin Exchange in the first ten days of 2013 compared to over \$460K that changed hands during the same time last year. This \$200K total includes yesterday's transaction of a \$24,200 blind Bid being hit for a 1914-D \$2½ Indian graded MS65 by PCGS. This is a pop 82 coin with PCGS and NGC each encapsulating 41 examples at the Gem level with only one graded higher – an NGC MS67. Initial reports of a strong show and runaway auction prices are trickling in. This convention is often viewed as a strong indicator as to the health of the rare coin market and a crystal ball of what is to come in the months ahead.

Although Albany Halves in MS61 through MS64 and Huguenots in NGC MS65 retreated a bit from their previous Bid levels, a couple of Silver Commems achieved partial recoveries. These include the California in NGC MS67 edging back up to \$1,100, and comparably graded Roanokes reclaiming the \$400 level. These have a combined pop of 227 and 505 respectively and are now above their historic lows. Select issues are still realizing prices at retail public auction that are below sight-unseen Bid, albeit they are often lower by just one Bid increment. Buyers remain visible at or near Bid for the majority of Gold Commems and seem to have no need to be more aggressive as many of these issues are readily available. Common date Morgan Dollars are moving higher in MS63, MS64 and MS67. This week's increases are relatively minor at 2%-3% with \$460 and \$575 now being offered for any NGC and PCGS example in MS67, regardless of what the coin looks like. Generic PL Dollars are a little softer, especially in NGC MS64PL and MS65PL. The sole bright spot here is the 1891-S graded MS65PL by NGC which added \$100 to its sight-unseen Bid. Common Philly Peace Dollars in PCGS MS65 are all looking stronger while examples of the 1923 in MS64 and MS65 were the only gainers in NGC plastic.

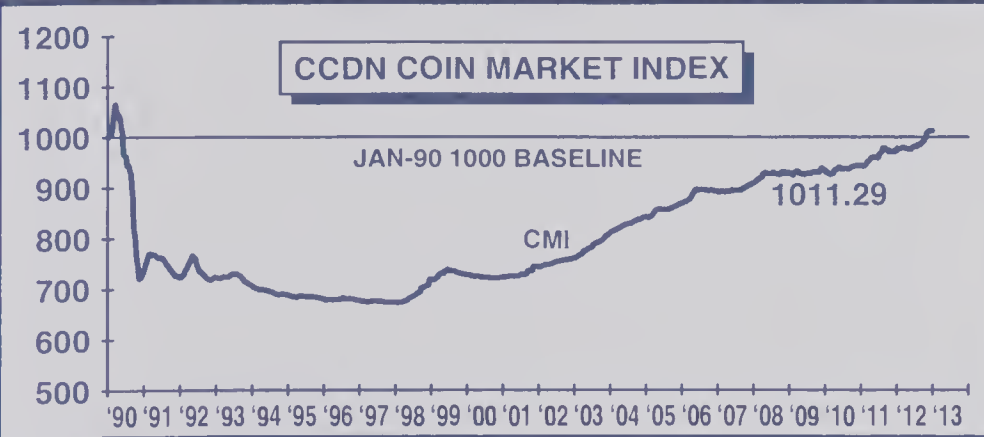

Draped Bust Half Cents in MS61 and MS62 were among the top gainers within the Type segment this week. There is, perhaps, no other obsolete denomination that fascinates collectors as much as the Three Cent Piece. An 1871 Silver issue, graded NGC MS68★,

fetched \$7,820 during this past weekend's Teletrade auction, and a very scarce 1884 Three Cent Nickel being offered by Heritage in their Orlando sale, graded PCGS MS65, with an original mintage of only 1,700, has already been significantly Bid up by on-line participants and could possibly set a record. Other big gainers include early Liberty Seated Halves with Arrows in MS61 and MS62, and their peers in NGC MS66 are now being sought for \$500 more, as several other Half Dollar issues are adding zest to this segment's very healthy prospects. First issue-year Type 1 Buffalo Nickels in MS65 are maintaining their popularity while sight-unseen Bid for 1937 Buffalo Nickels in NGC

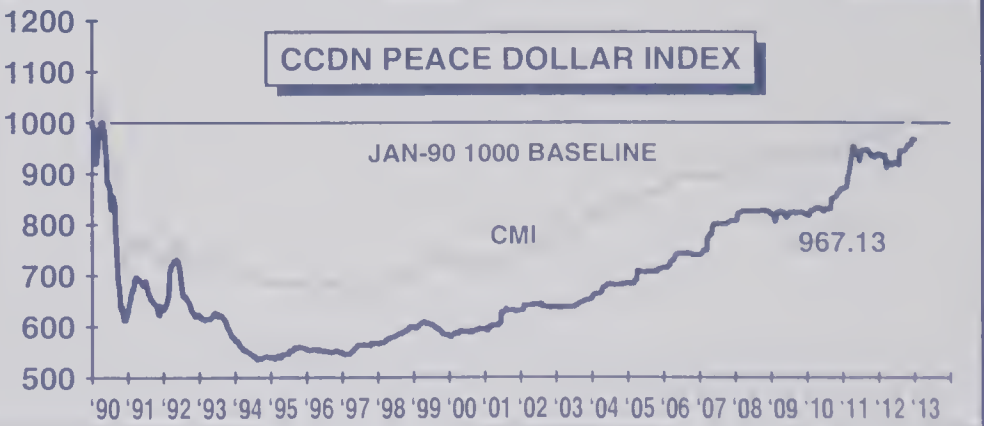

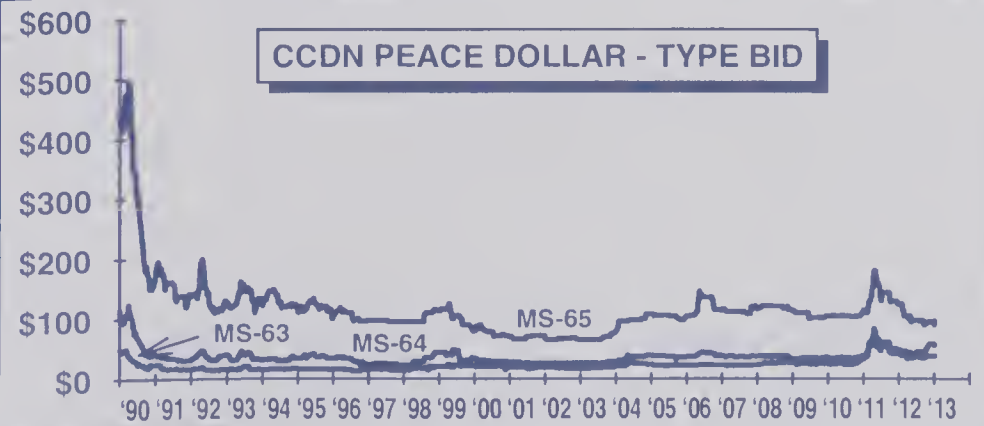

MS66 gravitated back down below \$50. At this Bid level the entire NGC population in this grade would cost under \$200K compared with the 1938-D, that would run \$935K. Had it not been for those 1940-S Walking Liberty Halves in MS67 packing a good punch, the Walkers segment would have had reported in with a somewhat boring week. These issues are up by \$500 and are needed in either slab. NGC has graded 9 in MS67 while PCGS has slabbed 4. These appear very infrequently at public auction in this condition with the last few results as follows: 9/11 \$27,600 PCGS/CAC; 4/10 \$5,319 NGC; 5/09 \$25,300 PCGS and 7/08 \$8,050 NGC.

Gold Spot closed \$23 higher at \$1,677, while Platinum shot up \$35 to narrow the gap between the two precious metals by only \$45 an ounce. Gold Type would be best described as being flat right now, rather than weak, as scarcer material appears to be holding up well amidst the declines posted for the most common material. Type III \$20 Libs, especially in Choice, are bouncing back robustly, while sight-unseen Bids for generic \$20 Saints in MS65 are up by 10% from this time last year. Stacks Bowers will be holding an Americana auction January 22-24 in New York featuring selections from the Cardinal collection. We have listed some of the many highlights from the sale herein.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of a high Bid. A "Trade" which is near or below current Bid (CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown) is highly valued and is a price which a dealer would accept for a coin of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES
Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

A SMART APP *for smart collectors*

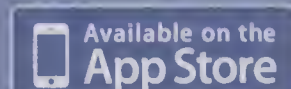

Introducing NGC Coin Details

NGC's greatest research tools
in one free mobile app.

With a simple barcode scan, you
can verify NGC® certification and
uncover all the details you need:
NGC US Coin Price Guide values,
VarietyPlus® attribution listings,
images and specifications, and
auction data. NGC Coin Details
is free and easy to use — and you
can take it wherever the hobby
takes you.

Scan the code or visit
NGCcoin.com/app
to download the app.

App Store is a service mark of Apple Inc.
iPhone is a trademark of Apple Inc.,
registered in the U.S. and other countries.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes.
Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

FUN Auction Brings \$44.8 Million Plus Graded Morgans Shine

Dealers reported a strong show in Florida, where scarce to rare examples, attractive, high-grade Type, Bust material of all denominations, and early Circulated Half Dollars were especially sought after. Several Three Cent Silvers, both Mint State and Proof, went through the roof at auction, and many sold for five figures, up to \$44,000. Auction results in general were solid with a total of \$44.8 million. Reports of a crowded bourse suggest robust attendance, as there was a great deal of "pent up" demand. The "lost" Walton 1913 Liberty Nickel graded by PCGS as a Proof 63 and slated to be sold by Heritage at the Central States convention in April was on display at the show. This coin was first given authenticity by a team of experts in 2003, and five of the six members of that team returned to examine it together again in Orlando. Platinum closed at \$1,697 which hasn't taken place since October of 2012 when Gold Spot was \$1,774. Gold is currently at \$1,690 and has settled below Platinum for the third straight day.

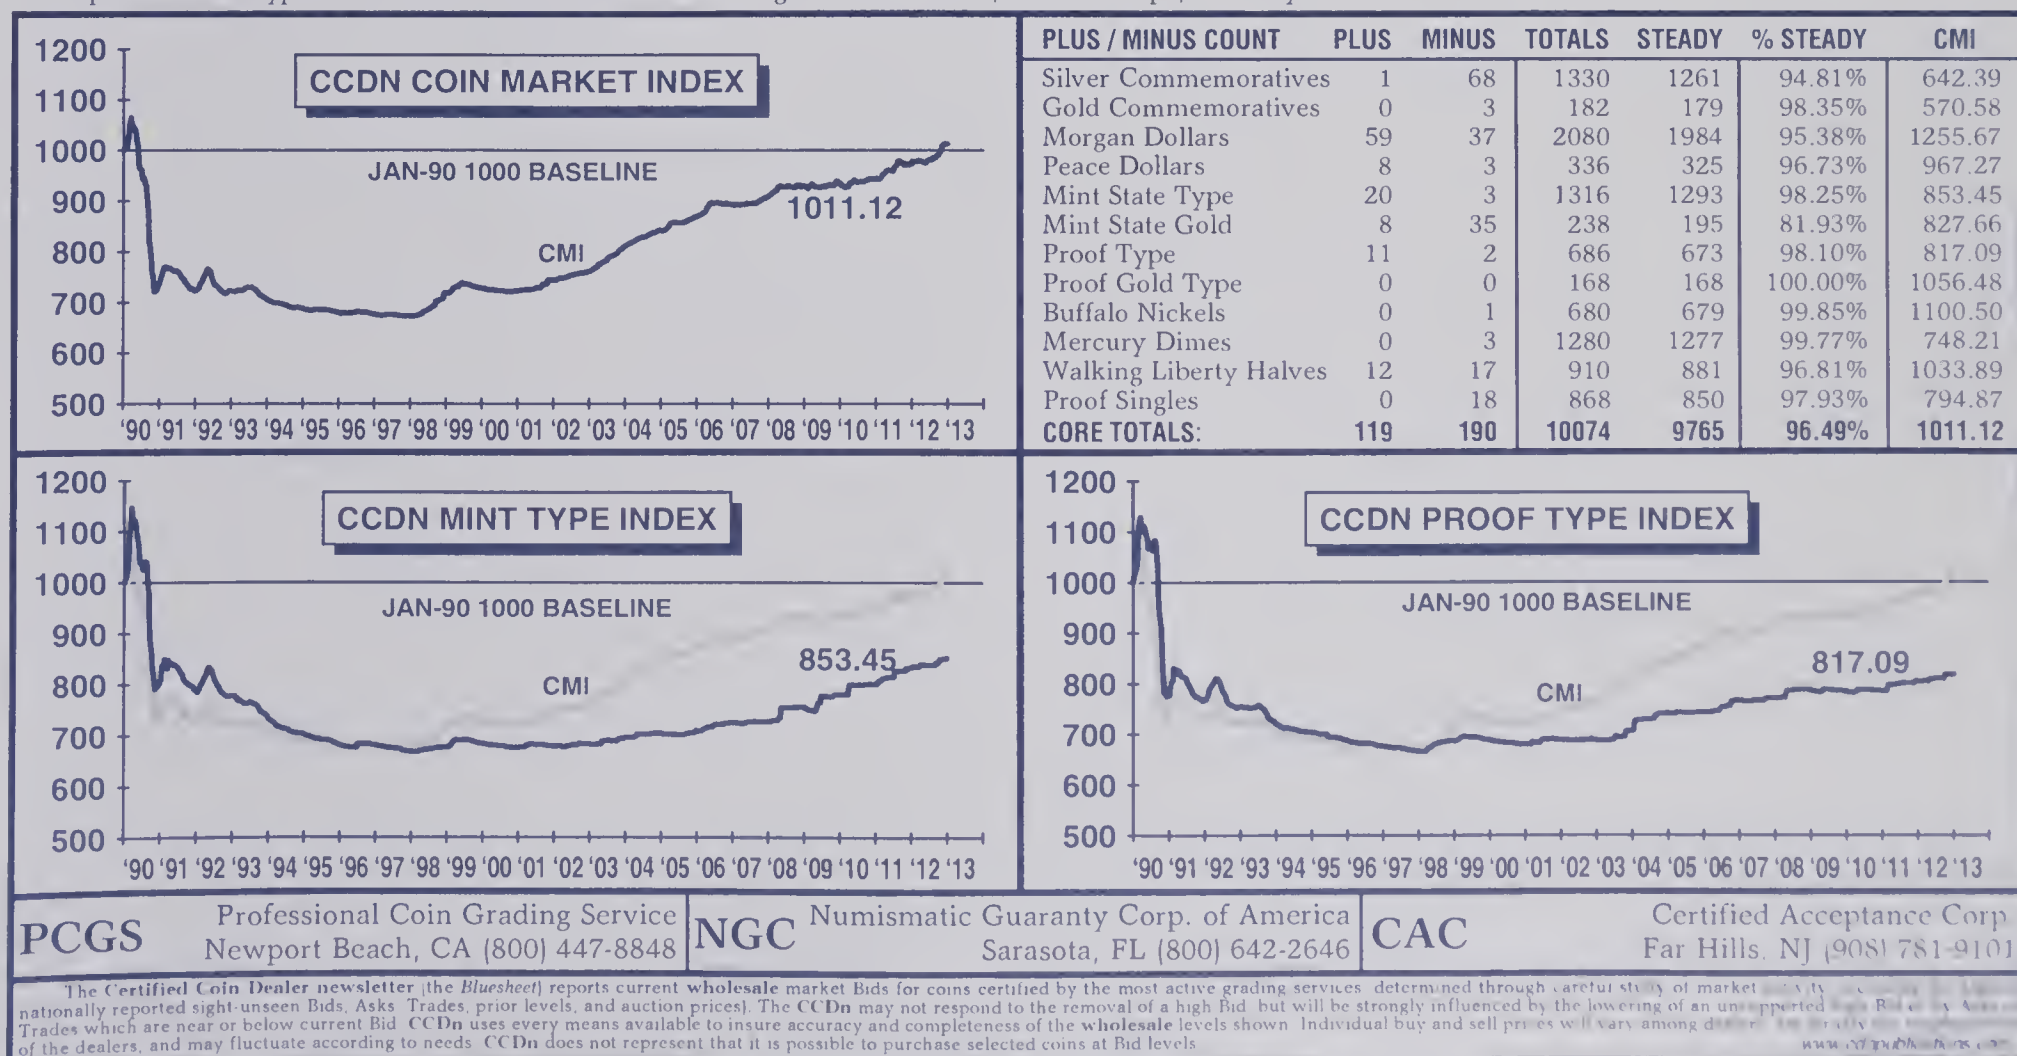

Last week's Orlando auction activity did not bode well, at all, for any of the Silver Commems, several of which — even in Gem and Ultra-Gem quality — sustained considerable setbacks. Isabella Quarters in PCGS MS66, for example, are reduced now by \$500, and Hudson and Norfolk Halves in several grades were quite rattled. The weak reception demonstrated within this segment also took its toll, though less severely, on Antietam, Hawaiian, and Robinson Halves in MS65, and reductions for 1933-D Oregon and NGC graded Spanish Trail issues in MS67 were far from negligible. Gold issues weren't as scathed by the discounting wave, but 1917 McKinley Dollars in MS65 dipped by as much as \$80. The gap between Bids for generic Morgan Dollars in MS63 and MS64 is narrowing a bit, as market-makers continued to offer slightly more for those of the former grade and about \$2 less for each of the latter this week. One better-date Philly issue, the 1881 in PCGS MS65, fell by \$30, but those highly admired 1882-S cartwheels in PCGS MS67 have gained \$15 since the year began. Demand is also firmer for those very scarce but available 1884-S Dollars in MS62 and MS63, of which there are a total of 297 of these specimens reported by both services in either grade. Plus graded generic Morgans are higher in MS64+ with sight-unseen buyers accepting PCGS or NGC material, which is 11% over its non-Plus counterparts. Movement among Peace Dollars is not all that dramatic. However, market-makers are trying to pry loose the one and only CAC approved 1923-S issue in MS66 by offering \$5,000 more for it.

Plus signs adorn the Bid columns for Braided Hair Large Cents in numerous grades with both Brown and Red-Brown designation, and there's more drive among Bidders to compete for those Type I Three Cent Silver Pieces in MS61 through MS63. However,

sight-unseen Bids for Arrows variety Liberty Seated Dimes, both of the early-date issue in PCGS MS65 and those of the late-date issue in NGC MS66, each had their sight-unseen Bids retreat by \$150. Indian Head Cents in PR65BN and PR66BN got a good jolt as aggressive Bidding activity enabled those of the higher grade to surge by as much as 17%, and Bidders appear anxious to acquire more of these same issues in PR65RB and PR66RB as well.

PCGS has graded only six 1937-D 3-Legged Buffalo Nickels at the MS66 level, and one of these specimens is due for an appearance before Heritage's auction block in a few weeks during this year's first of three Expo conventions in Long Beach. Three early Mercury Dimes, the 1919 in NGC MS65FB and the comparably graded 1926 in PCGS plastic, encountered weakness during the auction circuit this week, as did 1927 Merces in PCGS MS64. These auctions, however, also demonstrated how strong the market can be for late-date Merces in Choice and Gem, with or without Full Bands in first generation slabs with Gold CAC stickers, and several of these specimens realized incredible amounts for their designated grades. A handful of key-date 1919-D Walking Liberty Halves in MS64 have appeared at recent auctions and, while they remain revered, they can have their vulnerabilities. These issues have receded for the second time in a year and are down by nearly \$2,000 since then. Market-makers, however, are aggressively in pursuit of 1934 and 1940-S Walkers in Gem quality with CAC approval and seem to be in need of more war-time issues in MS66. Although the Gold Spot market is in the process of rebounding somewhat, some residual declining activity among generic Gold Type persists. \$20 Libs and Saints in MS65, however, remain stable, if not completely buoyant. Most of the declining activity, which include Type III \$20 Libs and High Relief \$20 Saints in NGC MS66, is fairly moderate, but may be indicative of some weariness over short-term prospects for this segment.

PCGS has created a list they deem as the top 100 modern US coins. Making the #1 position is the 1964-D Peace Dollar. Since no examples of this coin have surfaced, PCGS has offered \$10,000 just to view and verify one. The original mintage of this cartwheel was just over 316,000 and all were supposedly destroyed. PCGS has done this before, offering \$10,000 in 2003 to view the missing fifth 1913 Liberty Nickel, and \$1,000,000 to buy or consign it. Post-FUN market strength will be tested to some extent as Stack's Bowers will hold their New York Americana sale, which includes the Cardinal Collection, January 22-24. Then, it's the Las Vegas PCGS members only trade-n-grade show at the Bellagio, January 23-26. This, of course, is followed by the Long Beach Expo, February 7-9.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over ~~350,000~~^{400,000} coins with a market value over ~~\$1.5 billion~~^{\$1.8 billion}. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

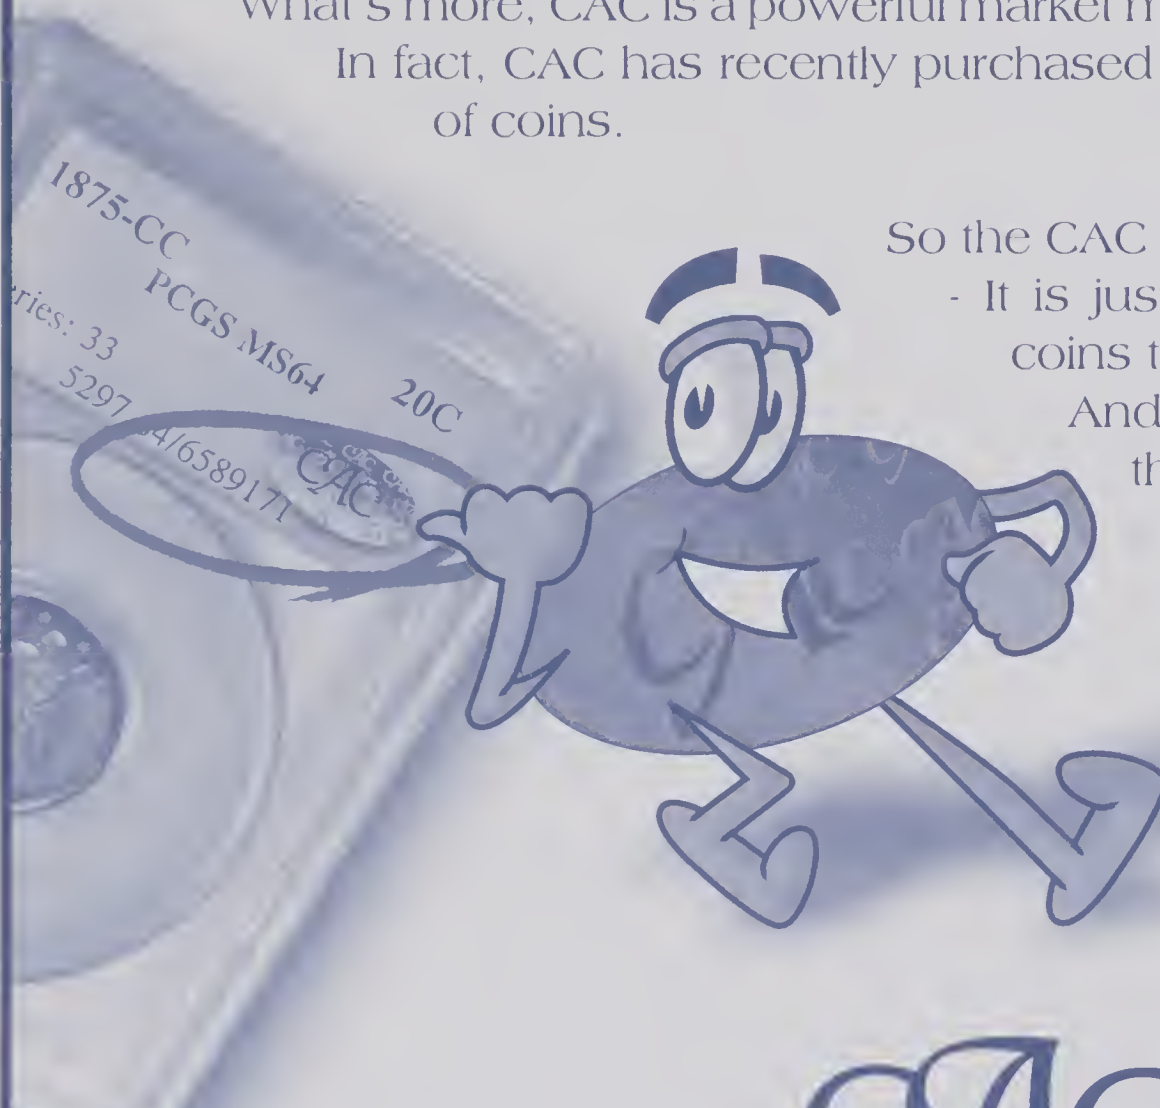

What's more, CAC is a powerful market maker for its stickered coins.

In fact, CAC has recently purchased over ~~\$250,000,000~~^{\$275,000,000} worth of coins.

So the CAC sticker does not add value
- It is just an easy way to identify
coins that are solid for the grade.

And it gives you confidence in
the value of a coin.

*The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.*

Generic Dollars Remain Strong

Goldberg's Pre-Long Beach Sale Ahead

Dealers are finishing up with the Stack's Bowers sale in New York, and others are in Las Vegas attending the PCGS trade-n-grade at the Bellagio. Coming up soon is the Long Beach Expo, February 7-9, with an auction by Heritage. Following the expo, the Goldbergs will hold a pre-Long Beach auction February 3-6 in Los Angeles. We have listed several of the many highlights herein.

Although Albany Halves in MS61 through MS64 were able to avoid the prolifically negative consequences of last week's discounting havoc within the Silver Commems segment, Bids for these issues got doused down as a result of this week's persistently depressive activity. Hudson Halves in MS66 were hammered again for a second straight week, resulting in a total drop of 17%. Also sliding again were 1916 McKinley Gold Dollars in PCGS MS64, which lost \$35 over the past two weeks, and their peers in NGC MS67 slumped by \$25, while those comparably graded 1917 issues gained \$100 to settle at an even Bid of \$3,500. The uneasiness among the Gold Commems spread far enough to knock those \$2½ Sesquicentennials in PCGS MS64 down to well below \$800. Many of these classic Commems, both Gold and Silver, remain readily available in the wholesale market and far fewer are selling for less than sight-unseen Bid at retail auction compared with the recent past. This information can be confirmed by perusing this week's Market columns.

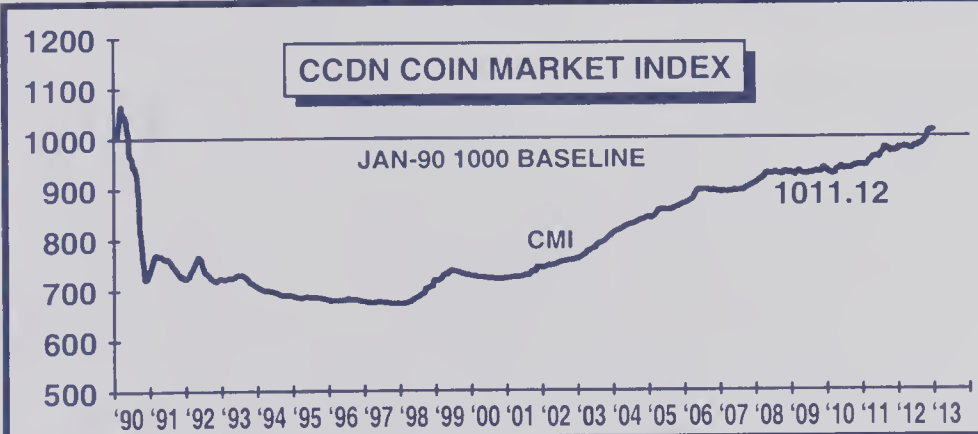

Generic Morgan Dollars in MS63 proceeded to stride ahead with a 4% advance, adding to their prior week's gains. Common dates are also higher in MS64 with dealers needing quantities of each grade. While it may not take much searching to find really nice Gem quality 1882-S Dollars, finding them in MS64DMPL and MS65DMPL can be quite challenging, as those of the former grade have a combined pop of only 240, and a mere 105 reported for those of the latter grade with just 17 finer. Market-makers want these cartwheels in the better of the two grades strongly enough to offer as much as \$1,000 for any of them, in either slab, constituting an increase of as much as 85%. Peace Dollars remained unchanged from last week other than a small advance for 1922 and 1923 issues in PCGS MS65.

Early Coppers, including an extensive selection of Liberty Cap and Draped Bust Large Cents, make up an almost dominant component of this next series of major auction

events due to commence in a little more than a week at the Goldberg's in Los Angeles. Three Cent Silver Pieces are continuing to see increased demand. Those of the Type I variety in MS61 and MS62 added to their hefty gains from last week, especially those of the former grade, as these obsolete denominated favorites have now surged by 27% in two weeks, and their comparably graded peers of the Type II variety are also getting very much notice, resulting in their sight-unseen Bids advancing significantly as well. Dealers will now pay at least \$2,000 sight-unseen for any Type 3, Three Cent Silver in MS67. Tiny spreads between Bid and Ask are still seen for select Silver Type in Proof and Mint State, in addition to a few Walkers. Some examples include: a sight-unseen Bid of \$5,500 for 1879 Seated Half Dollars in PCGS MS66 that are available for \$5,700; \$430 Bid for any PCGS MS64 Barber Quarter as \$450 is Asked for '16-D and others'; \$2,500 Bid for any NGC PR65 Barber Half Dollar when a 1908 is being sold for \$2,550; and \$690 is being blindly offered for any PR64 Barber Dime with numerous sellers at \$700. Several more examples can be cited of slabs being offered for less than sight-unseen Bid and are identified as trades in this week's Market columns. This scenario often occurs when the high Bidder is posting on one dealer-to-dealer trading network while the low seller is on another.

Buffalo Nickel enthusiasts need to take note of the offerings scheduled to appear during the Goldberg's upcoming pre-Long Beach auction. Aside from a beautiful, peripherally toned 1916 DDO graded MS64 by PCGS, there are several other early and key-date Buffs up for grabs, graded PCGS MS65 with CAC approval, including a 1925-S and a 1926-S. There's still little indication of a preponderant direction the Gold Type segment will be taking anytime soon barring, of course, any major movement by Gold Spot. For now, however, trading activity was such that \$2½ Indians in MS64 ended these past two weeks with a \$25 advance, while \$10 Indians in MS61 were also among the few issues able to attract confident buyers. Heritage has announced that it will donate \$1 to the March of Dimes charity for every Dime the auction giant sells in 2013. An estimate of more than \$10,000 in total for the year was given based on numbers from 2010-2012. Franklin Delano Roosevelt started the charity in 1938 to fight polio.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid by Ask. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly for purposes of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

www.coinmarket.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, such as coin shows and other sources of *wholesale* transactions. Auction prices realized or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin may display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols. "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder
In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis

DEPENDABILITY.

depend·a·bil·i·ty

noun - capable of being depended on; worthy of trust; reliable

Depend on Spectrum to:

- Give you the highest possible prices for your coins and currency. Nobody pays more than Spectrum!
- Provide immediate payment. Spectrum will pay you on the spot, wire your bank, or Fed Ex you a check.
- Purchase all types of coins and currency. No deal is too large or too small!
- Provide unmatched expertise. Spectrum's numismatic professionals are the most knowledgeable and experienced in the industry with over 300 years of combined experience. We have expertise in all areas of the rare coin and currency markets.

You will receive unparalleled customer service and you can bank on Spectrum to pay you absolute top dollar. Contact one of our reps Toll-Free at 888.828.2646, or send us an email or fax. Don't wait! Call today!

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

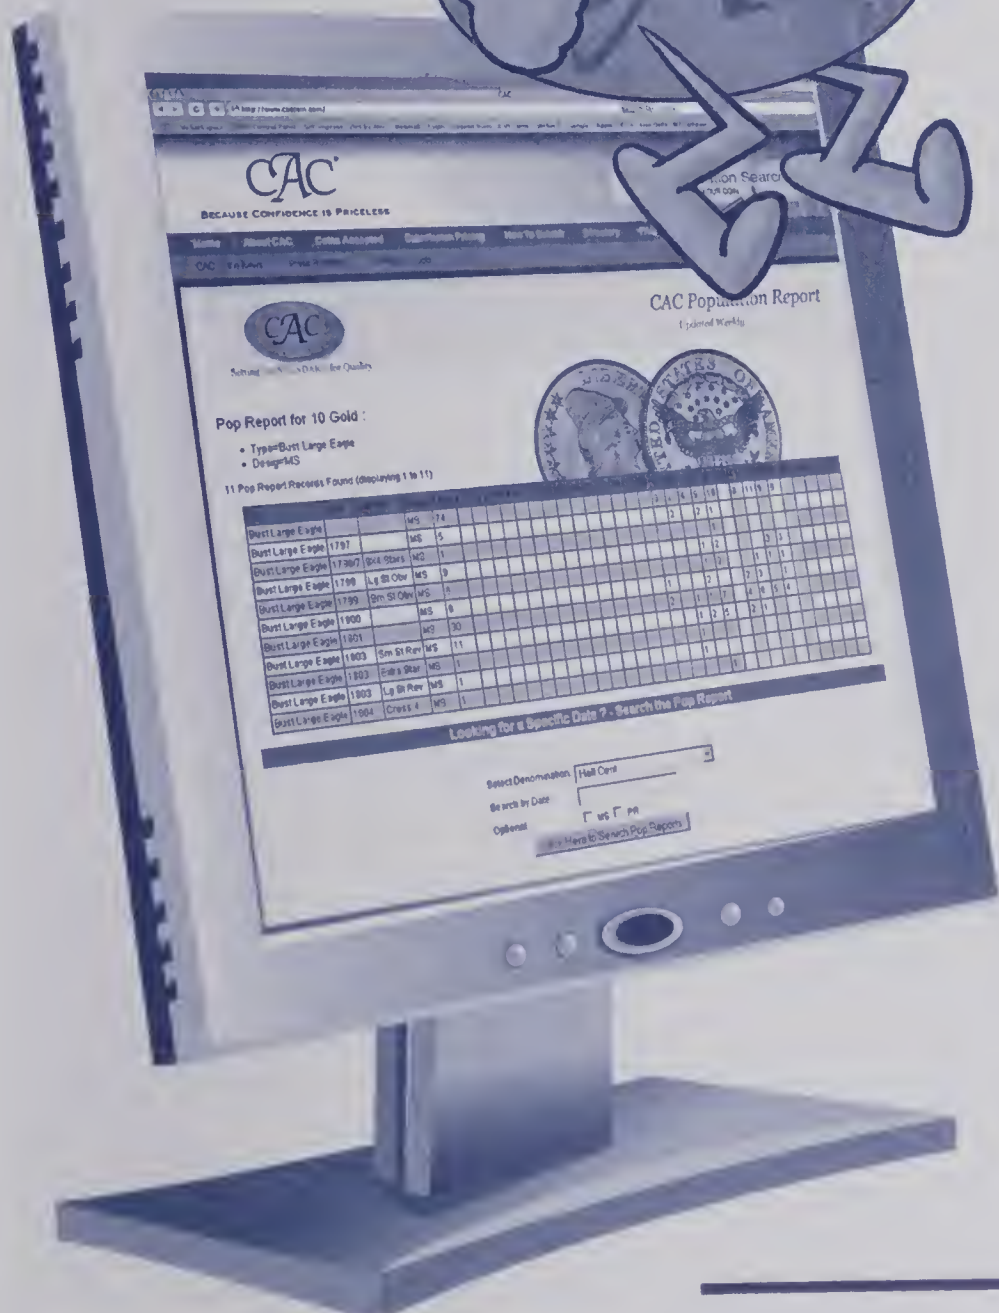

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

CAC[®]

"Because Confidence is Priceless"

NGC Bulk Submissions Have Never Been Easier

Scott Heller,
Director of Operations
Throughout his 19 years at NGC, Scott has managed and overseen thousands of bulk and prescreen orders. His in-depth knowledge of the numismatic community and the certification process is invaluable to the growth of your business.

Get personal consultations from industry expert Scott Heller.

For years, NGC has led the industry with consistent and accurate grading, excellent customer service and fast turnaround times — for an unbeatable value. We also offer a direct liaison for professional dealers interested in bulk submission. Scott Heller is uniquely qualified to personally assist you with bulk submissions, and will even travel to your location for on-site consultations.

**To discuss your options, contact Scott directly at
sheller@NGCcoin.com or 1-800-NGC-COIN (642-2646).**

Record \$10 Million Paid For US Coin Long Beach Expo Cued Up

Stack's Bowers made record-breaking numismatic history by selling the first \$10 million coin, a 1794 Flowing Hair Silver Dollar graded SP66 by PCGS, and approved by CAC. The previous record was set in July of 2002 when \$7.59 million was paid for a 1933 \$20 Saint-Gaudens at public auction. This new record price, combined with the sale of several other high-end rarities propelled the auction to a total of \$27 million on January 24 in New York. Ira and Larry Goldberg will keep the auction action moving February 5 and 6 with their pre-Long Beach sale in Los Angeles featuring the Paul Gerrie Collection.

Silver Commems had an exciting outcome this week. One would have to go back to the first week of November from last year to see such positive activity. Alabama 2X2 and Fort Vancouver Halves in MS63 through MS66 jumped, as the former issues in the highest of the four grades surged by an average of 16% to \$1,900, while Grant with Star issues in MS65 traded heatedly enough to post a bold \$100 gain. Some two dozen high-end Silver Commems sold for over three times CCDN sight-unseen Bid in the recent Stack's Bowers sale. Nearly all of these coins were of premium quality possessing a CAC sticker, + grade, NGC★ or combination thereof. The time may soon come when Morgan Dollar collectors will yearn for those days when even a less common CC-Mint cartwheel in Choice and Gem was seen all too often and could be bought for a "bargain" price. The rare 1879-CC Dollars in MS61 and MS62 surged by well over 20% in each grade and, although the advances for most of the other CC-Dollars in MS61 through MS65 were far from spectacular, the fact that Bidders have targeted these undeniably popular issues this week may possibly result in more activity in this segment. For now, minimum Bid for the most common CC-Mint Dollar in MS65 is back up slightly to \$345, which has changed very little over the past few years.

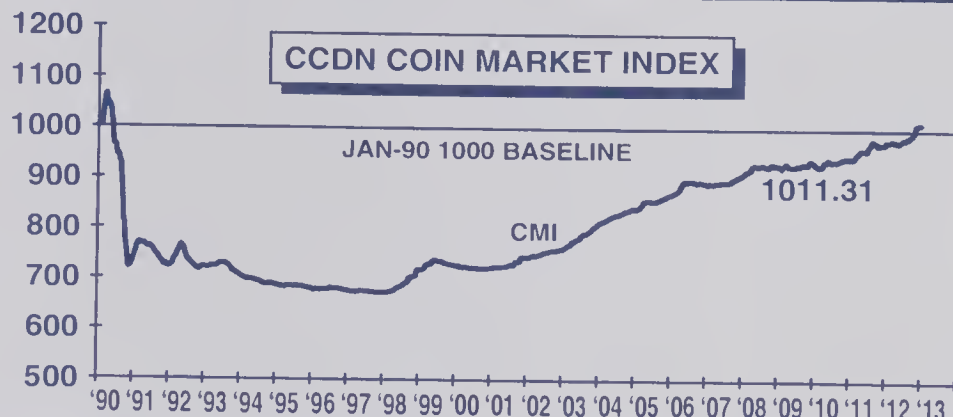

Semi-key Buffalo Nickels in Gem or better never get overlooked, and an issue such as a 1914-S in PCGS MS66, with a combined pop of only 49 with 7 finer, and one of only 6 approved by CAC, can draw quite a bit of attention from on-line Bidders, as currently is the case so far with one such example offered by Heritage in conjunction with the Long Beach Expo. Key-date 1916-D Mercury Dimes don't always have to be in Mint State quality with Full Bands to cause a stir when offered up at a major auction event, as demonstrated by an NGC graded specimen in AU55 soon to conclude its Bidding session with Heritage. There are a total of only 115 examples certified in this grade by either service, and 22 are Full Band designated. Those always sought-after first issue year 1916 Walking Liberty Halves in MS65 are desperately needed and dealers are offering up

\$100 more, for a sight-unseen Bid of \$1,100 for any certified example. A slew of late date Walkers, mostly in MS65, are on the rise, setting the minimum Bid for these issues at \$90. A complete 20-piece short-set graded MS65 by PCGS sold for \$2,820 at the Stack's Bowers sale last week. Several Walkers in that so often desired MS67 quality are on a fierce ascent, as Bids for 1933-S, 1934-D, and 1935-S specimens in NGC plastic are all up by several hundred dollars.

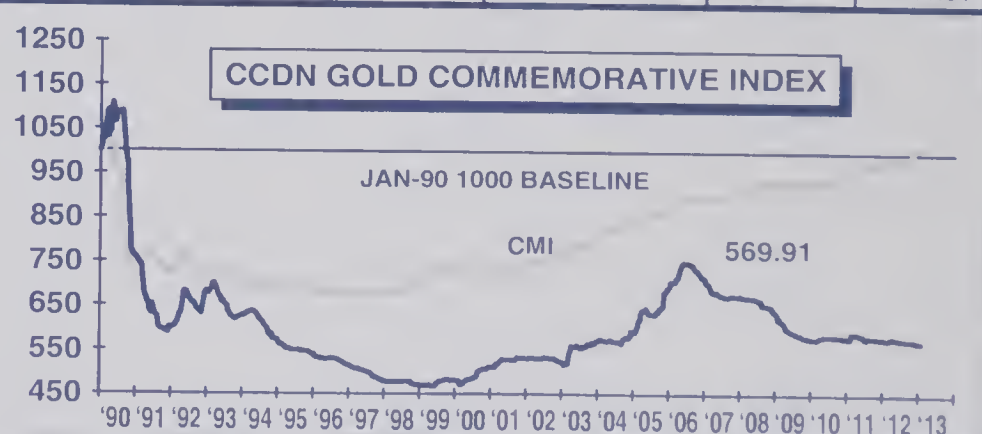

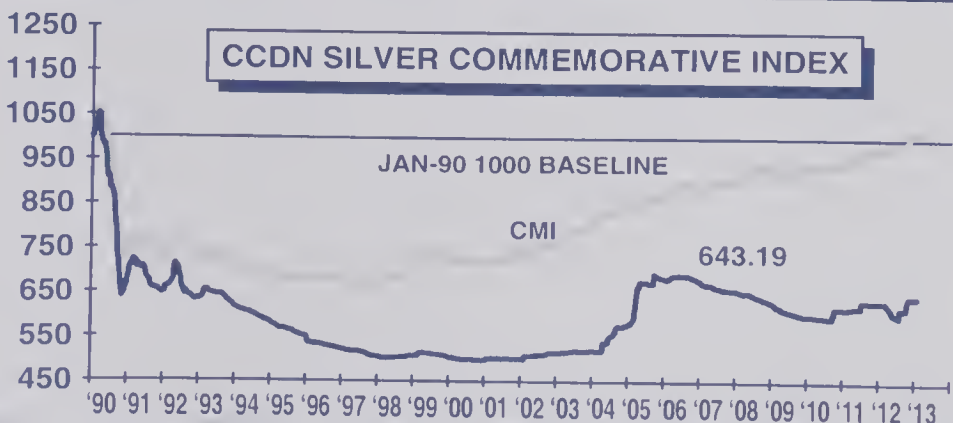

Type III Gold Dollars in MS61 and MS62 are now Bidding sight-unseen for amounts representing more than eight times melt, a premium surpassed only by their comparably graded Type II peers and \$3 Indian Princesses. Those scarce \$5 Libs with Motto in NGC MS67 and \$20 High Relief Saints in PCGS MS64 and MS65 are bucking the downside pressures, as the fluctuation of Gold Spot still continues to cause a shake-down of Bids for generic \$20 Type III Libs and Saints in MS61 through MS63. Gold Spot is currently at \$1,661 per ounce, while Silver currently sits at \$31.34 and Platinum, still above Gold, has a Spot of \$1,674.

The Long Beach Expo and Heritage auction, highlights herein, February 7-9, has quite a bit in store. PCGS will offer a five-hour "Coin Grading 101" class limited to 20 pre-registered students Saturday the 9th which will be led by Mike Sherman. David Hall will also participate in the course which includes lunch and costs up to \$199 depending on membership level. In a recent and ongoing effort to revitalize the show and beef up the sports card section, promoters have taken a billboard-sized freeway advertisement. Earvin "Magic" Johnson will be present at the show to sign autographs along with former LA Laker star, Jerry West, and jockey Laffit Pincay, Jr. Laker Girls will be there too, giving their signatures and performing cheers.

MERCURY DIMES

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

WALKING LIBERTY HALVES

CCDn does not represent that it is possible to purchase selected coins at the lowest possible price. The lowest possible price is the price of the coin in the market. The price of the coin in the market can be expected to occur at substantially higher levels than the price of the coin in the market.

Long Beach Expo In Full Swing Goldberg Auction Tallies \$15 Million

Ira and Larry Goldberg's Pre-Long Beach sale in Los Angeles, February 3-6, totaled over \$15 million. Top lot honors go to a 1793 Liberty Cap Large Cent, graded PCGS AU53BN which sold for \$310,500. We have included a list of some of the highlights from this sale herein. Dealers and collectors are currently gathered in Long Beach where Heritage is holding an auction at the Expo. Attendance was very strong on opening day with several hundred lined up to enter. In general, metals are performing well which is always a good sign heading into a show. Gold closed at \$1,670 per ounce, while Silver has a Spot of 31.39. Platinum hit \$1,722, and Palladium closed at \$750 an ounce. Media buzz from the recent record-breaking \$10 million sale of the 1794 Flowing Hair Silver Dollar likely added to interest in the show. Having the Walton Nickel on display for the first time in Long Beach is yet another reason for healthy attendance, not to mention the High Desert number one set of US Large Cents. In addition, three of the most valuable US Bank Notes with a combined value of \$5 million are on display. If all this weren't enough to attract a good crowd, Magic Johnson and Jerry West will be at the Expo signing autographs, along with jockey Laffit Pincay, Jr. on Saturday, February 9. Visitors will also have the opportunity to find the material they are looking for by using one of the multiple iPad stations to access Collectors Corner's CoinSearch program.

It almost should be expected that the Silver Commem segment will periodically have a trading session or two that yields at least some partial recovery for those issues that have been most susceptible to the long periods of extensive discounting. Lafayette Dollars in NGC MS65, however, were among the few issues that continued on the downward path, ending the week with a \$425 loss. Nonetheless, NGC graded California Halves and all Elgin issues achieved rebounding action clear across the entire Mint State grade spectrum. On those occasions when this segment appears to be picking itself up a bit, those 1947 B.T. Washington PDS Sets in MS67 break out into a surge, as they did again this week. These sets are up by as much as 13% since their last climb to higher ground just eight weeks ago, and comparably graded 1950 sets in PCGS plastic are being lured out from their elusiveness with a sight-unseen offer that is \$500 higher since last week. Moderate advances within the Dollar segment continued this week, and they outnumbered the decliners, reflected mostly among the common dates in the MS63 grade column. Better-date cartwheels in MS65 and lower are definitely hotter, and Bidders aren't

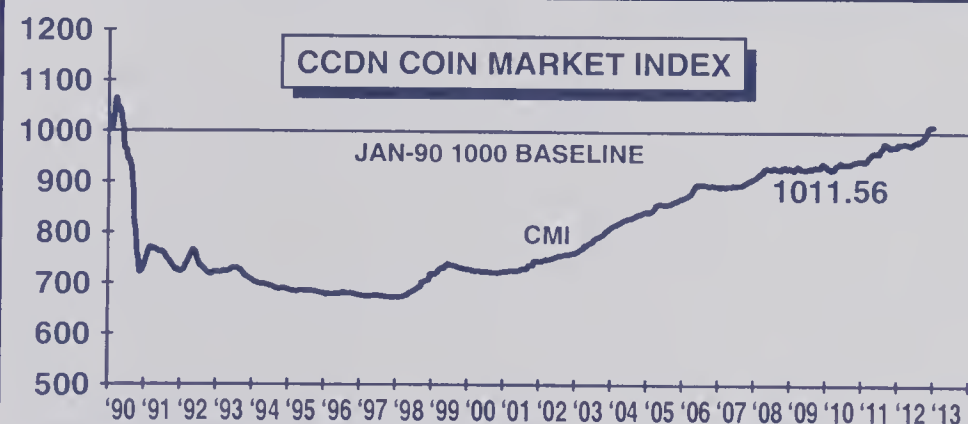

only going after CC and late-date S-Mint issues, rather just about any date considered outside of the realm of generic. There's increased eagerness to pull in one or more of only four 1893 Morgan Dollars graded MS66 by NGC, causing these issues to spike up by \$900 to an even Bid of \$12,000, while market-makers are trying to buy more 1904-S issues in MS65 by increasing Bid by \$400. Three very scarce Morgan Dollars graded by PCGS with CAC approval, an 1884-S in MS63, an 1890-CC in MS66, and an 1895-O in MS64, are being closely watched as they come up at auction in Long Beach. Generic Peace Dollars in PCGS MS65 are back up to Bidding \$100.

An extensive amount of Type material in Mint State is on the rise again, and Proof Type is even more ablaze with gainers from Three Cent Nickels to Trade Dollars throughout multiple grade columns. Early Liberty Seated Dollars of the No Motto variety in PR61 through PR64 were among the most impressive performers as Bids for those of the latter grade shot up by an average of 25%. More advances have been recorded this week than for all of 2013 combined. The Goldbergs concluded their Pre-Long Beach auction with the sale of a very scarce 1914/3 Buffalo Nickel in PCGS MS65, a pop 2/2 coin and the only example of this grade that has been CAC approved and sold for \$32,200. A comparably certified, CAC approved 1926-S Nickel fetched \$115,000. At the same time, 1918-S Buffs in NGC MS66 didn't fare too well during their most recent auction outing, resulting in a 14% plunge. This has been the first week during which some voluminous trading occurred this year within the Mercury Dimes segment, as several of the most common Mercs in MS65 through MS67, excluding any with Full Bands, are enjoying slightly higher sight-unseen Bids. Key-date 1919-D Walking Liberty Halves in PCGS MS64 slipped \$400 this week, while 1920-S issues in MS61 through MS65 picked up some of the slack occurring within this segment. Walkers had a fairly positive week overall, an outcome made all the more possible by another hefty \$500 advance for 1945-S Halves in

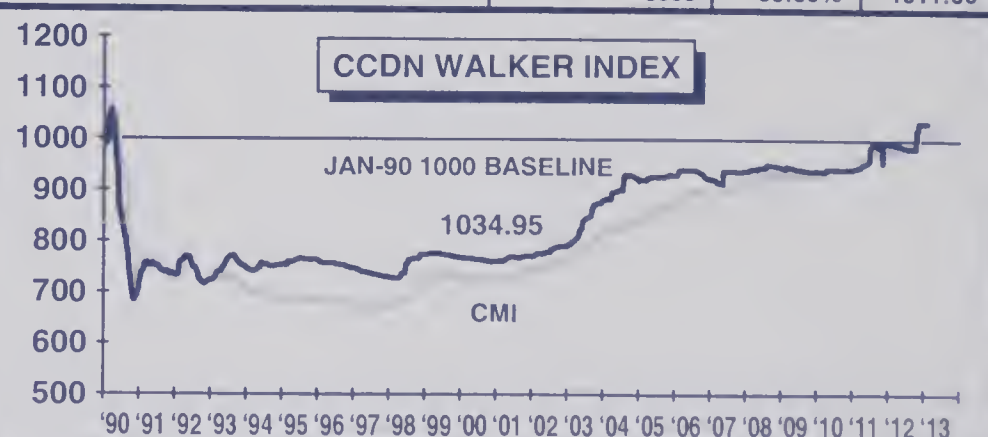

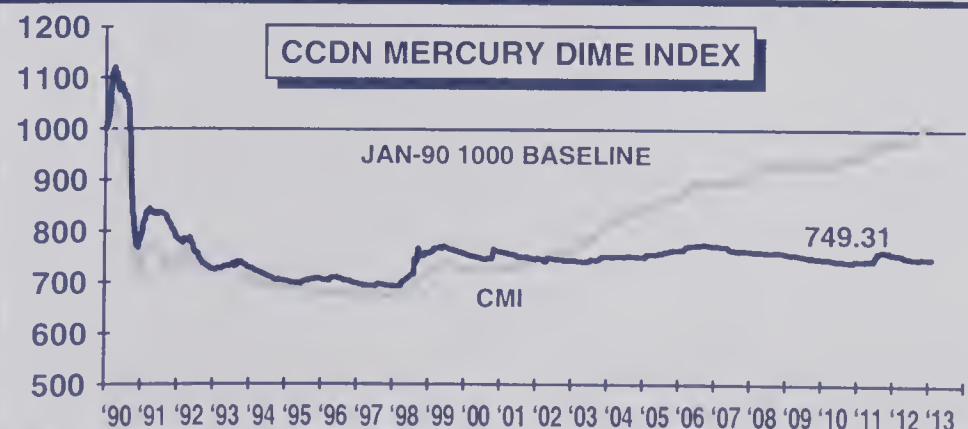

PCGS MS67. A 1957 Franklin Half graded PCGS MS67FBL sold for less than \$1,000 in a New York auction two weeks ago even though dealers will pay \$1,700 sight-unseen for any of the dozen examples that have been graded.

Few signals have been emanating out of the Gold Spot market to give market-makers any indication that the yellow metal is headed in a decided direction. Although most Gold Type sustained itself at current Bid levels throughout the week, \$2½ Libs in MS61 through MS63 and the most common of Double Eagles are getting pinched by the effects of waning demand.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and are strictly the responsibility of the dealers and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

www.ccdnpublishing.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes.
Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Mint Directors Trust Miles Standish - You Should Too!

In 2011, Miles Standish, Vice President and Senior Grader of PCGS, was awarded the Director's Coin for Excellence medal in recognition of his meritorious service to the coin collecting community.

The PCGS Bulk Certification Program, regarded by Miles as one of his most important contributions, enables dealers and collectors to submit high volumes of coins for grading at strongly

discounted prices. Miles can show you how to:

- Grow your business
- Expand your market
- Design specific campaigns to target new markets with innovative ideas such as our specialty PCGS holder label programs.

Find out how Miles can contribute to the bottom line of *your* business. Contact him at **949-922-0515** or **Mstandish@collectors.com**.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

\$1.8
billion

CAC has evaluated over ~~350,000~~^{400,000} coins with a market value over \$1.5 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins.

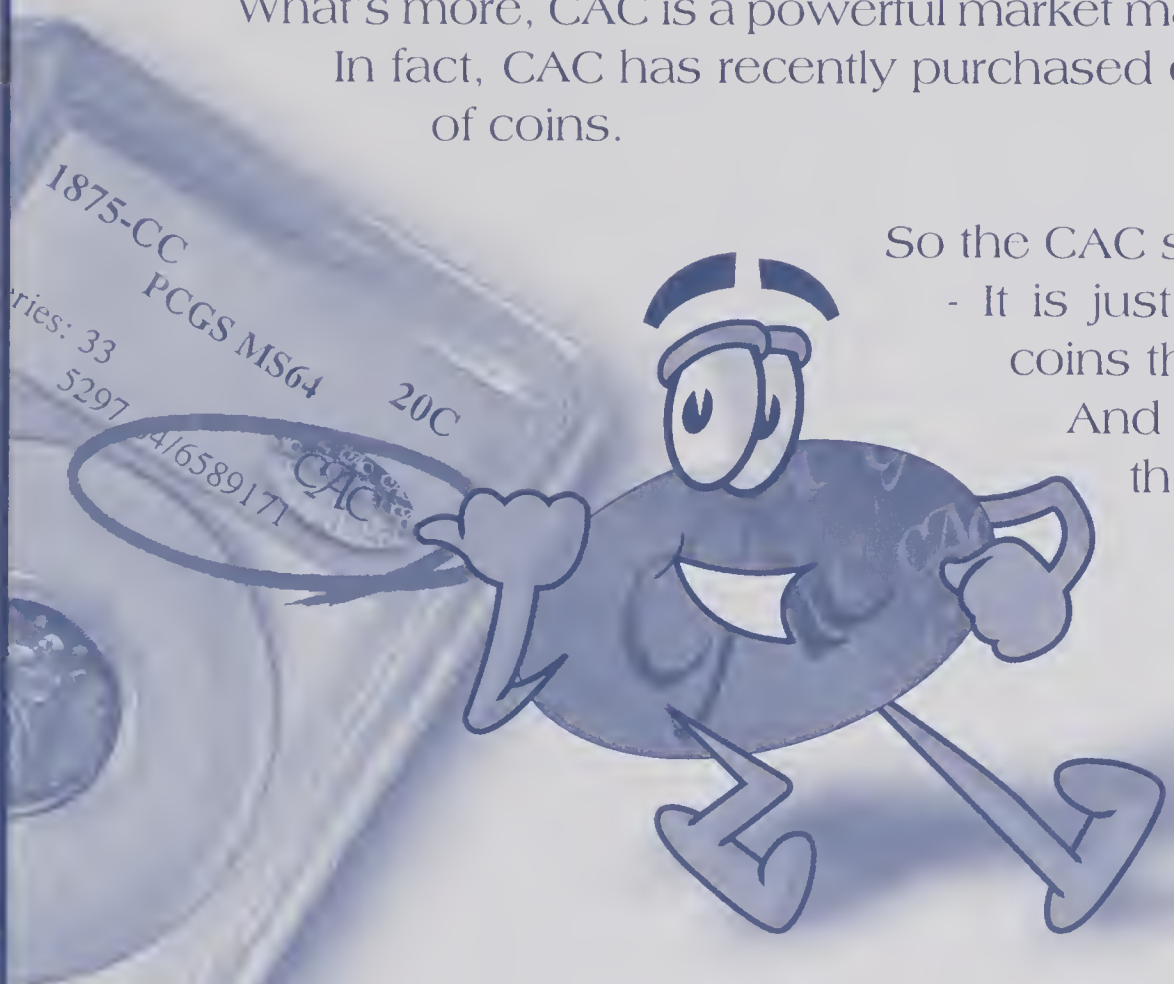

In fact, CAC has recently purchased over ~~\$250,000,000~~ worth of coins.

\$275,000,000

So the CAC sticker does not add value
- It is just an easy way to identify
coins that are solid for the grade.

And it gives you confidence in
the value of a coin.

*The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.*

Generic Morgans Up All Bets On Vegas

Many dealers are currently in Missouri attending the 45th annual Greater American Coin Fair, February 15-17 at the Hilton St. Louis Airport Hotel. In conjunction with the PCGS Vegas members only show, Legend-Morphy will hold a 335-lot auction February 28 at The Venetian/Palazzo. Taking the starring role in the auction is an 1895 \$1 PCGS PR65+ DCam dubbed "King of the Morgans" and is expected to hammer for over \$90K. See several additional highlights herein. The PCGS members only show runs from February 27 through March 2. The Las Vegas Numismatic Society coin show is scheduled for March 1-3, and is located at the Palace Station Hotel and Casino. Less than two weeks away from this show is the Baltimore Expo, March 14-17 at the Baltimore Convention Center. Stack's Bowers will host an auction in conjunction with the Expo which begins March 13. NGC will have an introduction to grading class at the Expo on Saturday, in conjunction with the Expo March 16, reminiscent of the inaugural PCGS Grading 101 course that took place at the recent Long Beach show.

Some downside gravitation resumed among the Silver Commems after last week's positive session that included over 500 higher Bids. 1938 Boone, Columbia, and Rhode Island PDS Sets in PCGS MS65, as well as a few individual issues, incurred Bid reductions in reaction to dealer discounting. Huguenot Halves in MS66 slid a bit after holding onto their previous \$420 Bid quite resiliently all through last year. A Grant With Star Half graded NGC MS65 traded blindly through CCE for \$4,800—a pop 44 coin. CAC approved and + graded Silver Commems certainly remain less vulnerable to the downward pressures prevailing within this segment, and Bidders traded confidently enough for these issues so as to preclude even a single decline amongst them from appearing in this report. Grant No Star Gold Dollars in MS61 took a rather hard hit by as much as \$100, pulling down their peers in PCGS MS62 as well.

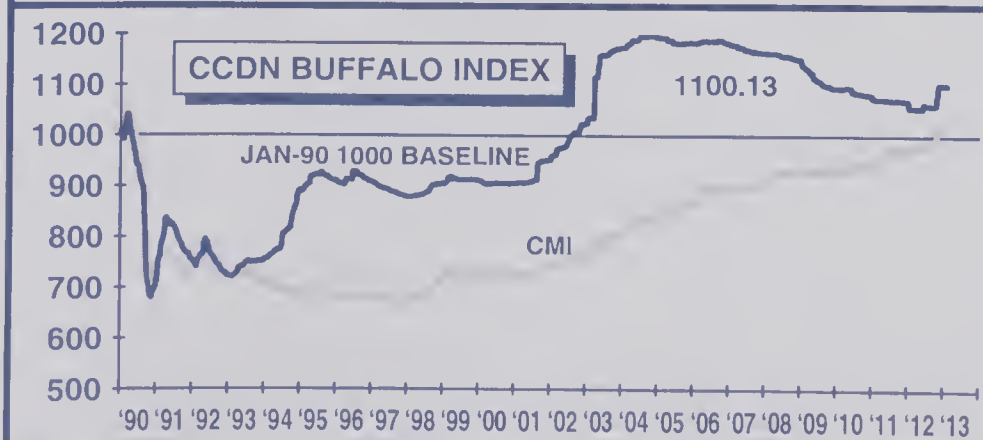

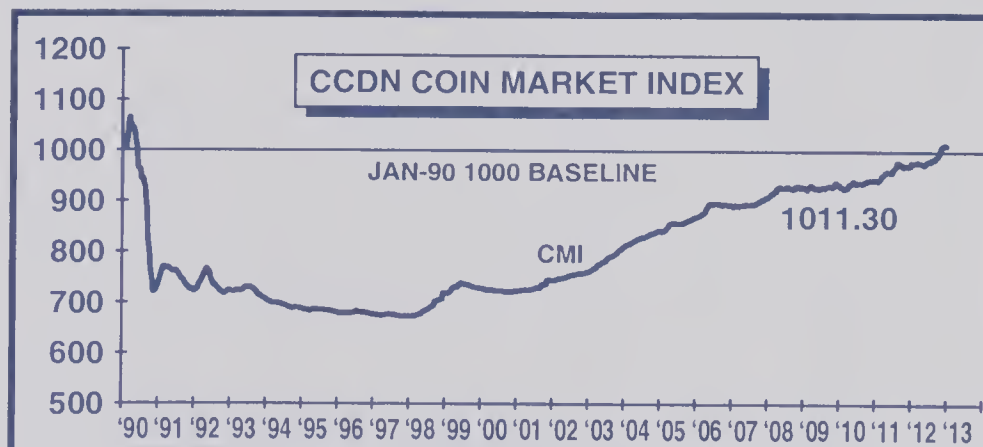

The increasing appeal seen lately for better-date Morgan Dollars in Choice and Gem appears to be spilling over to include several generic issues of the same grades. Cartwheels such as the 1880-S, 1884-O, 1898-O, and 1904-O in MS64, MS65, and MS66 are all gaining stronger support, with Bids for the most common dates in the

highest of these three grades rising this week. Those highly desirable 1890-CC Dollars in MS64 continued in their moderate ascent for a third straight week while 1892-CC issues in MS65 are up by another \$100. Several slightly better Peace Dollars jumped in PCGS+ holders.

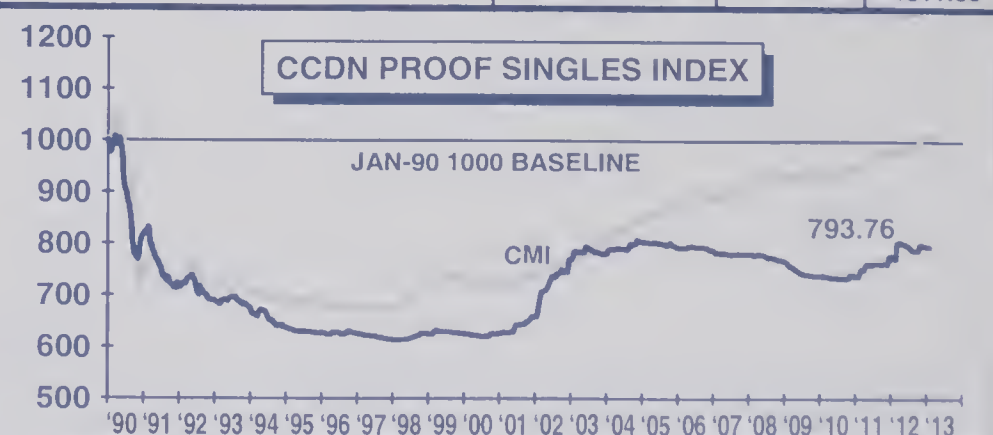

Mint State and Proof Type material remains relatively stable, as might be expected after the very strong rally this segment had last week, while most denominations with newly elevated Bids are sustaining themselves well and holding firmly in place. Liberty Seated Quarters with Motto in PCGS MS63, however, slipped down by \$20 and, while most Proof Type issues that also scored points just recently appear to be passing the test for current Bid support with equal vitality, Barber Halves in PR65 have given up all of their gains from last week and then some. A gorgeous example of the very scarce 1901-S Barber Quarter, one of only three graded MS66 by PCGS, will conclude its Bidding session Feb. 28 along with other fabulous Type material offered by Legend~Morphy during their Las Vegas Regency Auction. Bidders who can't find enough of those sharp-looking 1938-D Buffalo Nickels in PCGS MS67 holders are now accepting these comparably graded Buffs in NGC plastic.

At least one dealer is offering considerably more for early Mercury Dimes with Fully Split Bands that are + graded by PCGS. Increased interest for late-date Merics in MS66FB and MS67FB led to a continuation of last week's positive activity within this segment. On-line participants Bidding for exceptional quality examples remain aggressive in their pursuit of them. A 1940-D issue in NGC MS68FB★ unique at this grade with radiant rainbow toning, realized \$3,450 during a recent Teletrade auction. Walking Liberty Halves are adorned with numerous plus signs again, with several pre-war and wartime issues gaining moderately in numerous grades. Some MS67 examples continue to surge including 1934-S Halves in NGC plastic, 1936-S, and 1938-D issues in PCGS slabs, all of which gained another \$500. However, comparably graded NGC 1936-D Halves encountered weak reception during recent auction outings, resulting in a \$300 decline.

It should come as no surprise that lower sight-unseen Bids are seen for generic Gold Type material that are commensurate with an ever-decreasing Gold Spot that's now closer to the \$1,600 per ounce level than it has been since August 2012. However, the declines within this segment had little effect on Gem or better grade material other than \$20 Saints in MS65, which are back down to their beginning of the year Bid of an even \$2,000.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lower going rates. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report - an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Vol. XXVIII No. 8

February 22, 2013

Single copy price \$5.00

Mint State Copper Craze

Gold Falls Below \$1,600

There was more shakedown among Silver Commems this week, including some of the more important key-issues. Isabella Quarters in MS64 slipped down by 6%, and comparably graded Lafayette Dollars in NGC plastic are now situated just above the \$2,000 Bid level. Grant with Star Half Dollars in NGC MS66 took a \$300 spill, while Hawaiian Halves in that same grade pulled back by as much as \$400. Also trading lower were Hudson Halves in MS65, backing down by \$90, and Pan-Pac Halves in PCGS MS66 doing so by \$35. A few Gold Commems in various grades were also quite ravaged this week, with the persisting weakness within this segment taking its toll, especially on 1904 Lewis & Clark Dollars in PCGS MS65, 1916 McKinley issues in MS66 and MS67, and their 1917 issued peers in MS63 and MS64, as those of the latter grade descended by 9% to well below their previously long held \$800 Bid. It was another rather sprightly trading session for Morgan Dollars that resulted in no more than a few moderate declines for some better-date PCGS issues. Numerous gains are in place for several early-dates, though most are quite moderate. Bidders were focusing on rounding up more of those first issue year Philly Dollars with the various tail and breast feather varieties on their reverses, and the CC-Mint cartwheels from that same year in MS65 are Bidding over \$1,200 sight-unseen now. Little can be reported about Peace Dollars other than a \$20 gain for key-date 1928 issues in NGC MS65. This is an NGC pop 89 coin with only 2 examples graded 1 point finer. PCGS has graded 245 at the MS65 level with 12 in MS66.

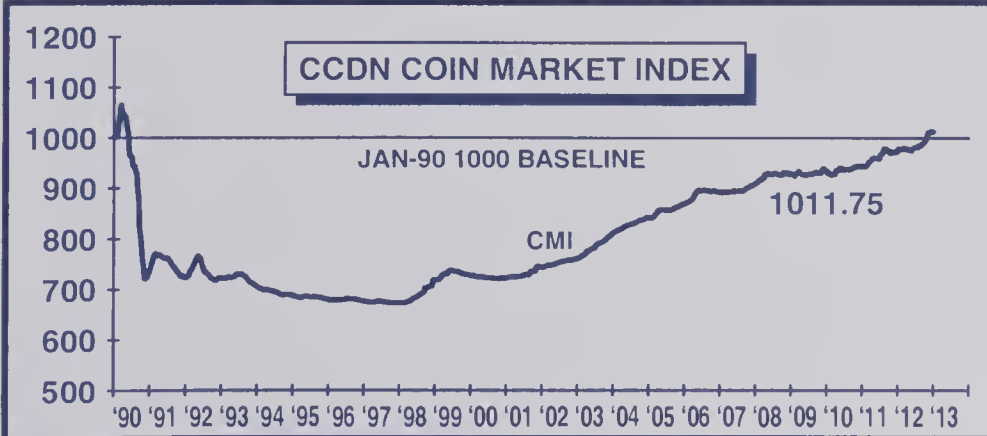

Early Large Cents, mostly in MS61 and MS62 and in virtually all color designations, are in what seems to be a "raging bull" market for these issues as market-makers are now offering as much as 85% over previous sight-unseen Bid for Classic Head specimens in Brown of the former grade in PCGS slabs. Less dramatic but no less significant increases appear among Coronet and Braided Hair Large Cents in these and higher Mint State grades with mostly Brown and Red-Brown needed. Mint State Silver Type is fairly quiet, however, a Liberty Seated Half Dollar with Motto graded PCGS MS66 just changed hands for \$5,500 sight-unseen through the Certified Coin Exchange and can be seen in this week's Market column. Among Proof Type, Bidders are

NGC Proof Type	Grade	Bid	Ask
Shield Nickel	PR65	\$500	\$515
Liberty Nickel	PR66	\$575	\$600
Lib Seated Dime Legend	PR66	\$1,375	\$1,400
Lib Seated Quarter Motto	PR67	\$3,600	\$3,700
Barber Quarter	PR66	\$1,950	\$2,000
Barber Half Dollar	PR66	\$3,300	\$3,400

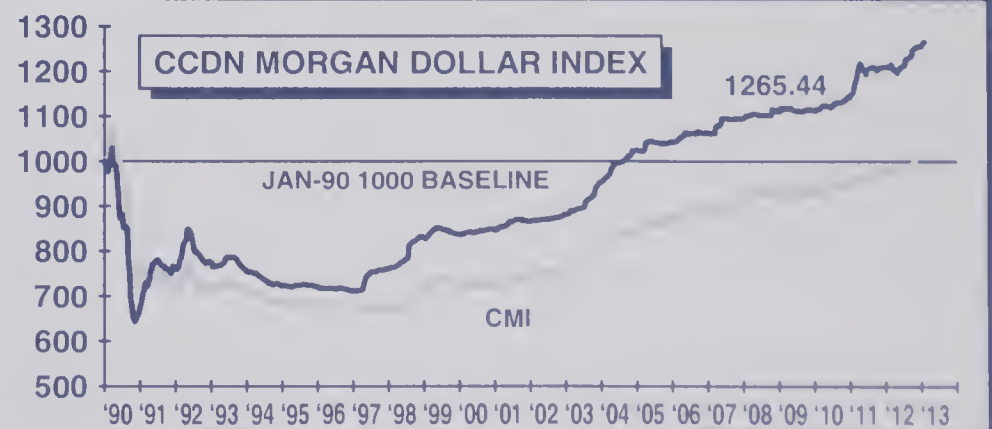

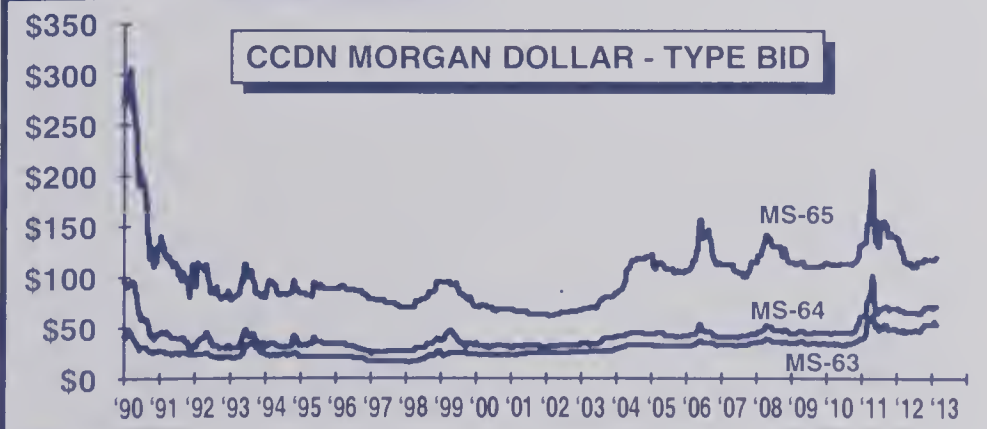

gravitating towards Liberty Seated material from Half Dimes to Half Dollars in various grades. No Motto variety Half Dollars of this Type in PR65 have increased by as much as 21% since October, and Barber Halves in PCGS PR66 took on a considerable increase this week as well for a 19% gain in just nine months. Market-makers in high grade NGC slabs have tightened their two-way sight-unseen Buy-Sell spreads on several specimens this week. A few examples are included in the chart herein and also can be seen in this week's Bid and Market columns.

A bit of weakness proved unsettling for a couple of semi-key Buffalo Nickels, including the 1925-S in NGC MS64 and the 1928-S in NGC MS67. More significant, however, is the \$4,500 shortfall for 1937-D 3-Legged Buffs in PCGS MS66, of which only six of these specimens have been graded at this level with none better. NGC has encapsulated 16 with a grade of MS66 and 2 in MS67. Also falling a bit short of maintaining current Bid were 1924-S Mercury Dimes in PCGS MS64FB, but those common late-date Mercs in PCGS MS67FB are in a second straight week of moderate ascent. There is a number of minor declines, mostly among common late-date Walking Liberty Halves in MS65, but their negative effect on this segment was far outweighed by the significant gains achieved once again by those increasingly sought-after pre-war issues in MS67. These include the 1934-S and 1935-S in NGC holders, as well as the 1936-S in PCGS plastic, each of which were Bid up by another \$500. Those all important short-set 1943-S Halves in MS66 are back up to a sight-unseen Bid of \$300, but still have another \$35 to recover all their losses from a year ago.

Many Bidders understandably seem nervous but are far from demonstrating any panic with respect to Gold Type, as Gold Spot slumped down to well below the \$1,600 per ounce level, closing today at \$1,578. This condition of a softening Gold Spot may truly serve to test the strength of scarcer material over that of generic. Gem and better examples, other than the most common of Type III \$1 and \$3 Indian Princesses in PCGS MS65, have yet to react to any appreciable downward pressure. Spot Silver is also suffering, now falling well below the \$30 benchmark to \$28.64 an ounce. Platinum is at \$1,620 after losing \$110 an ounce from this time last week.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the downward movement of Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks and other sources of *wholesale* transactions. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The following disclaimer is exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no insured guarantee or bond that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade specimen display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy:** During the thirty days prior to publication, we track the lowest asking price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We do not report Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit on a sight basis.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over ~~350,000~~^{400,000} coins with a market value over ~~\$1.5~~ billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins.

In fact, CAC has recently purchased over ~~\$250,000,000~~ worth of coins.

~~\$250,000,000~~^{\$275,000,000}

So the CAC sticker does not add value
- It is just an easy way to identify
coins that are solid for the grade.

And it gives you confidence in
the value of a coin.

*The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.*

CAC[®]

"Because Confidence is Priceless"

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

newsletter

Vol. XXVIII No. 9

March 1, 2013

Single copy price \$5.00

Busy Spring Market Anticipated

CC Dollars See Strength

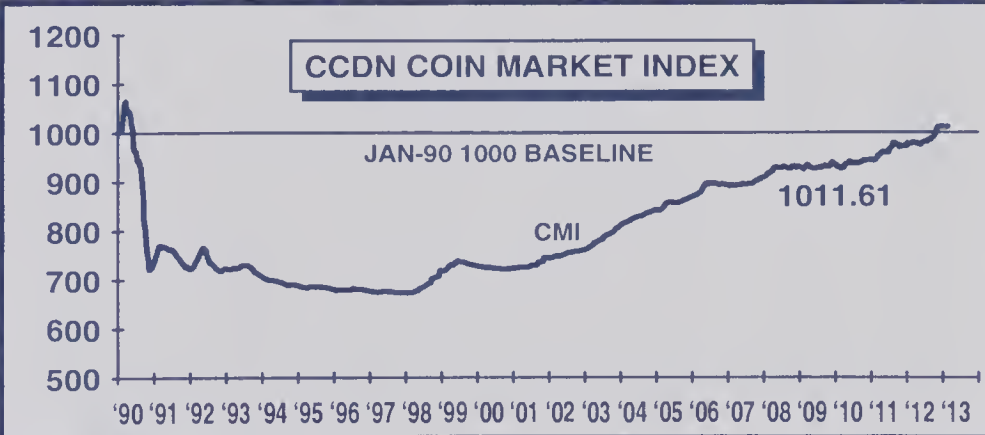

Many dealers are in Las Vegas trying their luck at the PCGS members only show running February 27 to March 2, at the Venetian/Palazzo with an auction by Legend-Morphy. Dealers and collectors alike will be attending the Las Vegas Numismatic Society Coin Show March 1-3 at the Palace Station Hotel and Casino. Current precious metal volatility may present a buying opportunity for some participants at the show. Gold Spot is now at \$1,578 with Silver closing at \$28.40. The yellow metal is down \$38 in the last two days, while the white metal is down 86 cents.

Sight-unseen trading results for Silver Commems were a bit more forgiving this week, allowing all but one issue to sustain itself at current Bid. This exception was the Monroe Doctrine Half in NGC MS65, which faltered by only \$10. Gold Commems were harder hit with declines, however. Auction prices realized didn't bode too well for 1903 McKinley Dollars, as those in NGC MS66 bore the biggest loss of \$100 while MS61 and MS62 grades each ended with a moderate \$5 pullback. Another NGC issue, the Pan-Pac Gold Dollar in MS64 is being discounted resulting in a minus sign. More than a handful of Gold Commems in ANACS and ICG slabs have weakened considerably since our last report.

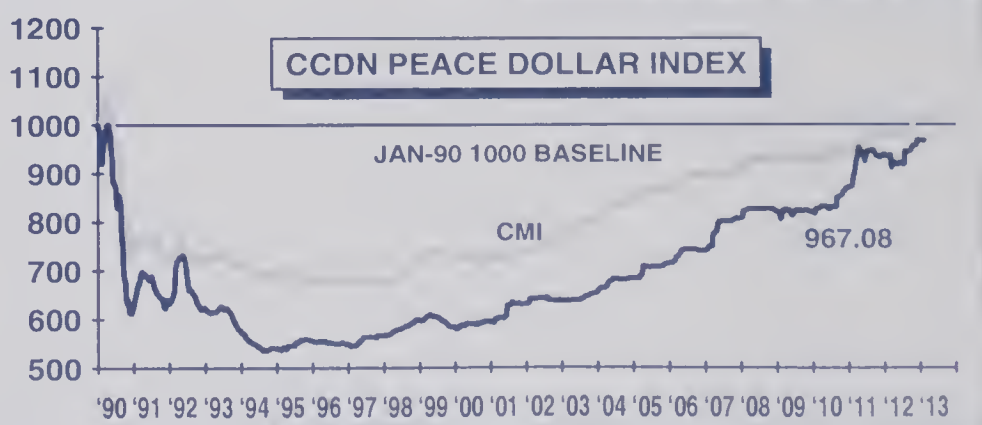

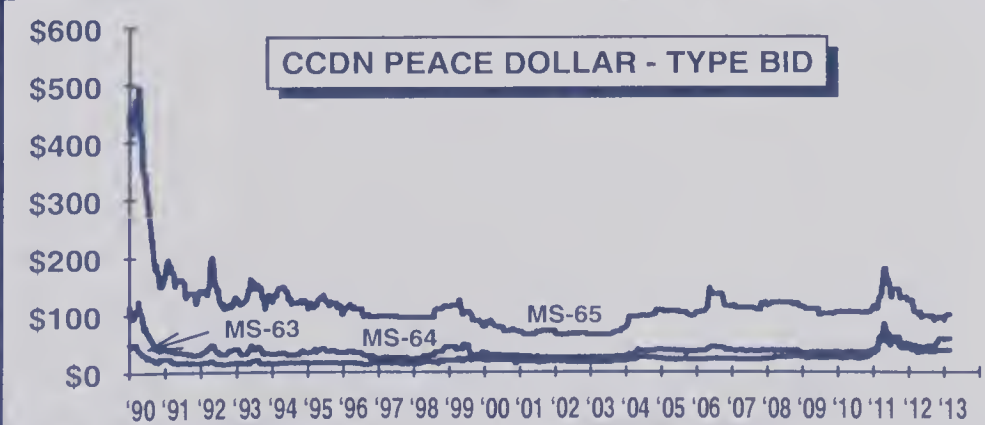

As generic Morgan Dollars in MS64 settled back by \$1, a few slightly better-date cartwheels in various other Mint State grades lured Bidders to offer appreciably higher amounts for them. Several varieties of first issue year Morgan Dollars have been maintaining much appeal, with 8TF and CC-Mint issues in MS61 coming up stronger this week along with 1878-S and 1883 Dollars in MS65. There are only eight 1902-O Dollars graded MS67 by PCGS with none finer, and Bidders are now offering an extra \$250 for one of these elusive condition-rarity coins. Carson City Morgan Dollars in their original GSA black plastic holders with NGC wraparound grade label as seen on Page D remain hot. At least one dealer wants to pay substantially more for the 66+ grade. Examples of the higher prices include \$5,000 for an 1880-CC vs. \$3,900 for non-plus; \$1,700 compared to \$1,530 for an 1881-CC; and \$1,750 for an 1882-CC against a Bid of \$1,450 for the non-plus version. In addition to the NGC wraparound graded Dollars, dealers are also targeting ungraded examples sealed in their original government plastic accompanied by the original box and certificate. Non CC mintmarked examples are also in demand with dealers actively paying at or near Bid. The far more plentiful but very desirable first issue

year Peace Dollars in PCGS MS66 are \$100 higher while 1927-S Dollars in PCGS MS64 gravitated lower by \$25.

A second straight week of moderate elevation persisted this week for Two Cent Pieces in MS65BN, but the really hot movers among the select few gainers this week were the early Liberty Seated Halves of the No Drapery variety in MS61 and MS62, with those of the latter grade in NGC plastic climbing by 25%. Heritage's CSNS auction in Schaumburg, IL next month will offer up some beautiful NGC graded Proof Type specimens, including a sensationally toned 1911 Barber Dime, graded PR69*, and a gorgeous 1914 example in PR68, which is the lowest mintage Proof issue of this series. Also featured are an 1847 Liberty Seated Quarter, graded PR66, an 1873 with Arrows variety issue of the same denomination in PR68 Cameo, and a not very often seen 1854 Liberty Seated Dollar in PR66, along with an 1866 Liberty Seated Dollar with Motto in PR67* UCam. Most late-date Buffalo Nickels, while appearing fairly dormant these past several weeks, have been maintaining solid support at current Bid ever since this segment's last widespread market run-up last November. The most recent issues are 75 years old this year and there's good collector value remaining among them as nine late-date Buffs, certified by either PCGS or NGC, are still Bidding for well under \$100 in MS65 and as many as six under that amount in MS66. Enthusiasts of first issue year Mercury Dimes will likely appreciate an opportunity to Bid for what is among the finest of 1916-S issues, graded PCGS MS67+ with CAC approval, during Heritage's upcoming Dallas auction near the end of this month. Although this specimen does not possess Fully Split Bands, its lovely color and originality make up for its soft strike. A minor gain for 1934-S Walking Liberty Halves in PCGS MS61 and a rebound of equal amount for 1937 issues in NGC MS66 were somewhat offset by a slight drop in Bid for 1939-S Halves in PCGS MS64. Nonetheless, those common late-date Walkers in MS65 are still trading narrowly between \$89 and \$90, settling again at the higher Bid, and may continue to do so until a major market dynamic decisively forces these Walkers one direction or another. Minus signs outnumber the plus signs by a ratio of about three to one within the Gold Type segment, however, trading results indicate increased interest for some of the scarcer Gold Type material such as \$3 Indian Princesses in MS63 and Type 1 \$20 Libs in MS61, with peers of the latter issues in NGC MS63 advancing by \$300.

MERCURY DIMES

CCDn does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

WALKING LIBERTY HALVES

CCDn does not represent that it is possible to purchase selected coins at these bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

"Because Confidence is Priceless"

Market Awaits Auction Action

Higher Bids Target Gold Commems

Grant No Star Silver Commemorative Halves in MS67 showed their fortitude again, as they did last December, moving higher by another \$100 while their peers in PCGS MS65 regained the \$400 Bid level. A good amount of recovery is occurring among Gold Commems, however, but the buoyancy is somewhat counteracted by discounted trades that doused down a few issues. Top gainers within this series were 1916 McKinley Dollars in NGC MS65 and MS66, as those of the latter grade jumped up to a Bid of \$1,200 for an 11% rise, while \$2½ Sesquicentennials in PCGS MS64 and MS65 increased by \$75 and \$145, respectively.

Positive movement for Morgan Dollars was mostly confined to the lower Mint State grades with both generic and select better-date material advancing. First issue year 8TF cartwheels in MS61 have gained 15% this year, while same year CC-Mint Dollars in comparable grade are up at the same time by as much as 9%. Some mild slippage within the MS64 and MS65 columns involved the 1884-CC in both grades and the 1885-CC in the latter. However, those 1894 Dollars are back up to Bidding \$4,000 sight-unseen for any example in MS63 plastic. These cartwheels have a combined pop of 544 with 416 finer and, while they may not be the scarcest of Dollars, reportedly totaling just a bit more than 2,100 examples in all Mint State grades, they are seldom offered due to their immense desirability and elusiveness. A handful of moderate gains were recorded within this week's Type segment that included Three Cent Silver Pieces, Type 3 in NGC MS67. Any Liberty Head Nickel enthusiast would appreciate owning a specimen of the lowest mintage Proof issue of this series, such as the pleasingly mellow toned 1907 in PCGS PR67Cam, scheduled to conclude its Bidding session in two weeks along with a slew of other high quality Type specimens offered through Heritage. No Drapery Liberty Seated Quarters in MS61 and MS62 are still being pursued, particularly those of the latter grade which have gained at least 8% so far this year. Money was left on the table at auction recently as an 1883 Shield Nickel graded NGC PR65 sold for \$460 with a blind buyer at \$500 and an 1866 Seated Dollar in PCGS PR64 sold for \$4,600 while a sight-unseen buyer is still waiving \$4,860 for any PR64 example.

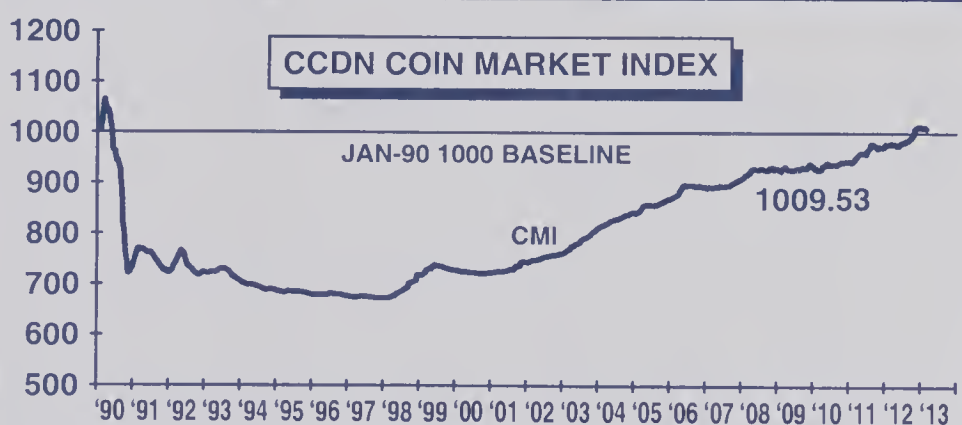

Heritage			
1833	Classic Half Cent	NGC	PR65BN
1914-D	Lincoln Cent, CAC	PCGS	MS64RD+
1863	Three Cent Silver, Gold CAC	PCGS	MS65
1867	Shield Nickel, Rays	PCGS	MS65
1873	Shield Nickel, Cl. 3	PCGS	MS65
1831	Capped Bust Dime, Cam	NGC	PR65
1796	Draped Bust Dime	NGC	MS63
1903-S	Barber Dime, CAC	NGC	MS66

1861	\$10 Liberty, Cam, CAC	PCGS	PR64
1907	\$20 High Relief, W.R.	NGC	MS66

If there's anything exciting to report about Buffalo Nickels, it's that the Stack's Bowers Baltimore auction is featuring a gorgeously pristine 1913-S Type 2 Buff, graded PCGS MS67, one of only 10 graded as such by both services with none finer. Another Buff beauty available through this auction is a rainbow toned 1920-S, graded NGC MS65★. On-line auction activity resulted in a couple of Mercury Dimes in NGC plastic being hard hit with reductions. 1935-D Merces in MS66 plunged 25%, while an \$8 slide for 1943-S Winged Liberties in MS66FB constituted a 16% decline for these popular wartime issues. An exemplary presentation of Gem quality early Walkers are due at the auction block during Heritage's Dallas auction event. Among them are a peripherally toned 1916-D in NGC MS67 and a comparably graded 1917-S (Rev.). A 1920-D grading PCGS MS65 with CAC approval and a 1921-S in MS62 are also up for grabs.

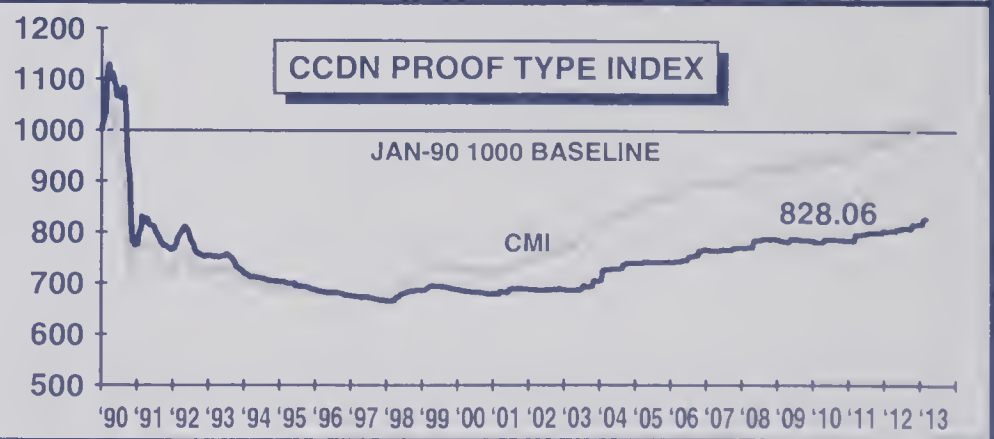

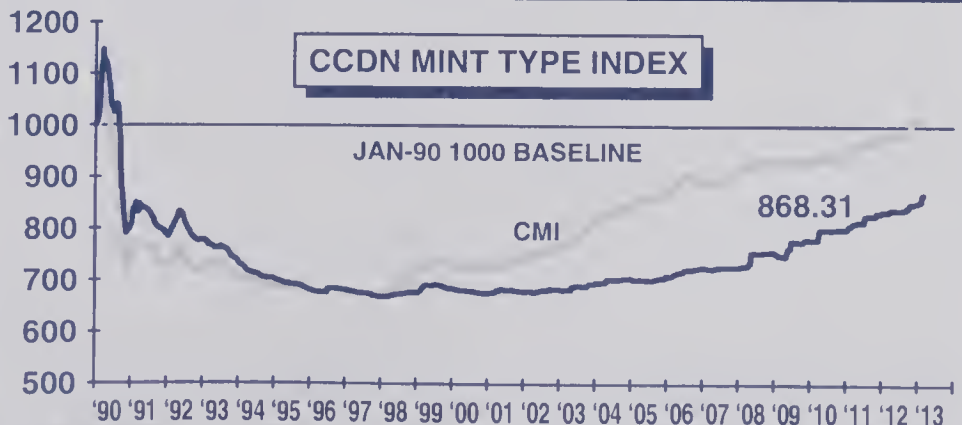

Three 1909-O \$5 Indians, all graded AU58 by PCGS with one bearing the green bean, as well as a CAC approved 1929 issue of the same series in PCGS MS63, are among the lots offered up along with a treasure trove of Mint State and Proof Gold Type material during the upcoming sale in Dallas. A number of Gold Type issues in MS61 through MS63 are demonstrating some sensitivity to the stagnation within the Gold Spot market, but Bidders appear to be keeping cool heads with respect to scarcer material even though condition-scarcity \$20 Saints in MS67 pulled back by \$50. A single Ask was executed this week through CCE resulting in a roll of spot free PCGS MS62 \$20 Libs changing hands for \$34,800 sight-unseen.

Most major dealers will be heading to Maryland to attend the Baltimore Expo and auction by Stack's Bowers beginning March 13. From here, many market participants will Bid in the March 21-24 Heritage sale taking place at their Dallas headquarters. We have listed a few of the many highlights from each auction herein.

Stack's Bowers

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the property of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

NGC Bulk Submissions Have Never Been Easier

Scott Heller,
Director of Operations
Throughout his 19 years at NGC, Scott has managed and overseen thousands of bulk and prescreen orders. His in-depth knowledge of the numismatic community and the certification process is invaluable to the growth of your business.

Get personal consultations from industry expert Scott Heller.

For years, NGC has led the industry with consistent and accurate grading, excellent customer service and fast turnaround times — for an unbeatable value. We also offer a direct liaison for professional dealers interested in bulk submission. Scott Heller is uniquely qualified to personally assist you with bulk submissions, and will even travel to your location for on-site consultations.

**To discuss your options, contact Scott directly at
sheller@NGCcoin.com or 1-800-NGC-COIN (642-2646).**

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflike.
Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over ~~350,000~~^{400,000} coins with a market value over ~~\$1.5~~ billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

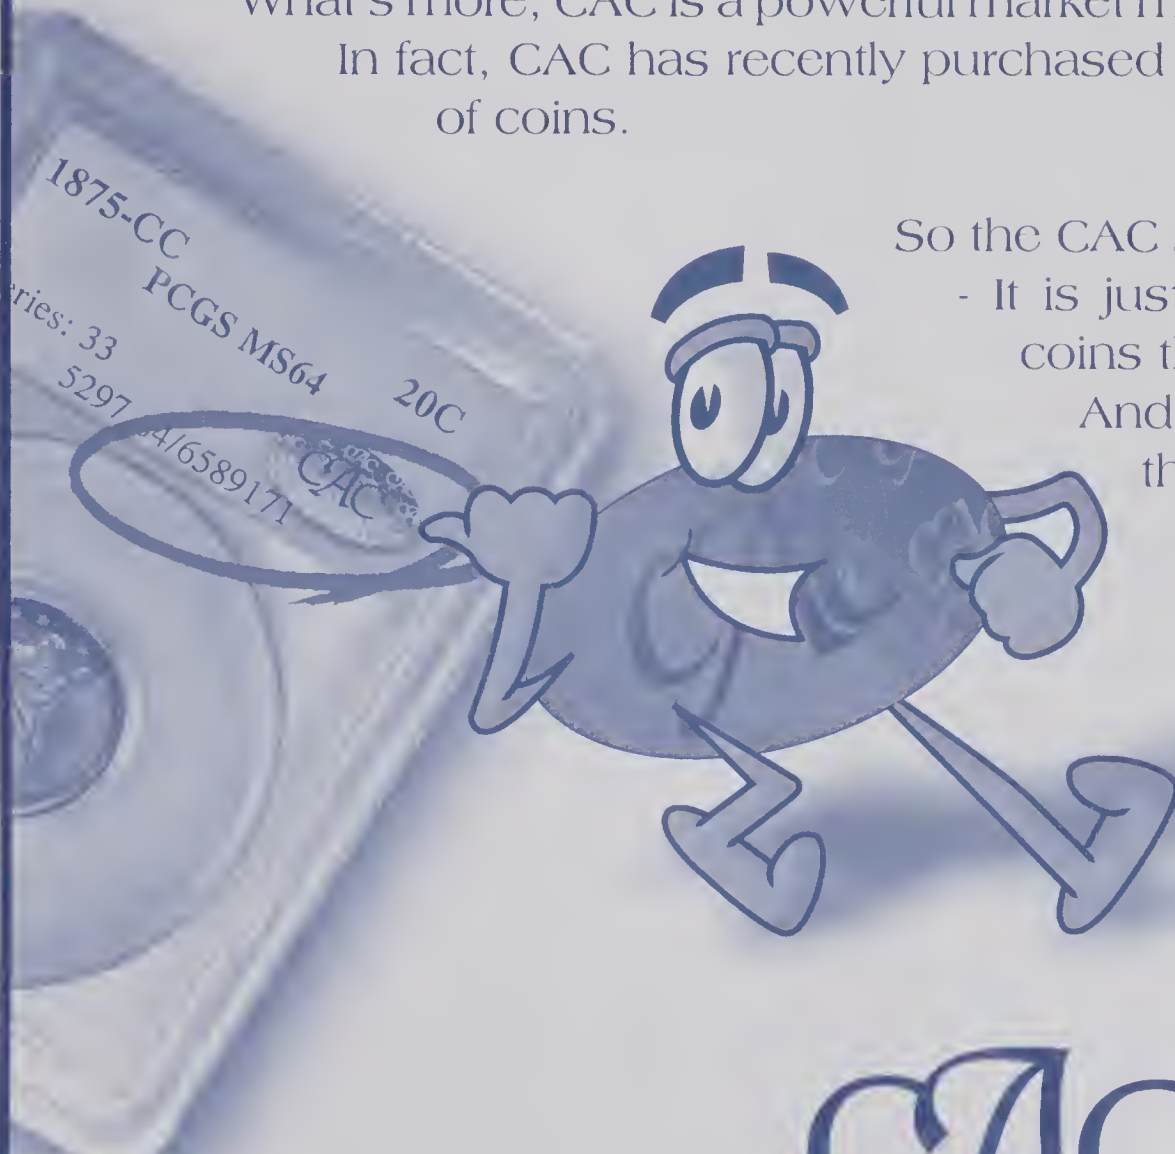

What's more, CAC is a powerful market maker for its stickered coins.

In fact, CAC has recently purchased over ~~\$250,000,000~~ worth of coins.

~~\$250,000,000~~^{\$275,000,000}

So the CAC sticker does not add value
- It is just an easy way to identify
coins that are solid for the grade.
And it gives you confidence in
the value of a coin.

*The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.*

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

CERTIFIED COIN DEALER

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

newsletter

Vol. XXVIII No. 11

March 15, 2013

Single copy price \$5.00

Sight-Unseen Market Strong

Walkers & Dollars Move Higher

The sight-unseen market for certified generic material through the better dates remains strong. Demand for rare coins is increasing across-the-board and is continuing to push Bids higher. This activity is somewhat unusual as most major dealers are in Maryland attending the Baltimore Expo and participating in the Stack's Bowers auction. Dealers will often remove or reduce their exposure on the dealer-to-dealer trading networks as to not be financially overextended should a large deal become available at the show. This week nearly \$500K in certified coins changed hands sight-unseen through the wholesale trading networks.

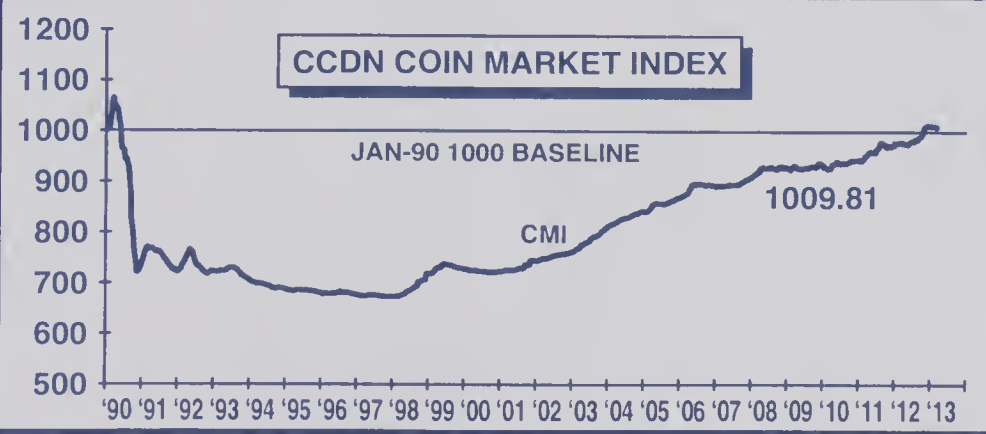

Owning a nice Grant with Star Half would be the pride and joy of any Classic Silver Commem collector and these important key issues of this series are in moderate ascent in MS63 through MS65, with those of the latter grade gaining another \$100 just as they did early last month. In MS65, these avidly sought-after Commcns have a combined pop of just 379 with only 112 finer. Trading activity was supportive of New Rochelle Halves in MS65 but ended with downward pressure placed on comparably graded Stone Mountain issues. All Gold Commems were spared from any disfavor and maintained current Bid support. The quantity and the moderation of decliners among Morgan Dollars was of almost negligent consequence compared to the larger number of gainers within this segment as Bids for both generic and better-date cartwheels in a variety of Mint State grades continue to strengthen. There are only three 1879-CC Morgan Dollars graded MS66 by either service, and Bidders are now offering a hefty \$15,000 over previous Bid for any of these scarce cartwheels once approved by CAC. The huge gainers among Peace Dollars this week were 1935 issues in PCGS MS66 and, especially, in PCGS MS66+, with a gain of 74% since our last report covering + and CAC material. At least one dealer is blindly offering \$10,000 for a PCGS MS67 example once one is made. NGC has encapsulated 3 at this grade level.

As voracious the demand has been for Classic Head Large Cents in MS64 through MS66 with Brown and Red/Brown color designation, those with CAC approval are now being requested on a sight-unseen basis with offers averaging 25% higher since last month, and No Drapery Liberty Seated Dimes in NGC MS66 surged by \$625 this week. Significantly stronger offers, of as much as \$5,000, are also in place since a month ago for Reduced Size Capped Bust Quarters in PCGS MS65+ and MS66+, although both varieties of these early Quarters in PCGS grades of Gem or better are anxiously needed by market-makers willing to pay considerably higher amounts for

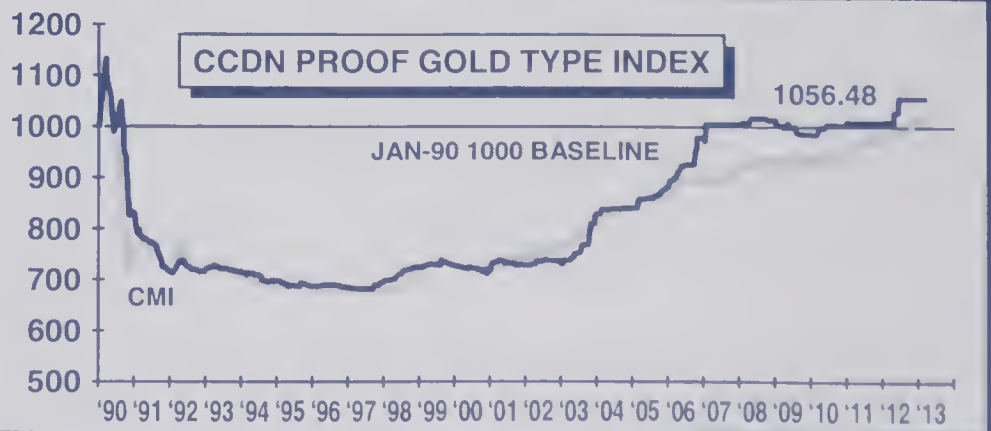

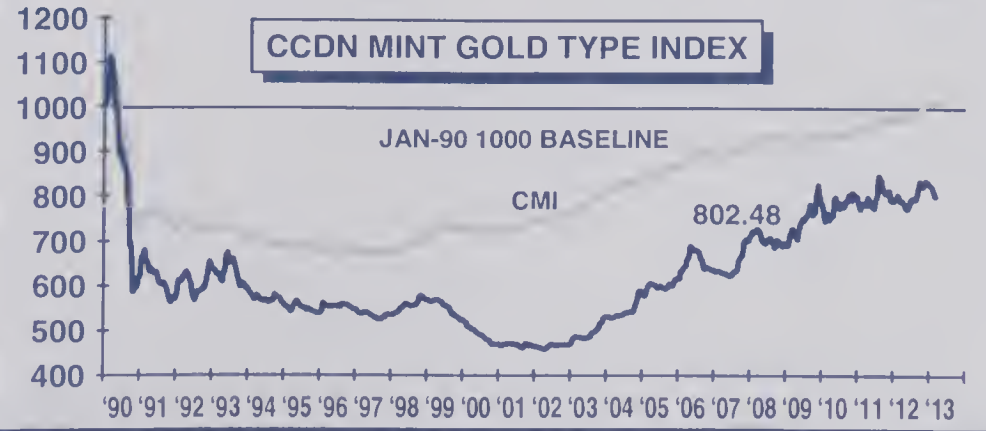

them, as indicated by the \$10,000 increase posted for any of the merc handful of Large Size specimens in MS67. The lure of quick money through auction can often pose opportunity costs, as this week's trading results concluded with some Type material in NGC plastic, particularly 1853-1855 Liberty Seated Dimes with Arrows in MS64, Barber Dimes in PR67, and Liberty Seated Quarters with Motto in PR63, all selling out from under the gavel for a good amount below their respective sight-unseen Bids.

Among the many rarities due for Bidding during the upcoming CSNS Heritage auction in Schaumburg next month is an always desired 1918/7-D Buffalo Nickel, graded PCGS MS62+ CAC. While not the finest known example, it is nevertheless unique for the grade with only 57 specimens graded numerically higher by both services and one of only 10 Mint State examples with CAC approval. 1936 and 1937-D Buffs in NGC MS67 each gained \$25. Market-makers are now offering at least a \$400 premium for any CAC approved 1923-S Mercury Dime in MS64FB. All the Mercs held steady except for 1929 issues in PCGS MS66, which slipped by \$5. A bright-white example of the iconic 1942/1-D issue in PCGS MS65FB with CAC approval is also expected to make a big hit with Bidders in Schaumburg, as Heritage will also be auctioning off this one of only 27 examples graded as such with 24 finer. There's a burning desire for 1942-S Mercs graded PCGS MS65+, as these Dimes have had their sight-unseen Bid rise by more than double in less than two months. Revitalizing steam built up within the Walking Liberty Halves segment enough so to result in a proliferation of plus signs, mostly denoted for early-date issues with CAC approval and late-date Walkers in MS63 through MS65. Bidders are upping the ante for 1933-S Walkers in NGC MS67 and for comparably graded 1940-S and 1945-S issues in PCGS plastic, pushing all three of these much desired Halves up by another \$500 and allowing for each of them to gain \$1,000 in just a ten week period.

Euphoria over the stock market's recent ability to set an almost daily all-time high these past two weeks has undoubtedly been outweighing concerns for financial hedging, and the uncertainties over the short-term direction of the Gold Spot market persist to the extent that even CAC approved and + graded generic Gold Type is being challenged in terms of acquiring stronger interest from Bidders. Scarcer issues such as \$3 Indian Princesses and Type 1 \$20 Libs that are + graded have been among the exceptions, however.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of nationally reported sight-unseen Bids, Asks, Trades, prior levels and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of a high Bid. Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary according to the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Maryland Shows Strength Wealth Of Knowledge In Market Columns

Most market participants had a very successful Baltimore show with one dealer after another cheering about how well they did. High-end material was especially hot, and those slabs with CAC stickers certainly had an edge. Demand is increasing for multiple areas of the rare coin market, and meeting customers' desires has become more of a challenge since the beginning of the year. Rare coins are definitely on the upswing, and the market is very strong. Stack's Bowers tallied up over \$10,400,000 in their Maryland auction, with the top lot being \$470K for a 1792 Half Disme graded PCGS MS64. See several of the many highlights herein. Sight-unseen trading is fairly robust with over \$260,000 changing hands through the dealer-to-dealer exchanges in the last week. One dealer purchased a Liberty Seated Dollar, With Motto, graded PCGS PR64 for \$4,860 sight-unseen.

This week's trading activity effected only two PCGS graded Silver Commems, allowing for Connecticut Halves in MS64 to recover some of their rather marginal losses from last week, while Stone Mountain issues in MS65 have now settled lower by \$10 over a two week period. A pleasingly toned Hawaiian Half in PCGS MS66 sold at auction by Stack's Bowers last week in Baltimore for a hefty \$25,850. A combined total of only 157 examples of this highly regarded Silver Commem have been graded at this level by either service while only 21 specimens graded higher, of which seven did so numerically at MS67. Movement among Morgan Dollars is moderately on the upside again, though not as widespread as last week. There was some cooling down within the Type segment but, perhaps, this is what should be expected after five straight weeks of appreciably gainful activity that drove Bids up for a variety of material, mostly in Mint State. A small number of Proof Type issues fell marginally short of maintaining current Bid, however. Major upcoming auctions in Vegas and in Schaumburg will be as replete as can be expected with a most comprehensive representation of every Type and denomination comprising our nation's coinage, with specimens of quality suitable to impress the most discerning numismatic connoisseur.

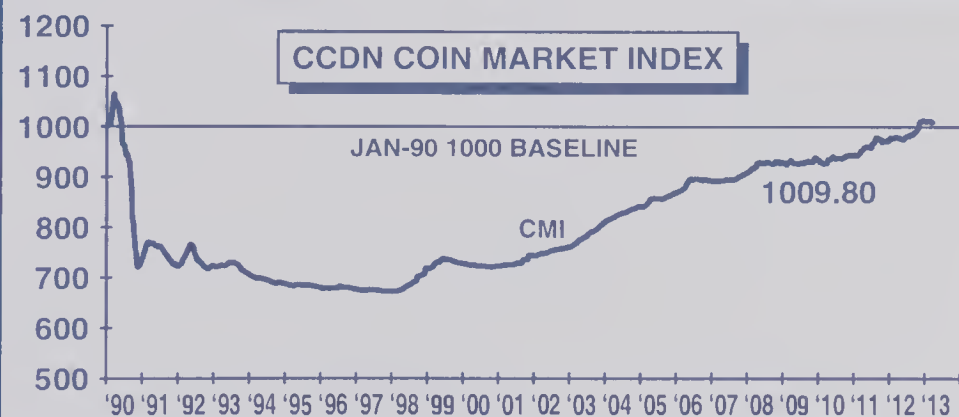

Perhaps it's due to this year's 100th anniversary of the Buffalo Nickel's introduction that interest in this series appears to be picking up, causing a few first issue year Buffs in Gem and better to move higher. PCGS and NGC reported grading a total of only

255 specimens of the famed 1916 DDO Buffalo Nickel across all grades and the former service has certified only one of these highly elusive and intriguing Nickels at the MS63 level while grading only three higher in MS64. This particular specimen in PCGS MS63 is both unique for its grade and CAC approved, and available for Bidding through Legend~Morphy's Regency Auction at the Bellagio in Las Vegas next month. This auction will also feature a magnificent selection of some of the finest known early and late-date Mercury Dimes of their kind. A 1919-D in PCGS MS66FB a 1920-D in PCGS MS67FB+ with CAC approval, and a very hard to find 1945 issue in PCGS MS67FB are just some of the other rarities included in this offering. Late-date generic Mercs in PCGS MS67FB gained a bit of strength this week.

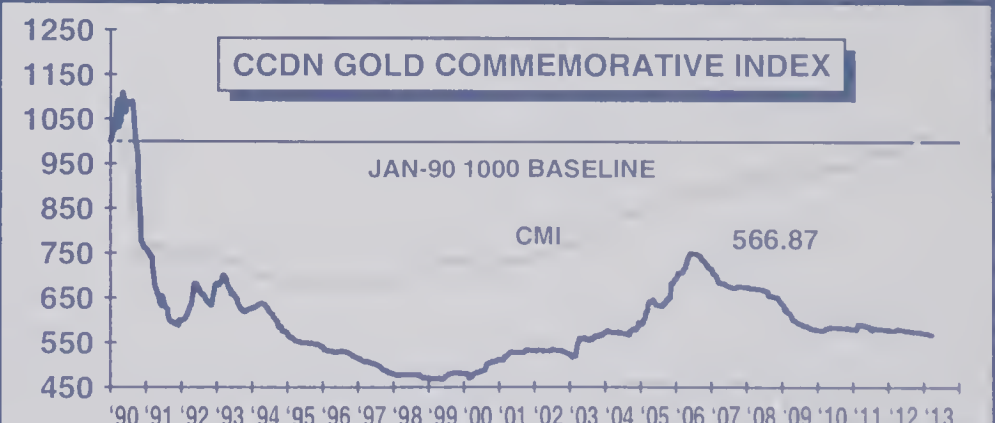

One of only three 1935-S Walking Liberty Halves graded MS67 by PCGS, tied for finest known, already has anxious takers at well over three times its sight-unseen Bid, and this CAC approved specimen may well add considerably to its final price before concluding its auction session with Heritage this week in Dallas. The market proved a bit slippery again, however, for several late-date Walkers in NGC MS65, but Bidders are increasing their offers by as much as \$1,000 for any of only seven 1942-S Halves graded MS67 by this service, constituting a 25% Bid hike this week for these issues of which none have been graded higher by either NGC or PCGS. This week's fiscal tumultuousness in Europe as it related to the banking crisis in Cyprus bore little, if any, effects on the Gold Spot market, at least domestically. Bidders remain cautious, but appear to be liquid enough to take advantage of any opportuni-

ties that may arise with respect to both generic and scarcer Gold Type material. In any event, this segment saw Bids slipping moderately lower, mostly amongst issues in less than Choice Mint State grade. An 1889 \$3 Gold Princess grading PCGS MS67 sold at auction in Baltimore for \$38,190 as seen in this week's Market column. The consigner, if a dealer, likely received only \$32,500 when a sight-unseen buyer is flashing \$45K for any \$3 Gold piece in this condition.

The Certified Coin Dealer Newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through an analysis of nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lower end of the market. Trades which are near or below current Bid. CCDN uses every means available to ensure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary according to the needs of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading network. See *Index* for more information and other sources of *wholesale* transactions. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no *in* or *out* guarantee that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. Listing Policy: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stale Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" Trade appearing last month; "ot" Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Nevada Auctions Next Up Gold Type Softens

Sight-unseen activity is pretty strong currently with nearly \$300K in trading taking place in the last week over the electronic dealer-to-dealer networks. A few better Type examples exchanged hands blindly among the mostly generic material. These include two NGC Shield Nickels with No Rays in PR65 and PR66 trading for \$491 and \$655, respectively. In addition, a Barber Half graded NGC PR66 sold for \$3,300 and a Seated Dollar With Motto graded PCGS PR64 traded for \$4,860. Perhaps the short lull in the major show schedule accounts for the uptick in sight-unseen action. Dealers are fresh off the Dallas auction by Heritage which pulled in \$7.6 million March 21, 22 and 24. Legend-Morphy will host an auction April 11 in conjunction with the PCGS members only show running from April 10-13 at the Bellagio in Las Vegas. We have listed several highlights herein. April 12-13 brings another Nevada auction from Holabird-Kagin Americana at the Atlantis Hotel and Casino in Reno. California Fractional Gold will be the main attraction here. Gold Spot is a bit soft once again, closing below \$1,600 an ounce after appearing to be on a comeback last week. Silver, with a Spot of \$28.29, hasn't been this low since mid-August of 2012. On the other hand, the S&P 500 closed at a new record high of 1,569.

Sustenance problems along with a great amount of discount trading pressure took their toll on Monroe Halves in NGC MS65, causing these issues to decline 15% while reducing them to Bid at parity with their comparably graded PCGS peers. Long Island Halves in NGC MS66 encountered mild weakness while, on the positive side, those 1951 Washington-Carver PDS Sets in PCGS MS67 increased to an even sight-unseen Bid of \$4,000. Both 1903 Jefferson and McKinley Gold Dollars in NGC MS66 got a bit battered, and several other Gold issues were again unable to maintain current Bid, including the 1905 Lewis & Clark \$1 in NGC MS65. 1917 McKinley Dollars in either slab of the same grade drifted further down as well by at least \$50, while \$2½ Sesquicentennials in MS63 and MS64 rebounded somewhat. Moderately higher sight-unseen offers are in place for PCGS graded 1879-CC Morgan Dollars in MS65, as well as for their Capped Die variety peers in MS64. Other changes in Bid were marginally on both the upside and downside, and this segment remained relatively calm throughout the week. Aside from an iconic 1893-S Dollar in NGC MS65 becoming available to the highest Bidder at Heritage's upcoming auction in Schaumburg, IL, a highly prized and comparably graded 1896-O cartwheel will be up for grabs at this major event as well. This particular specimen is one of only three graded MS65 by NGC, while PCGS has graded only one at the MS65 level and just two higher, both in MS66.

The Schaumburg auction next month is also scheduled to feature several significant early Copper issues graded by PCGS that include two Liberty Cap Half Cents, a first year issue 1793 in MS62BN and a 1794 in MS63BN with CAC approval. A specimen of the Lettered Edge variety 1795 Large Cent in PCGS MS65BN, also with CAC approval, will accompany these lots, as will a very scarce 1858/7 Flying Eagle Cent in PCGS MS65. Even modern Coppers are making a hit these days. This past weekend, a Teletrade Bidder paid \$7,130 for a 1954 Lincoln Cent graded MS67RD by NGC, which has a combined pop of 12 with none finer. Barber Halves in PR65 and PCGS PR66 were among the few moderate gainers, but Bid for 1853 1855 Liberty Seated Dimes with Arrows in NGC PR67 was rather severely reduced due to another bout of auction weakness for these quite rare issues. NGC certified only 3 specimens at this grade level, all Cameos dated 1855 and one with a Star accolade.

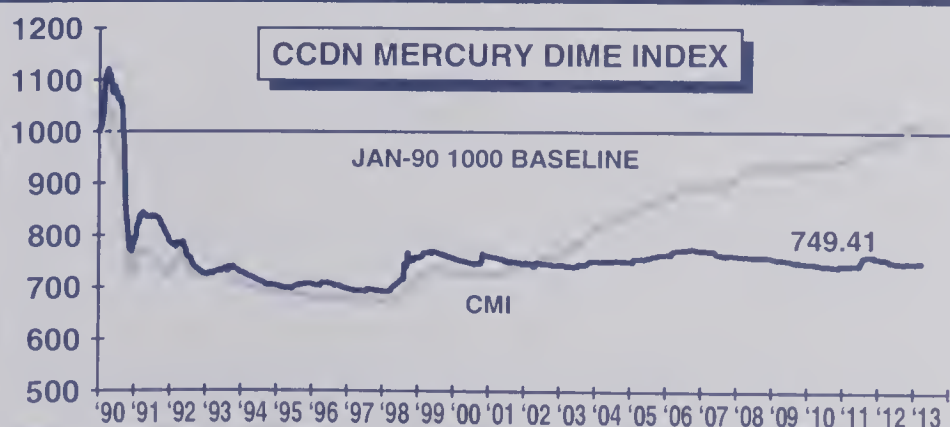

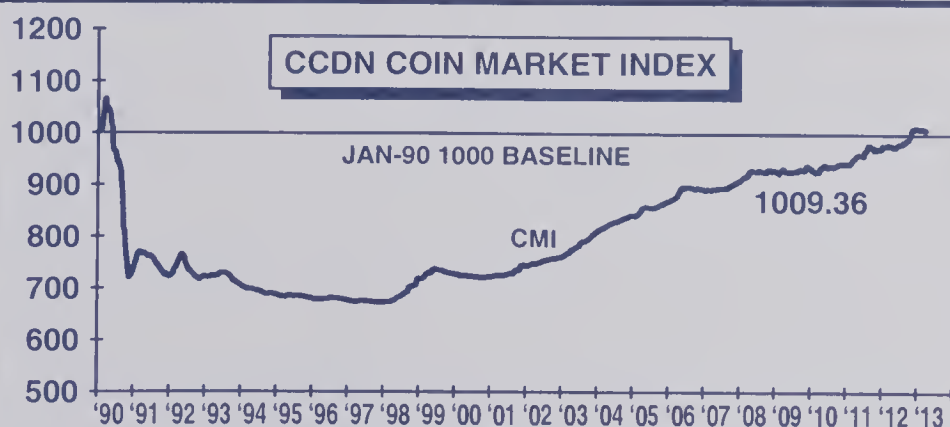

The auction circuit continues to prove a bit distressing for 1918-S Buffalo Nickels in NGC MS65 and, since this time last year, these early semi-key Buffs have declined by \$850. Every Mercury Dime enthusiast owes it to him or herself to at least view the on-line images of some of the most original-looking, colorfully toned key-date and condition-rarity Merces ever seen and offered at public auction as those being presented by Legend~Morphy in its April 11 event. Contending for Bids along with a rare 1919-D in PCGS MS66FB is an elusive 1926-D in PCGS MS67FB with CAC approval. Bid for key-date 1919-D Walking Liberty Halves in NGC MS64 settled \$150 lower, resulting in a decline of 7% for these issues since July of last year.

These have a combined pop of just 155 examples in this grade with only 18 finer. Trading activity was concentrated amongst the more common late-date issues, reflecting increased need for mostly NGC graded material in MS65, and the affinity for those 1942-S Walkers in NGC MS67 persisted to drive these Walkers higher by another \$500 for a gain of nearly 38% in just two weeks.

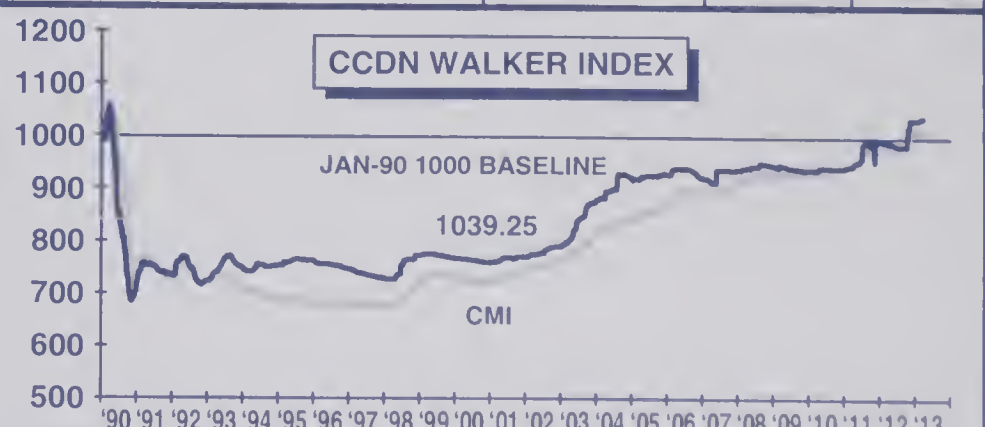

Gold Spot has been barely able to sustain itself at above the \$1,600 per ounce level, but there is much speculation that some "smart money" will pour into this market soon as a result of anticipated tax refunds and corporate earnings remaining strong despite reports of increased financial strife in Europe. In the meantime, Bids for several Gold Type issues continue to descend, as \$5 Indians in MS63 and MS64 lacked current Bid support and Motto variety \$10 Libs in MS65-MS66 became especially mired in disfavor.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of a high Bid. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

6 Months \$83.00 1 Year \$148.00 2 Years \$246.00

Name _____

Address _____

City _____

State _____

Zip _____

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

WALKING LIBERTY HALVES

CCDN does not represent that it is possible to purchase selected coins at these bid levels. Current or sight-seen trades can be expected to occur at substantially higher levels in many cases.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

\$1.8
billion

CAC has evaluated over ~~350,000~~^{400,000} coins with a market value over \$1.5 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins.

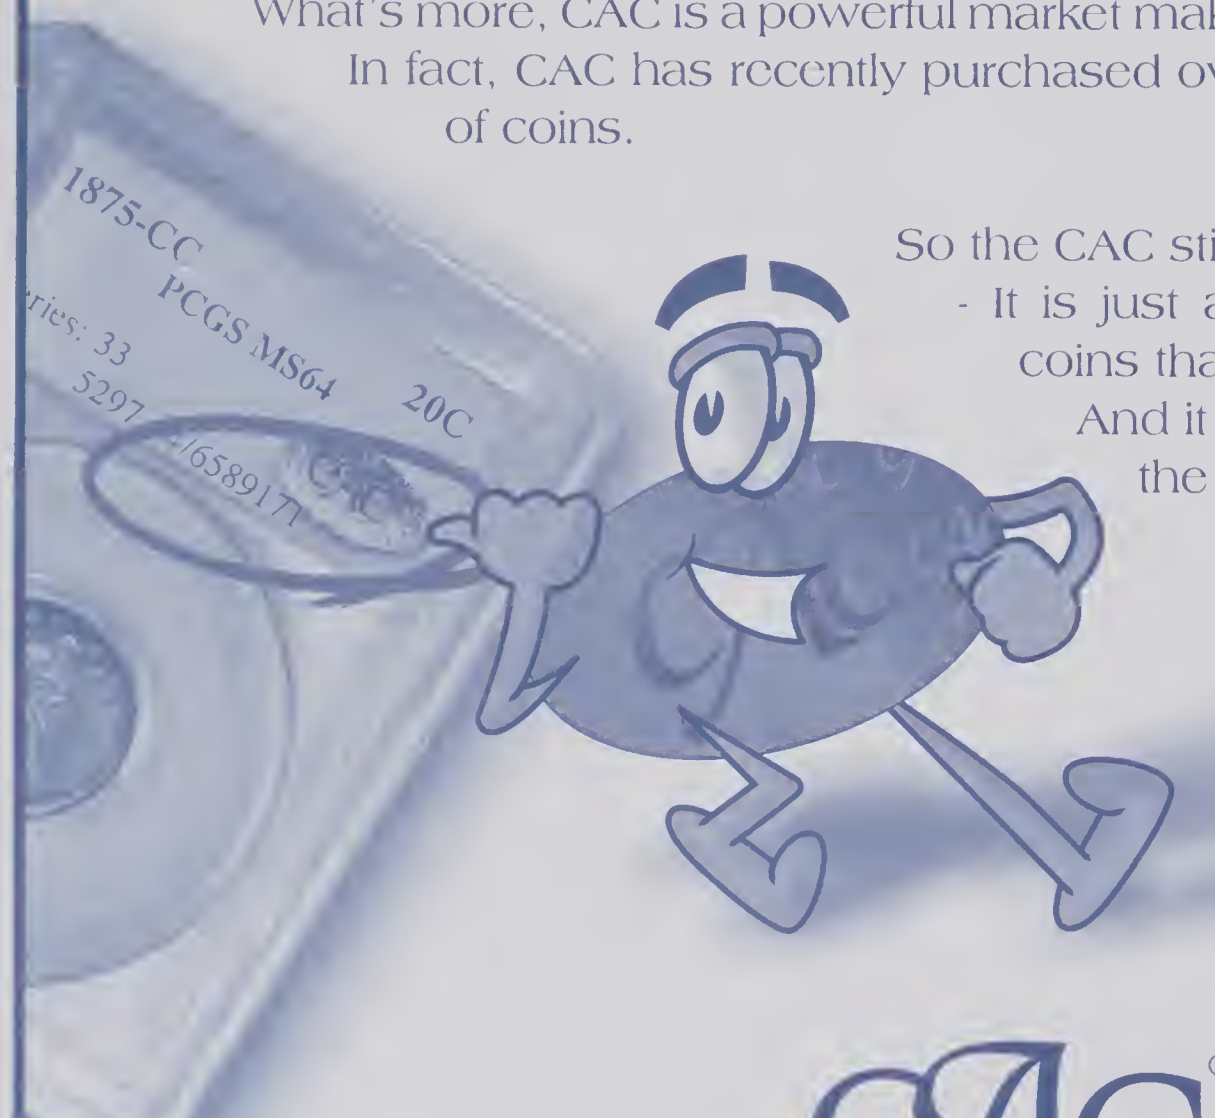

In fact, CAC has recently purchased over ~~\$250,000,000~~ worth of coins.

\$275,000,000

So the CAC sticker does not add value
- It is just an easy way to identify
coins that are solid for the grade.

And it gives you confidence in
the value of a coin.

*The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.*

Silver Dollars Back In The Game

Central States On Deck

An outstandingly gorgeous, peripherally toned 1936 Boone Commemorative Half, deriving from the Bruce Scher collection and graded PCGS MS68 with CAC approval, is available to the highest Bidder participating in the upcoming CSNS Heritage Signature Auction in Chicago, April 24-28. We have listed several of the many highlights from this sale herein. No Bid changes to report for any PCGS or NGC graded Classic Commems. However, since our last review of both ANACS and ICG issues, sight-unseen Bidders have been offering significantly higher amounts for \$2½ Pan-Pac Gold issues graded MS63 through MS66 by ANACS, as well as for comparably encapsulated Sesquicentennial Gold issues of the same denomination in MS64. Several better-date and generic Morgan Dollars in MS61 perked up this week, and Bidders gave a mild boost to the mostly generic cartwheels in PCGS MS65. All of this as Spot Silver sinks to \$26.77, a level not seen since late last June. Only three 1889 Dollars in MS67 were graded at this level by NGC with none finer, and Bid for these few pristine examples shot up by \$500 this week. A total of only seven specimens in all qualified for this grade, as PCGS certified four such Dollars with one finer at the MS68 level. Increased demand for 1890-CC and 1891-CC GSA Dollars in their original boxes with certificates drove Bids up for each of these issues by \$175. Many higher Bids exist for these nostalgic Dollars on a sight-seen basis with return privileges if the coins are not white enough. An extraordinarily rare 1895-O Branch Mint Proof Morgan Dollar graded NGC PR66 Cameo, the finest among only five such specimens known that were fairly recently discovered, is among a few other important Silver Dollars being offered through the CSNS auction. At least one dealer is hot for 1894 Morgan Dollars and is taking a slightly different approach, by raising sight-unseen Bids on Choice thru Gem examples graded by ANACS and for ICG specimens slabbed as MS64. Bid has jumped by 67% to \$5,000 for any of the five examples graded MS64 by ANACS and an 18% increase is in place for one of the seven in ICG plastic in the same grade. PCGS and NGC have graded 247 and 125 respectively as Very Choice with CCDN Bids at the \$6,600 level. To date CAC has given the green bean of approval to 22 of these 372 and will blindly buy them for \$8,800 each. A good number of Peace Dollars are moderately higher, including all D-Mint issues in MS65 other than the more elusive 1927-D.

Although the market for early Coppers remains unquestionably robust, an over-supply effect can arise and temporarily dampen demand. Such was the case this week for Braided Hair Half Cents in PCGS MS65RD, failing to meet current Bid support by \$900. NGC No Cent Liberty Nickels in MS67, which had gained by an average of more than 40% all through 2011, have slumped considerably from their \$1,500 sight-unseen Bid. The highly anticipated Bidding sessions for such iconic rarities as the

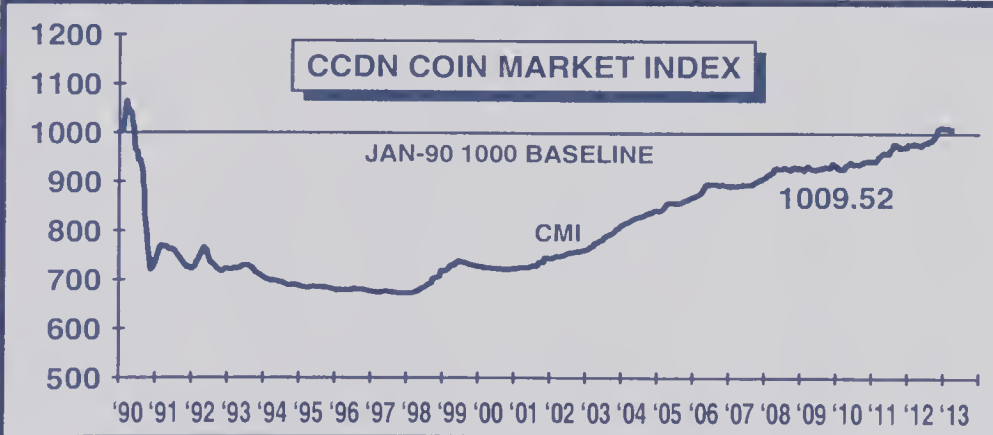

Walton 1913 Liberty Nickel during Heritage's auction at this year's annual CSNS convention are, understandably, dominating the coin market headlines. However there are more than a few other highly noteworthy Type specimens that will be featured during this event deserving much attention as well, including two of only 353 Mint State certified Flowing Hair Half Dimes. One is a first issue year 1794 in PCGS MS64 with CAC approval, and the other is a 1795 example that is uniquely graded by NGC as an MS67PL. For those who are being outbid on the Walton specimen, there'll be a chance to get a wonderful CAC approved 1867 Shield Nickel with Rays in PCGS PR65+ Cameo, one of only two graded as such by PCGS with only four finer of these extremely low mintage issues. Bidding activity for some truly rare and seldom seen Type material from the Eric P. Newman collection, including several of his interesting Pattern Proofs and experimental issues, will surely entice some of the most serious of collectors to attend and participate in this centralized convention that proves itself each year to be one of the most influential components of the rare coin market.

There wasn't a whole lot of "Nickel and Dime" activity to report this week, as all PCGS and NGC certified Buffalo Nickels and Mercury Dimes remained stable at current Bid. The CSNS Heritage auction will make available a very scarce 1926-D Buff in PCGS MS66+, the only one

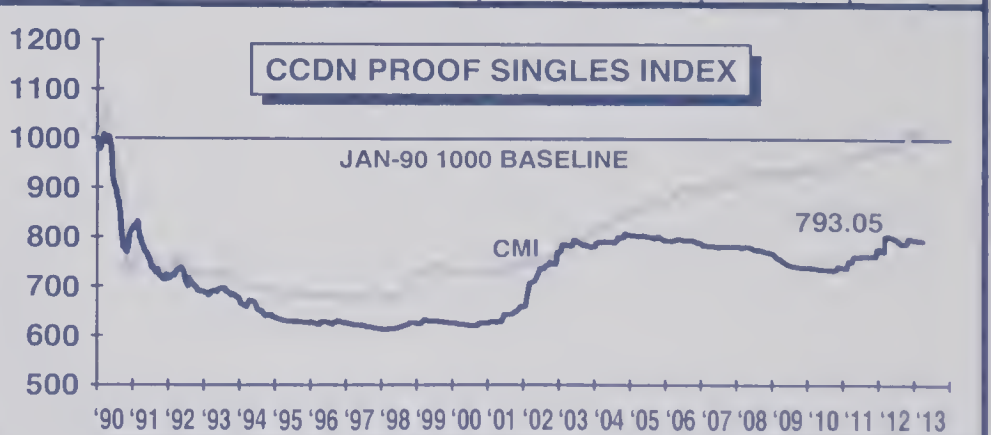

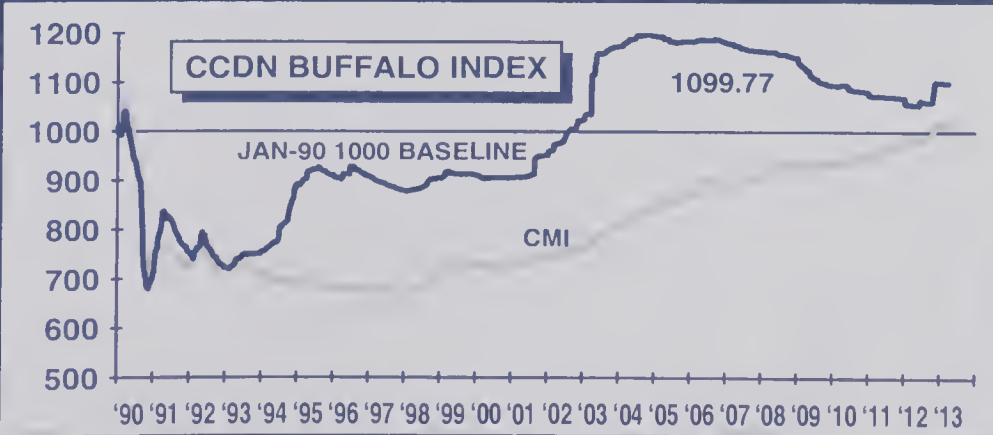

available at this grade and surpassed in quality by only three others of its kind graded by either service at the MS67 level. Next week's conclusion of the Legend~Morphy event in Las Vegas should reveal some very strong results for a select number of lots comprised of some of the finest quality Mercury Dimes ever to appear at public auction. Only a few Walking Liberty Halves are involved in this segment's often seen bulk trading activities that resulted in their moderate decline, and these issues include the 1941-D and 1944-D in MS65.

A steadily declining Gold Spot, now at \$1,552, representing a 10-month low and an equities market poised to break yet more all-time high records didn't help in retaining the capital needed to sustain current Bids, especially for generic Gold Type material. For now, \$2½ Libs in MS61 through MS63 represent the only real bright spot within this segment.

NGC Bulk Submissions Have Never Been Easier

Scott Heller,
Director of Operations
Throughout his 19 years at NGC, Scott has managed and overseen thousands of bulk and prescreen orders. His in-depth knowledge of the numismatic community and the certification process is invaluable to the growth of your business.

Get personal consultations from industry expert Scott Heller.

For years, NGC has led the industry with consistent and accurate grading, excellent customer service and fast turnaround times — for an unbeatable value. We also offer a direct liaison for professional dealers interested in bulk submission. Scott Heller is uniquely qualified to personally assist you with bulk submissions, and will even travel to your location for on-site consultations.

**To discuss your options, contact Scott directly at
sheller@NGCcoin.com or 1-800-NGC-COIN (642-2646).**

CERTIFIED COIN DEALER

newsletter

CCDN — a weekly report on the Sight-Unseen certified market published by the Coin Dealer Newsletter (est. 1963)

Vol. XXVIII No. 15

April 12, 2013

Single copy price \$5.00

Standing Liberty Quarters Jump MS66 Morgans Edge Higher

Many dealers are in Las Vegas attending the PCGS Members Only show running April 10-13, with an auction by Legend~Morphy. CSNS is coming up next, April 24-28 in Chicago, with a sale by Heritage, featuring selections from the Eric P. Newman collection. Weakness in precious metals has contributed to a somewhat light trading period in the sight-unseen marketplace. Just over \$200,000 changed hands blindly thru the dealer-to-dealer exchanges in the last week. A few of these sight-unseen transactions stood out from the rest. For example, a Seated Dollar With Motto graded NGC PR64 sold for \$4,860; a 1922 Grant With Star Half in NGC MS65 changed hands for \$4,900; and a 1995-W \$1 ASE, PCGS PR69 DCam sold for \$3,500. For \$5, the new owner can use the recently launched PCGS spot removal service should the latter issue possess or develop a milking problem.

Silver Dollar trading activity resulted in both negative and positive outcomes for mostly CC-Mint and generic Morgan issues. Movement in either direction was moderate, however, with a handful of cartwheels in MS64 and lower grades descending a bit. Dealers are now offering \$242 sight-unseen for any of the most common date Morgans graded MS66 by either service. 1885-CC issues in MS61 and MS62 each picked up \$10 to post a gain of as much as 8% over the past year while 1899-S Dollars of the former grade in NGC plastic are now trading 13% higher over the same period. The market for Prooflike Dollars looks quite sturdy, especially for the less common issues, but there has been some downside activity keeping Bids for a few of these PL Dollars a bit weak relative to their scarcity.

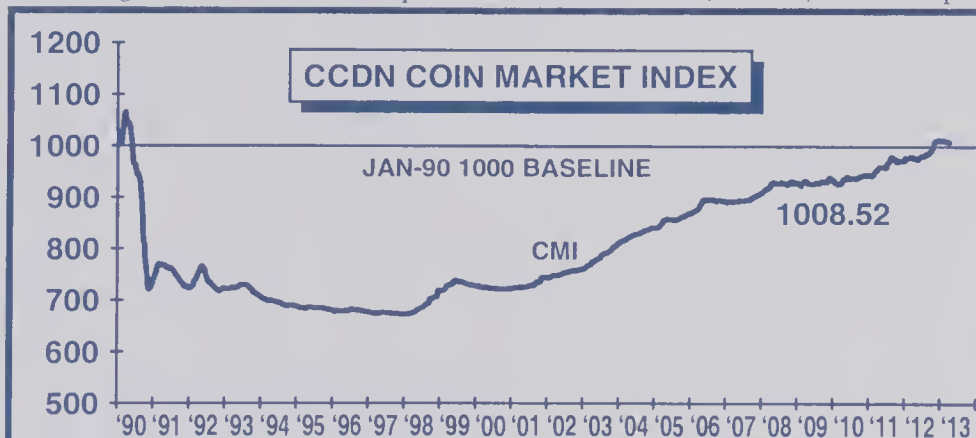

Virtually all Mint State and Proof Type material kept up its current Bid support. However, No Cents variety Liberty Nickels in NGC MS67 shook off another \$10, adding to their \$50 decline from last week. Since January of last year, these issues have tanked by 24% but their overall appeal deriving from their beauty and graceful design qualities may well reverse this negative trend before too long. Standing Liberty Quarters, especially in Gem or better with Full Heads, are hot. Examples of the 1928-D in MS66FH skyrocketed by as much as 175% to \$6,000 Bid since our last report on this series. These scarce Quarters have a combined pop of 25 with just 4 examples grading higher with the last four years of public auction appearances listed herein. Sight-Unseen Bids for the prior Denver minted issue, 1927-D, also shot up by

as much as 72% in like grade to \$5,000 for these pop 20 scarcities. These have crossed the auction block five times in the past three years and prices realized range from \$3,220 to \$13,800. To date, only two have been graded higher, at MS67FH by NGC. Bids for another 130+ issues within this series are also increasing, as high as 45% over last month's levels.

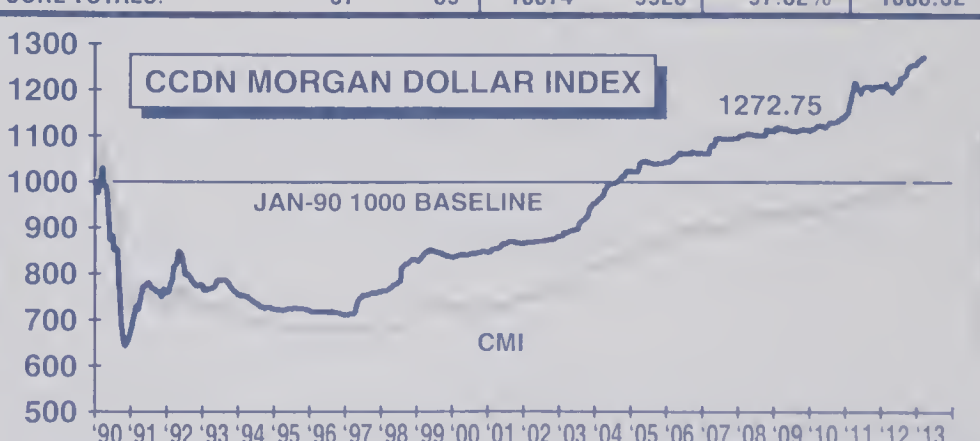

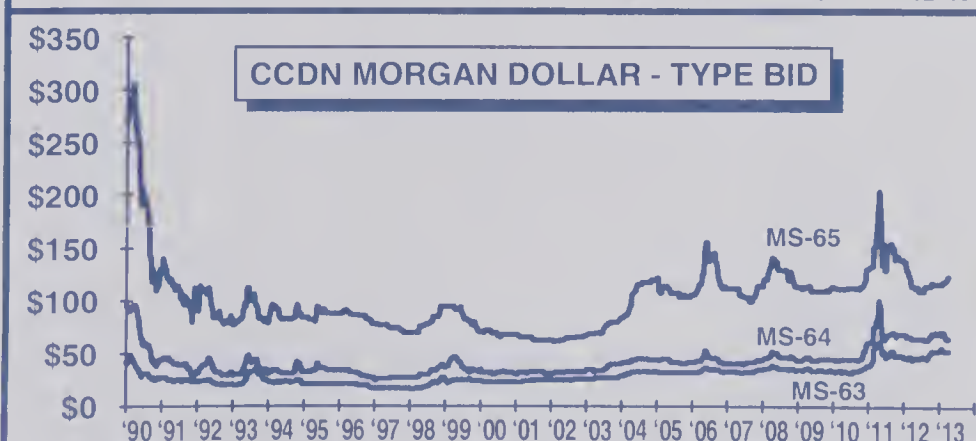

1928-D	Service	Grade	Price Realized	Auction Date
PCGS	66FH		\$25,850	1/13
PCGS	66FH		\$16,100	2/12
NGC	66FH		\$4,600	8/11
*PCGS	66FH+		\$17,825	11/10
NGC	66FH		\$4,313	1/10
NGC	66FH		\$2,300	1/09
*PCGS	66FH		\$8,625	1/09
*Approved and stickered by CAC				

A 1926-D Buffalo Nickel in PCGS MS66 fetched \$10,350 late last month during a Teletrade session, and a uniquely graded specimen of the same issue in PCGS MS66+ will be concluding its Bidding session at Heritage's CSNS auction in two weeks. 1924 Mercury Dimes in MS64FB got dragged down by a considerable margin and, even though 419 Full Band specimens of this issue graded higher at both PCGS and NGC, only 287 are certified by either service at this grade level – not exactly the highest of combined pops, given the very large pool of collectors involved with this series. A glimpse at the on-line activity so far concerning the upcoming Central States auction reveals that one of only seven 1941-S Walking Liberty Halves graded MS67 by PCGS has already accumulated offers that elevated its interim price to nearly 60% beyond its sight-unseen Bid. A total of only 26 specimens of this important short-set Walker have been certified at this grade level by either service with none finer. At least nine of the more common-date issues in MS65 drifted moderately lower, but 1947-D Halves in PCGS MS67 have now gained by more than 58% in less than a year's time. Bid for Albany Halves in PCGS MS65 slid back down to \$240, where it last stood late last summer, while Hudson Halves in MS64 and Lexington issues in MS66, both in PCGS plastic, each sagged by \$10. Stone Mountain Halves in MS65 were the hardest hit among the Silver Commems this week, as discount trading forced Bids back down for these rather plentiful but popular issues to the lowest they've been in almost two years. Grant No Star Gold Dollars in PCGS MS64 missed current Bid support by \$50.

Bids for much of the generic Gold Type issues continue to deflate, while scarcer material from this segment is becoming increasingly difficult to locate. \$2½ Libs in MS62 and MS63 have contrarily sustained upside movement for the third straight week while \$3 Indian Princesses in MS63 have gained \$400 over the past six months. Indian Quarter Eagles in MS62 are 14% higher from January.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading service, determined from the most nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by a low Bid. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual but a small price movement of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

www.CoinPlex.com

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report - an absolute "must have" if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

CAC, + Rising

Market Weathers Metal Storm

Many dealers are currently attending the Chicago International Coin Fair April 18-21 with an auction by Heritage. On the left coast, the Santa Clara Coin, Stamp and Collectibles show is set for April 19-21. Next up is the Central States Numismatic Society 74th Convention in Schaumburg, IL April 24-28. Heritage will auction off the Walton 1913 Liberty Nickel, which will be watched closely as a kind of bellwether sale. In spite of precious metal weakness, the sight-unseen market is strong with over \$420K in blind dealer-to-dealer transactions taking place in the last week through the exchanges. Gold is at its highest point of the week after nose diving Monday, losing over \$140 per ounce and dropping down to \$1,360. February of 2011 is the last time Spot was this low. Though a recovery may be underway, at a current level of \$1,392 the yellow metal may still look like a bargain to some buyers.

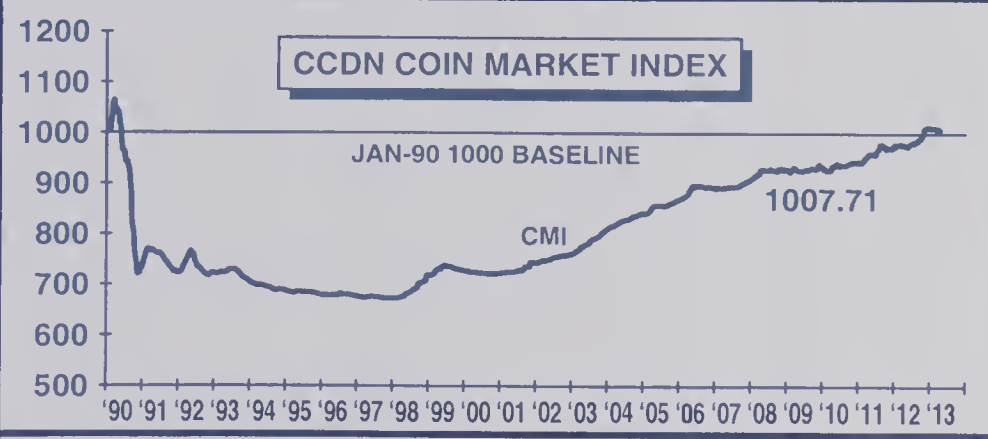

Buffalo Nickel enthusiasts are hot for those first issue year Buffs of both types, especially those that are + and/or CAC approved, and are offering double previous Bid for Type 2 variety 1913 issues in NGC MS66+. So far, it appears that a CAC approved 1916-D Mercury Dime in PCGS MS66FB+ with appealingly original toning will be pulling in a respectable final auction price by the time its session concludes at the Chicago CSNS Platinum Night event with Heritage. Bidders are trying to pry loose that one and only CAC approved 1920-D Merc in MS66FB by offering an extra \$1,500 for it since our last report on stickered slabs. CAC has approved 20 specimens of the first year issued 1916 Walking Liberty Half in MS66, and these Halves have risen by \$600 since January. Early-date Walkers have been maintaining solid support at current Bid, and there's a bit more interest brewing up for 1917-S (Rev.) issues in MS61. A number of common late-date Walkers, mostly in MS64, are on the discount table again, but a few war-time S-Mint issues in MS67 each gained \$500.

This week's sight-unseen Bid declines among generic Gold Type material seem moderate and fairly limited when considering the extensiveness of the losses incurred by the Gold Spot market. Nevertheless, generic \$20 Saints in MS65 are down by \$90 to \$105 and, while Gold Bugs may still be licking their wounds from this major downturn, it's fair to say that the situation could have been a lot uglier. Braided Hair Large Cents in MS64BN and MS65BN represent some of the more affordable choices for enthusiasts of the early Coppers, but these issues are also

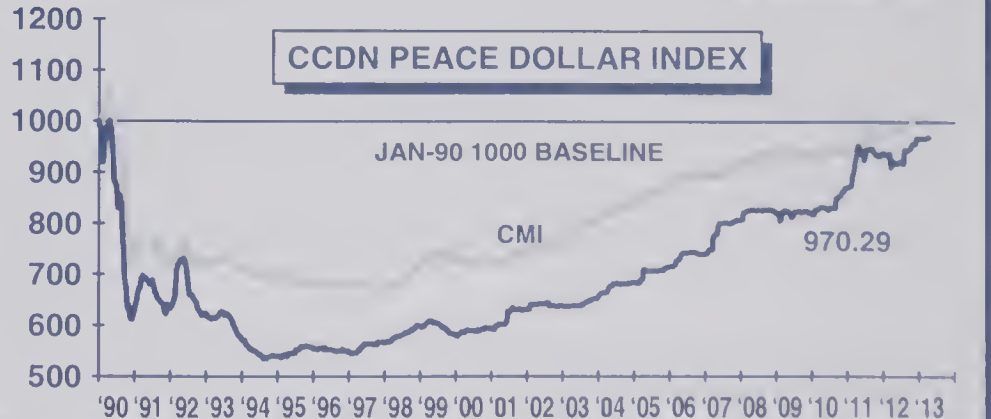

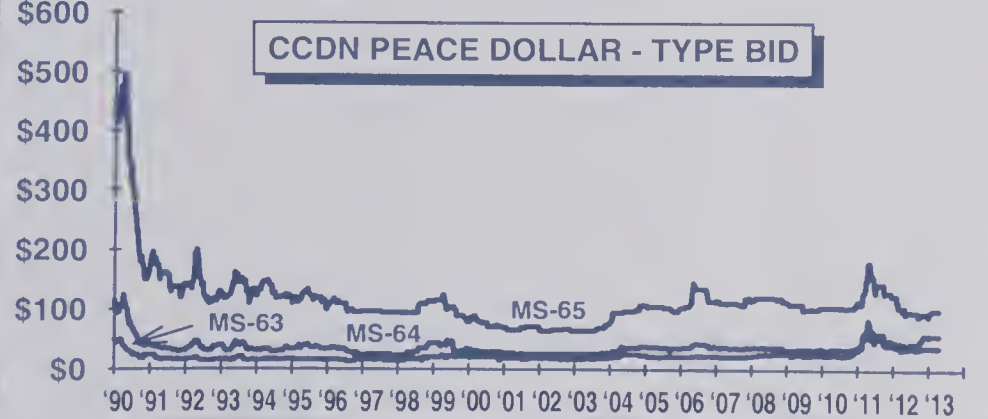

being gradually Bid up to higher levels, and those far scarcer specimens in PCGS MS67BN gained another \$250 for a cumulative increase of 25% this year. From time to time, even highly coveted material in Gem quality can have a disappointing outcome at what has become a very prolifically scheduled auction circuit taking place within the coin market, as demonstrated by the \$8,000 decline in Bid for Flying Eagle Cents in PCGS PR66. Proof Morgan and Trade Dollars in PR63 and PR64, respectively, rounded out their Bids to the nearest \$100 on the upside.

A handful of generic Morgan Dollars in various grades trickled moderately lower, but a significant advance occurred concerning 1878-CC Dollars in NGC MS66, which rose by \$800 this week to Bid at parity with those of comparable grade in PCGS plastic. Quality consciousness is playing an ever-increasing role within the Dollars segment, and there's never a shortage of anxious participants willing to compete for those very best of cartwheels when the opportunity arises. A Teletrade Bidder this past weekend succeeded in acquiring a magnificent 1886 Morgan Dollar graded NGC MS67DPL, unique for the grade and, very likely, the finest known DPL Dollar of this date, for a cool \$8,510. This qualitative emphasis was well reflected by some enormous gains posted for CAC approved Dollars in MS66, such as the 1892, 1892-CC, 1893, 1895-S, and a stickered 1893-S in MS65 is now being sought after with a sight-unseen offer of \$500K. Generic Peace Dollars in NGC MS65 gained a bit, and the push to find more CAC approved Dollars of this series is almost as aggressive as that for their Morgan peers. Sesquicentennial Halves in MS63 and MS64 have lately been missing their current Bid targets at auction, causing each of these issues to decline by 10% this week. Nonetheless, the conclusion of the CSNS auction in Chicago before the end of this month should reveal some astounding prices realized for several extraordinary quality Silver Commems being offered, including a top contending Long Island Half in PCGS MS67+ with CAC approval that has already been Bid up well into the five-digits.

During 2012, the Numismatic Consumer Alliance, Inc. (NCA) helped recover nearly \$1.3 million for buyers who were victims of unscrupulous coin sales, according to founder John Albanese. Over \$7.1 million has been recovered since 2005 when the NCA became operational. Elderly consumers tend to be the most frequent targets of these scams. As of mid-April, more than 10 cases are pending with the dollar amount exceeding \$10 million.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services (determined through careful study of market activity nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lower end of a unit price. Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary according to the needs of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

UPDATE!

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

CAC has evaluated over ^{400,000}~~350,000~~ coins with a market value over ^{\$1.8 billion}~~\$1.5 billion~~. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins.

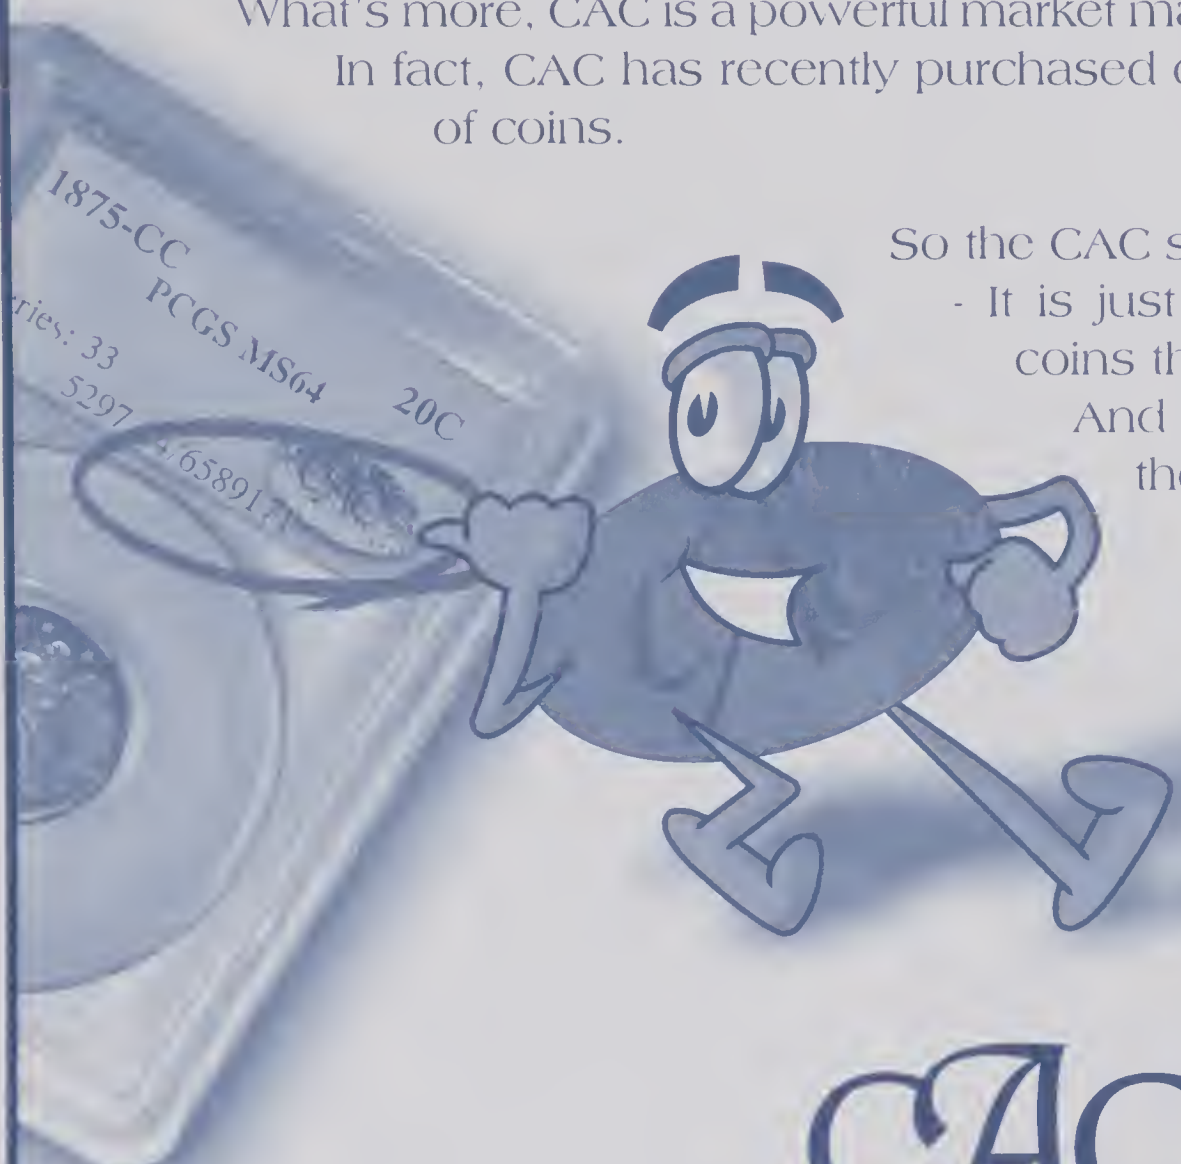

In fact, CAC has recently purchased over ^{\$275,000,000}~~\$250,000,000~~ worth of coins.

So the CAC sticker does not add value

- It is just an easy way to identify coins that are solid for the grade.

And it gives you confidence in the value of a coin.

The CAC sticker doesn't add value, it just helps to identify a quality coin.

CAC[®]

Precious Metals Rebound

Carson City Cartwheels Climb

Sight-unseen trading is rather impressive, especially considering the fact that precious metals are extremely volatile—Gold is up \$100 an ounce from its low point of Monday last week—and we are in a busy time now with rare coin shows. Both of these factors could easily put a damper on blind exchanges, but instead, there have been over \$500K worth of such trades in the last week. Heritage brought in over \$10 million from their Chicago International Coin Fair auction of world and ancient coins which began April 18. Taking top lot honors for this auction is the Canadian George V 1936 Dot Cent, graded PCGS MS63RD, which sold for \$246,750. As far as the CSNS is concerned, reports from the show are that set-up day was very active with robust buying and selling among dealers. Thursday, after lunch, at the show a fire alarm went off, only to stop a few minutes later.

More than a few CC-Mint Dollars in MS61 through MS64 continued to climb, including some of those that scored gains last week. A look at the chart herein confirms these cartwheels of western Americana allure have performed well over the past decade. Some more than moderate increases appear for a few Morgan Dollars in Gem and better, as 1888 cartwheels in NGC MS67 have now risen by 21% these past two weeks, while 1892 Dollars in NGC MS66 and 1900-O issues in PCGS MS67 are fetching \$250 and \$100 more, respectively. As the final stages of Bidding commence at Heritage's Signature Auction in Chicago, exceptionally strong offers have so far been acquired just from on-line Bidders for such final issue year Morgan Dollar lots as a multi-color toned 1921-D in PCGS MS67 with CAC approval and a rare Chapman Proof in NGC PR65. All generic Peace Dollars in MS64 managed to adjust back up to the \$60 level.

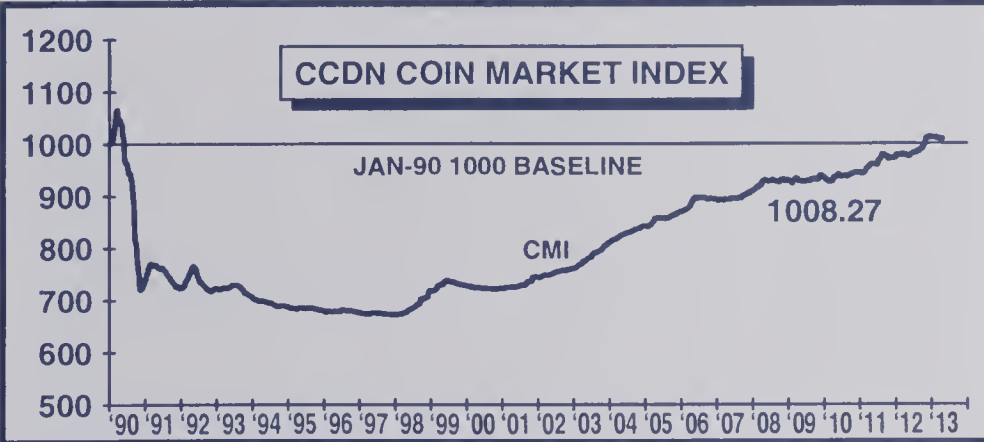

Type III, Three Cent Silver Pieces in MS61 are Bidding sight-unseen at a minimum of \$145, constituting a 12% rise this past year, a rate of appreciation beating those for the others of the same issue in the higher Mint State grades. David Lawrence Galleries recently announced it is considering serious offers for one of approximately eleven known Uncirculated examples of the ultra-rare 1894-S Barber Dime. This CAC approved specimen is one of three graded PR64BM by PCGS, and NGC certified one each at PR62BM and PR63BM. The remaining six specimens are Gems, with three in PR65BM and three competing for finest known

in PR66BM. The San Francisco Mint officially reported that only 24 of this highly coveted Branch Mint Proof rarity were struck.

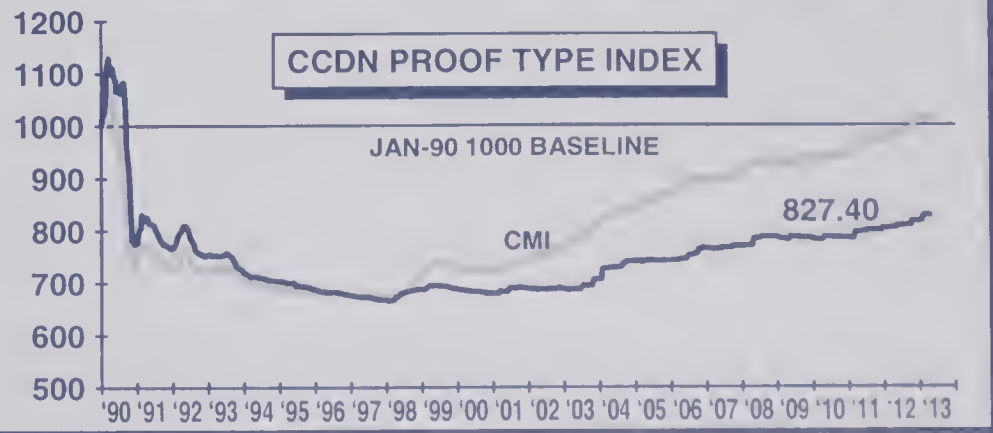

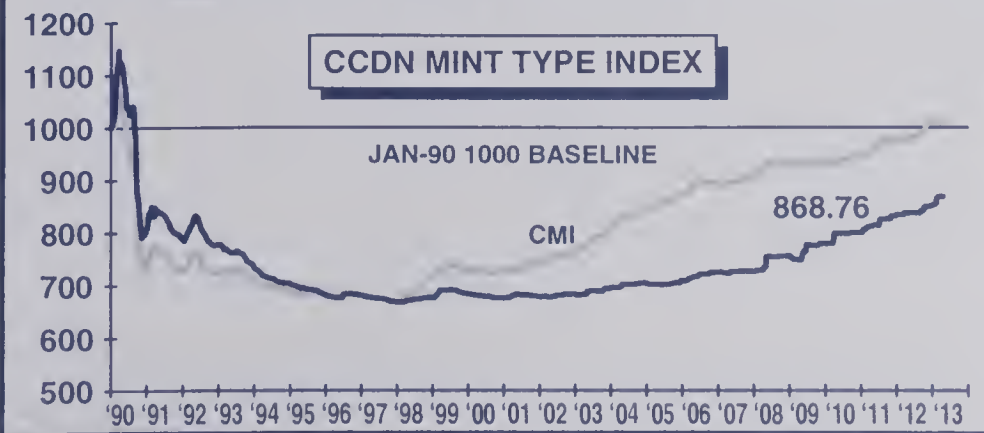

Type I 1913 Buffalo Nickels in MS65 and MS66 rounded off their sight-unseen Bids to the nearest \$10 on the upside, reflective of increasing demand for these first issue year Nickels in Gem. An exceptional and gorgeously toned example of this Buff in NGC MS68 will be up for grabs at next month's ANA auction in New Orleans hosted by Stack's Bowers. NGC certified only twelve examples of this popular coin at this grade level, with three receiving star designations. Silver Commems appear a bit more resilient lately, as virtually all have been able to avoid any further discounting. This wasn't the case for Cleveland Halves in MS66, however, which were reduced by \$40 this week. As indicated by this week's market column, the owner of a Grant with Star Half in PCGS MS64 could have pocketed an extra \$50 had it gone to any of the other parties offering the full sight-unseen Bid of \$2,300. Gold Commem supporters stuck to their guns to assure no downside trading for these issues took place. Other than a \$4 decline for 1940-S Mercury Dimes in NGC MS67, the market bore no other Bid changing consequences for this segment. Early and late-date Mercs in Gem or better, especially with Full Band designations, continue to draw a good amount of attention at both on-line and major convention auction venues. A few late-date Walking Liberty Halves in NGC MS64 lost a bit more wind, affected by this month's continuation of a declining trend within this segment. A 1942-S issue in PCGS MS67 is the top Walker lot at Heritage's Signature Auction at the CSNS in Chicago, with the third highest sight-unseen PCGS Bid in this grade for the series.

Gold Spot is continuing to recover since dipping just below the \$1,350 per ounce level last week, and reports of an insufficient physical stockpile of the yellow metal to support the high volume of recent ETF activity has investors, as well as speculators, coming back into both the bullion and Gold Type coin markets. Scarcer collector Gold Type material has yet to react in positive fashion as have some of the more Spot sensitive generic issues such as \$20 Saints in MS61 through MS64.

NGCNumismatic Guaranty Corporation of AmericaSarasota, FL (800) 642-2646

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market nationally reported sight-unseen Bids, Asks, Trades, prior levels and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of unsolicited Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary in each of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks. sell lists coin shows and other sources of *wholesale* transactions. Auction prices realized or retail trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. Listing Policy: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Greatest Gold Mine of Coin Data - Yours **FREE!**

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market.

Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

CSNS Auction Garnerers \$42 Million

ANA National Money Show Up Next

The world of numismatics is still abuzz over the results of Heritage’s auction at the 74th annual Central States Numismatic Society Convention April 24-28 in Illinois. Most of the attention has been focused on the top lot of the sale—the Walton 1913 Liberty Nickel. This storied coin, graded PR63 by PCGS, hammered for \$3,172,500 with the winning Bidders being Jeff Garrett and Larry Lee. Multiple high-price coins were featured in the auction as demonstrated by the fact that four coins sold for over \$1 million, and the top eight lots make up over 20% of the auction’s total price realized of \$42 million.

Silver Commems are mixed with a fair amount of upside performance taking place. Strength prevailed most noticeably for PCGS certified Lafayette Dollars in MS66 and MS67, as Bid for those in the latter grade, of which there are only three known with two finer + designated examples, gained by \$5,000. This popular Commem in NGC MS65 lagged to the extent of missing its current Bid target by \$625. 1921 Pilgrim Halves in MS66 were well received, now Bid \$25 higher. Utmost quality and selectivity still matter a great deal, as reflected by the activity pertaining to several of these Commems in the MS67 columns, and this was indicated by a \$200 increase for NGC certified Grant No Star Halves and one of \$250 for Pan-Pacs in the same holders, while a \$500 plus gain took hold for any of those far too few 1947 Booker T. Washington PDS Sets. The vitality, however, didn’t transpire to prevent several Gold issues from settling lower, as the abundant supply of 1903 McKinley Dollars in MS65 and Grant No Star issues in NGC MS62 through MS64 proved most detrimental for this series.

Bidders remain primarily focused on better-date Dollars, including those in lower Mint State grades, as few in Gem and better have become available. A number of generic Dollars in MS66 are being picked out for another round of discount trading, but a few early S-Mint issues in NGC MS67 are on slight rebound, and 1902-S cartwheels of this grade and plastic picked up \$250 to arrive at an even Bid of \$8,000.

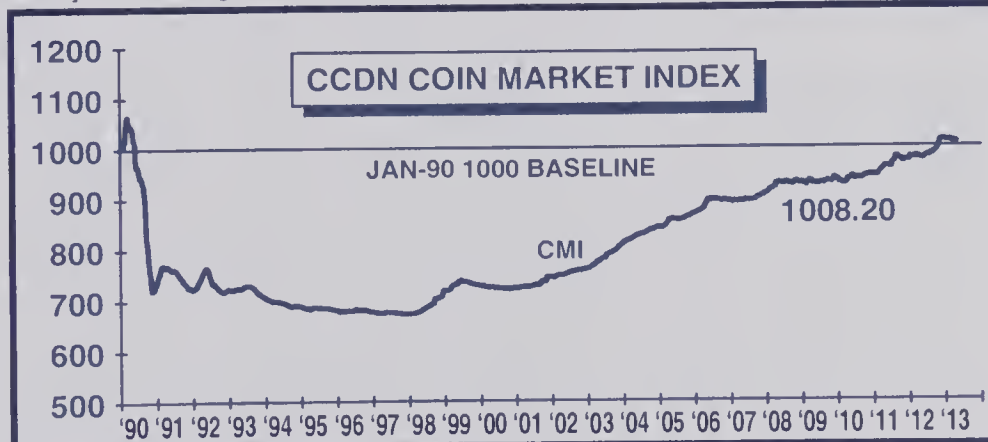

Mint State Type has seen better outcomes than what can be reported this week. PCGS Liberty Seated Half Dimes with Arrows in MS66 and No Motto Halves of the same variety in MS65, took quite a beating as the former issues plunged 27%. Only Full

Head Standing Liberty Quarters in PCGS MS65 through MS67 maintained the fortitude to lunge forward appreciably. Some Proof Type also had challenges sustaining current Bids, and select NGC graded material was offered up to contenders at far below sight-unseen Bid, including Seated Liberty Quarters in PR65, Barber Quarters and Halves, as well as With Motto variety Liberty Seated Halves in PR67. S-Mint Buffalo Nickels are quite hot at the auction block when they are offered. A mellow-toned 1931-S Buff in PCGS MS67 CAC realized \$38,188 – nearly four and half times sight-unseen Bid, during last week’s auction. Bid for 1934-D Buffs in NGC MS66 receded by \$25. The 1942/1-D Mercury Dime is among the most popular of die oddities and, when a Gem with Full Bands appears at auction, it usually attracts many anxious Bidders, as seen last week when an MS65FB example took in \$31,725.

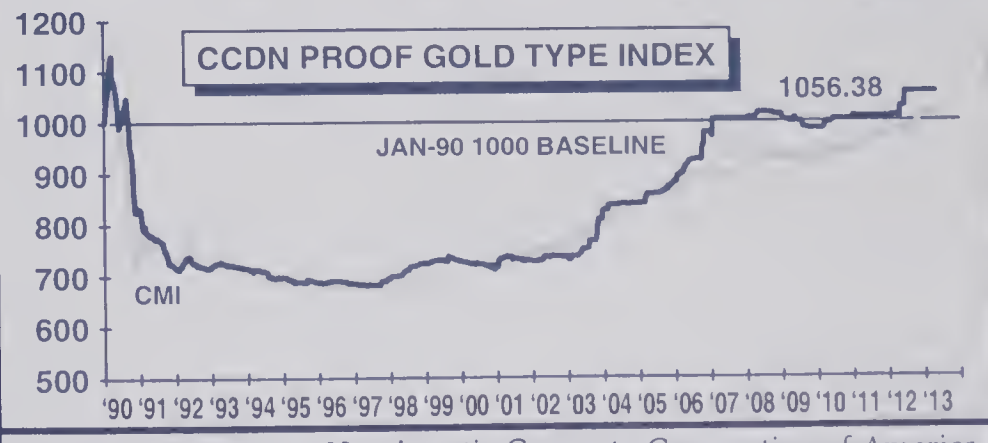

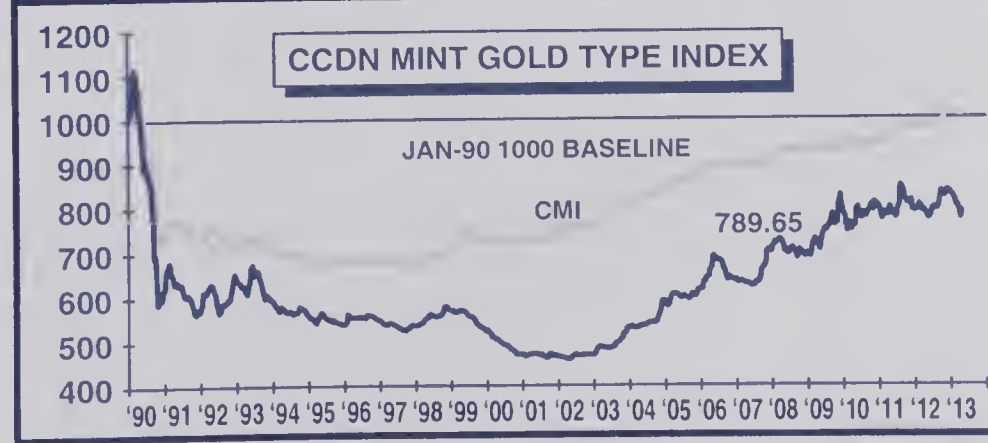

The widely disparate difference in sight-unseen Bid between a 1942-S Walking Liberty Half in NGC MS67 and one of comparable grade in PCGS plastic has been greatly narrowed as a result of such a specimen in the latter service’s holder missing its hefty \$75,000 Bid target at auction. Despite the \$32,500 reduction, this is still a highly desirable and extremely tough coin to locate, as there are only two examples graded at this level by PCGS with none finer, while NGC assigned this grade to a mere seven examples with none finer as well. 1946-S Walkers of the same grade in PCGS plastic have also been quite volatile over the past two years and have dipped \$400 this week.

Gold Spot’s dipping back down to the \$1,450 per ounce level after appearing as if it would regain and even surpass that at \$1,500 may have given Gold Type enthusiasts the quivers, if not just another bout with disappointment. While generic material at the Gem and better grade level remains stagnant, if not totally depressed, several issues at the lower end of the grade spectrum resumed trading with buoyancy, particularly \$2½, \$5, \$10 Libs and Indians in MS61 and \$20 Saints in MS61 through MS64. Next up for dealers and collectors is the ANA National Money Show in New Orleans May 9-11, with an auction by Stack’s Bowers. See a few of the many highlights herein. Then it’s off to Vegas for the PCGS members only show May 15-18 at the Bellagio.

NGC Bulk Submissions Have Never Been Easier

Scott Heller,
Director of Operations
Throughout his 19 years at NGC, Scott has managed and overseen thousands of bulk and prescreen orders. His in-depth knowledge of the numismatic community and the certification process is invaluable to the growth of your business.

Get personal consultations from industry expert Scott Heller.

For years, NGC has led the industry with consistent and accurate grading, excellent customer service and fast turnaround times — for an unbeatable value. We also offer a direct liaison for professional dealers interested in bulk submission. Scott Heller is uniquely qualified to personally assist you with bulk submissions, and will even travel to your location for on-site consultations.

**To discuss your options, contact Scott directly at
sheller@NGCcoin.com or 1-800-NGC-COIN (642-2646).**

Modern Coin Wholesale

Ron Drzewucki

Modern Coin Wholesale

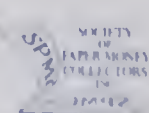

CEO, *Ron Drzewucki* has been a professional numismatist since 1984 and a member of Professional Numismatists Guild (PNG) since 1995. A professional numismatist since the age of 15 years old, Drzewucki has for years been a dealer **“known as having a superb eye for coins”** and “has the experience and discriminating eye to make those important distinctions between grades”, according to the Numismatic Guaranty Corporation’s newsletter. With 200 dollars he went to

his first coin show and made a profit. From that point on Drzewucki began traveling across the United States to buy and sell coins. His interest in coins began when he started collecting U.S. Mint and Proof sets.

UPDATE!

The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

^ 450,000

\$ 2
billion

CAC has evaluated over ~~400,000~~ coins with a market value over \$1.8 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over \$275,000,000 worth of coins.

^ \$300,000,000

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

Generic Silver Dollars Stronger Walkers Strut To Higher Ground

Reports that live Silver bullion remains in short supply and available only at considerably high premiums may increase interest for acquiring Silver Dollars. Common date Morgan Dollars are hot in MS66 and MS67. Buyers are looking for quantities at these new higher sight-unseen levels, regardless of what the coin looks like. See the chart below for some examples. While Bids are higher for generics in MS66-MS67, they dropped a smidgen in PCGS MS63, with active trading remaining upbeat overall. 1885 Morgan Dollars grading MS67 are being targeted at higher levels with buyers now offering \$975 and \$800 for PCGS and NGC, respectively. To date 90 have been certified at this grade level by PCGS with two higher, while NGC has slabbed 188 with five finer. Greater call for generic Peace Dollars in MS64 and MS65 may suggest that there's renewed awareness of just how acute the shortage of Silver bullion products may be in terms of their availability in collectible form.

Walking Liberty Halves were the sensation this week, as sight-unseen Bids for all first issue year examples in Choice and Very Choice, as well as for 1917 Philly-Mint issues in the same grades and, especially, in Gem, are advancing rather significantly due to increased interest. Demand is up as well for more than a few other early but subsequently dated Walkers, mostly in MS64. Semi-key 1918-D Halves in this grade are up by at least \$300 to Bid at an even \$4,000 now, and the fact that there simply are not enough 1923-S and 1928-S issues in MS65 for all who want them has these Walkers commanding an average of 21% more since last week. There's also widespread recovery occurring among the many late-date common issues in MS64 through MS66.

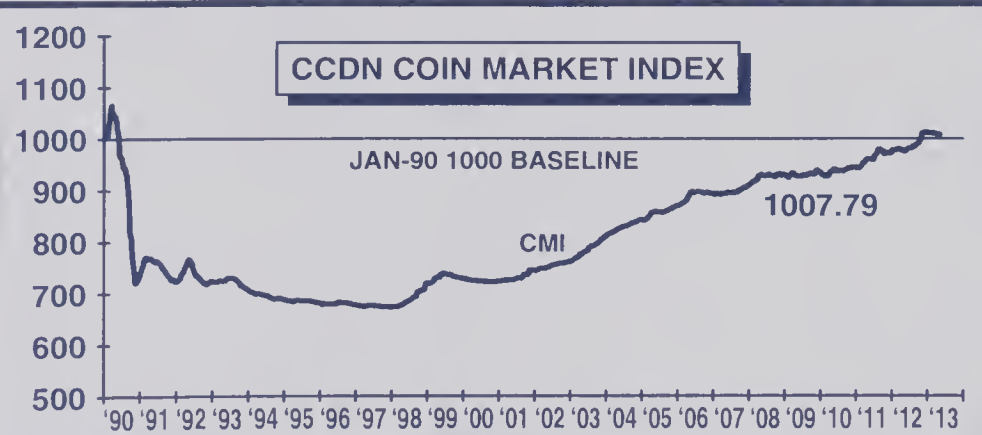

For enthusiasts of obsolete denomination Type, Heritage will feature some important and seldom seen material during its auction in Long Beach next month which includes an example of the Proof-only final year issue 1873 Three Cent Silver Piece. This particular example is graded PCGS PR66, originally toned, and CAC approved. A very scarce 1887 Three Cent Nickel, graded PCGS MS66 CAC, will be featured as well – a coin with an original business-strike mintage of just 5,001 and a combined pop of 13 with only one

finer. Liberty Seated Dimes With Legend in PCGS MS67 had a better than satisfactory week in the sight-unseen market, gaining \$200. Early Buffalo Nickels in Gem are demonstrating strong retail results in on-line auction venues. A 1913-S Type 2 Buff in NGC MS65 sold through Teletrade last weekend with a \$3,220 final offer, while a pleasingly rainbow toned 1924 issue in PCGS MS66 sold during the same session for \$1,840. Final issue year 1938-D Buffs in MS67 seem to be getting harder to pass up. Common date Mercury Dimes in MS67FB are needed at moderately higher offers, and market-makers will take them certified by either service.

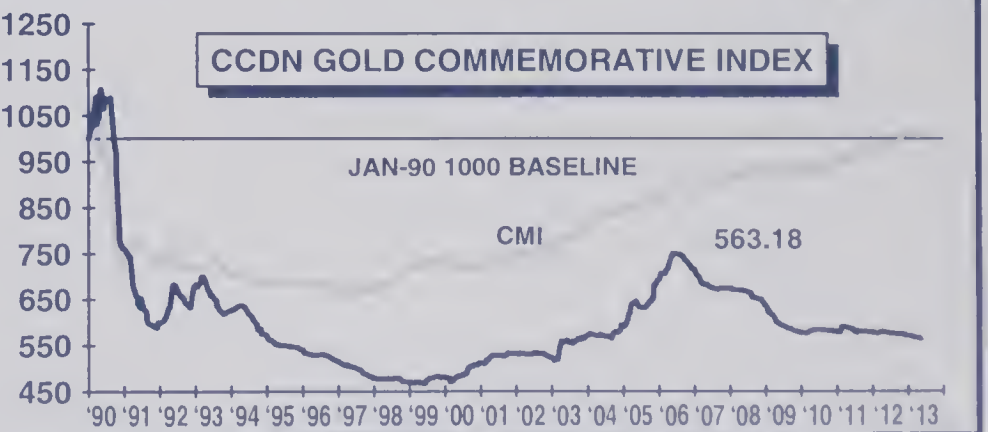

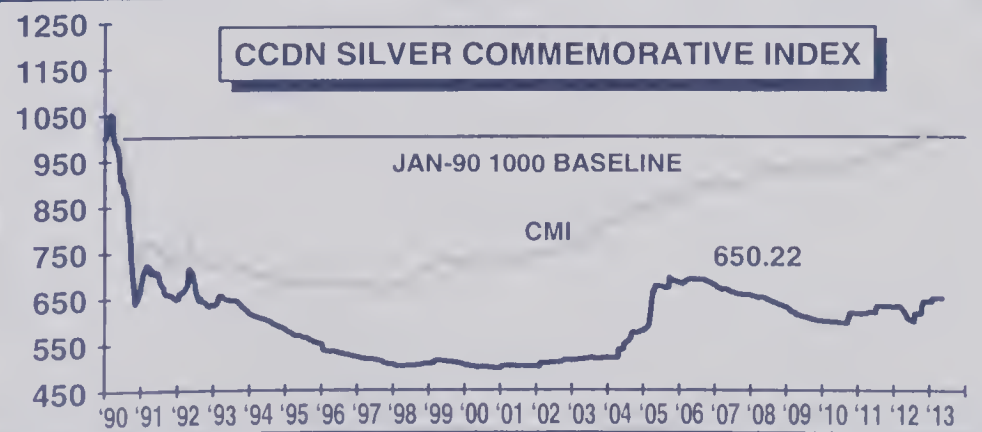

Market participants competing for Silver Commems showed no hesitation in offering at least current Bid for whatever issues they sought to acquire, although some Elgin Halves in PCGS MS66 were reported as achieving realizations at auction that were considerably short of what several sight-unseen buyers were offering for them. The real blood was spilt amongst the Gold Commems this week, however, especially those in NGC plastic. Other than the 1903 Jefferson, Pan-Pac, and Grant with Star, there was hardly a Gold Dollar which evaded the wave of discounting. 1905 Lewis & Clark Gold Dollars in NGC MS65 were among the hardest hit, incurring a loss of \$700, and \$2½ Sesquicentennials in PCGS MS65 were tossed into the \$25 off bargain bin for the second straight week.

Type I Gold Dollars in PCGS MS65 have been moderately but persistently declining over the past five weeks, losing \$175 over that time period to settle at an even \$3,000. However, along with the most common \$20 Saints in MS67, these are the only Gold Type issues in Gem or better to wane this week amidst the continuing stagnation in the Gold Spot market. Some extraordinary and scarce Gold Type material will highlight the Pre-Long Beach auction featured by the Goldbergs in Los Angeles, including an 1839-O \$2½ Classic Head graded NGC MS65, a 1906 \$2½ Liberty graded NGC MS68, and an astounding 1869 \$5 Liberty, one of only 25 examples minted, graded NGC PR65★ Cameo.

The Certified Coin Dealer Newsletter, the Bluesheet, reports current wholesale market Bid, for coins certified by the major active grading services, determined through archival data, and nationally reported sight unseen Bids, A's, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the low end of the market. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary according to the needs of the dealer, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Greatest Gold Mine of Coin Data - Yours FREE!

CAC's POP Report puts all the data you need at your fingertips

Data for each stickered-coin is compiled in CAC's Population Report – an absolute “must have” if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's a convenient way to access a gold mine of CAC coin data, the FREE CAC POP report.

“Because Confidence is Priceless”

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Stack's Bowers Brings In Over \$7.2 Million Demand Increases For Generics

Sight-unseen trading on the dealer-to-dealer electronic networks has been average over the past week, totaling some \$400,000. This is healthy when considering a major show and auction took place during this time period, which often contributes to lower numbers. New Orleans was the locale for the ANA National Money Show, which took place May 9-11. While public attendance could have been better, the Stack's Bowers auction was strong, with a total of \$7,263,197 and a top lot being an 1879 \$4 Stella, Coiled Hair, PCGS PR64 Cameo, which sold for \$646,250. See some additional highlights herein.

Trading activity pertaining to Silver Commems left Rhode Island Halves in MS66 and comparably graded Texas Type issues in PCGS plastic short by \$5, while a reduction of a slightly smaller extent pulled back 1920 Pilgrims in PCGS MS65. An extraordinary rainbow toned Pan-Pac Half, graded PCGS MS67 with CAC approval, stands out as among the more closely watched lots featured in the upcoming Long Beach auction. A total of only 142 examples of this popular and quintessential Silver Commem have been graded at this level by either service with just six finer. The market continues to prove most daunting for Gold Commems, however, as 1917 McKinley Dollars in MS63 trickled down a bit more along with \$2½ Sesquicentennials in NGC MS62, which incurred a \$30 loss. Stagnation, even some weakness, persists among Gold and Silver Classic Commems that are CAC approved, with the exception of both Octagonal and Round versions of \$50 Pan-Pac issues in MS64. Morgan Dollars deemed to be of top tier quality for their grades are always desirable, and Bidders are inclined to seek out those scarcer issues and are willing to splurge when finding them in premium quality, as evident from the \$12,000 increase in sight-unseen Bid for CAC approved 1879-CC cartwheels in MS66, as well as offers to pay near double or more than double previous Bid for such issues as the 1878 7/8TF, 1879-O, 1880, and 1921-S Dollars in NGC MS66+.

Bidders are offering an extra \$100 for No Drapery Liberty Seated Half Dimes in MS66, and those of the Stars variety in NGC MS67 are up by \$200 this year. However, the major force within the Type segment this week is the quest for more Capped Bust Dimes of both the Large and Reduced Size varieties in PCGS MS65 and MS66 as Bids for each of these issues advanced by \$1,000. A most uncommon of Twenty Cent Pieces

is among a number of lots coming up for Bid in Long Beach and, aside from its meager Proof only mintage of just 510, this beautiful 1877 example is graded PCGS PR64 Cameo. No one knows for sure how many 1937-D 3-Legged Buffalo Nickels were released from the Mint but, of the nearly 12,500 examples certified by both PCGS and NGC, 595 of these error-struck Buffs qualified for MS63. One such example also sports the Gold CAC sticker on its PCGS slab and will be offered in Long Beach during Heritage's auction. A combined total of only 521 specimens attained higher grades. Last week's multiple but moderate advances reflecting increased interest for common late-date Mercury Dimes in MS67FB, the supply of which may have proven somewhat inadequate, shifted over to many of those same issues in MS66FB and MS67. This week's trading activity involved bulk orders that included a greater call for examples in a variety of grades.

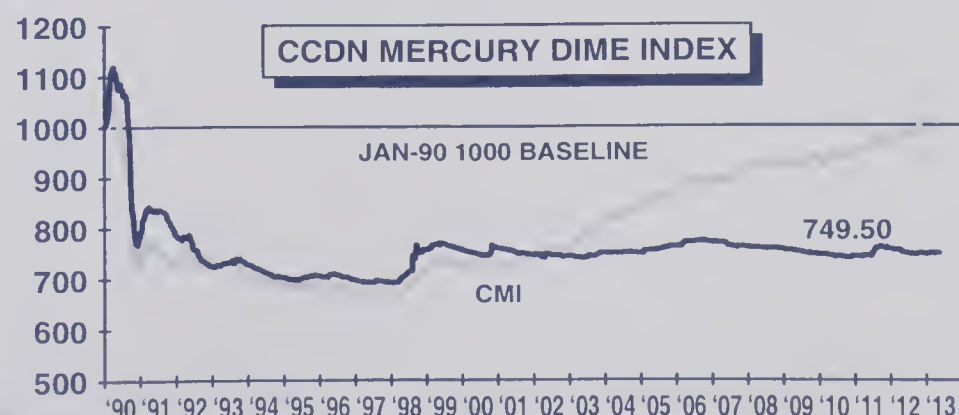

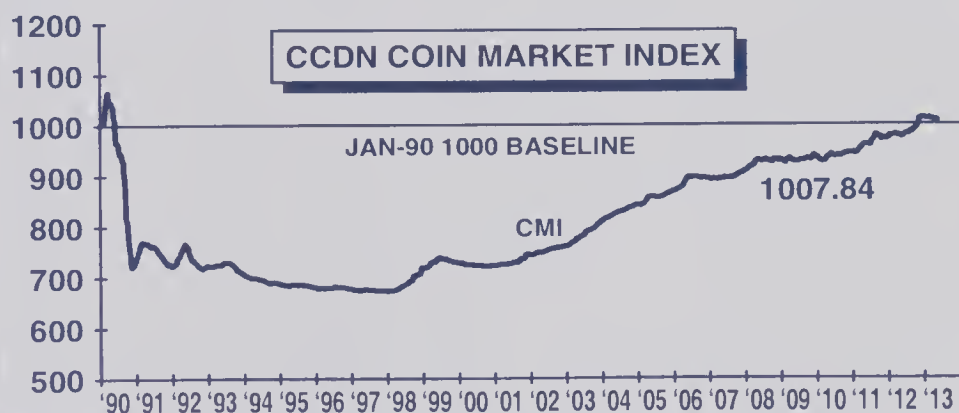

A healthy dose of positive after-effect from last week's bull rally within the Walking Liberty Halves segment took hold, as semi-key 1921-D issues in MS64 were Bid up by another \$500, as were more than a few pre-war Halves in MS67. There's a noticeable emphasis on quality with respect to sifting out CAC and + graded Walkers, especially semi-key dates, but there's also enhanced activity boosting Bids for the more common late-date Walkers in PCGS MS65+.

Resiliency for Type I Gold Dollars in MS61 and NGC MS62 spilled over for \$2½ Libs in MS61 through MS63, which have been on somewhat of a rollercoaster lately but have regained their losses from last week while \$10 Libs with Motto in NGC MS65 also recovered \$200 since then. These are now needed at \$2,200 sight-unseen

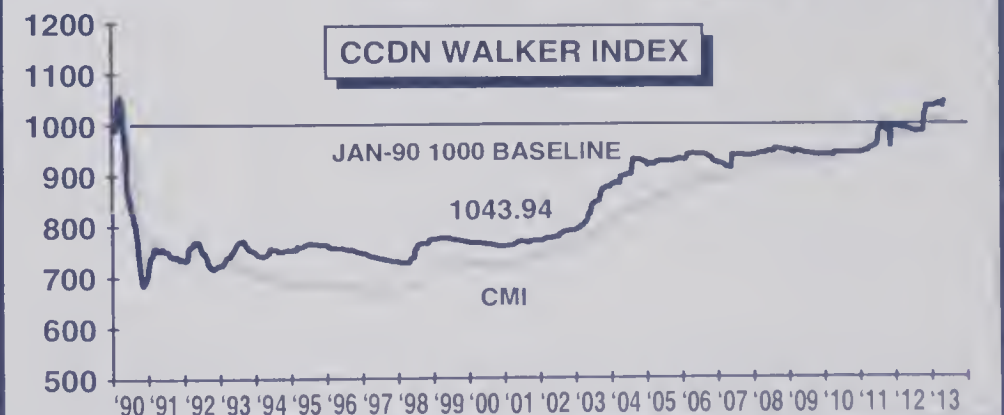

despite recent auction results revealing sales of less than \$1,800. Renewed prospects of further tenuousness for generic Gold Type material emerged this week as the Gold Spot market fell to well below the \$1,400 per ounce mark, appearing to once again test its level of support at \$1,375.

Many dealers are currently in Vegas for the PCGS Members Only show at the Bellagio May 15-18. Next up is the Long Beach Expo, June 6-8, with an auction by Heritage. Bonhams will have an auction in Los Angeles June 3 which will include the Lanson Bonnet Vineyard collection. Ira and Larry Goldberg will hold a Pre-Long Beach auction also in Los Angeles June 2-4.

--	---	--

The Certified Coin Dealer Newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading service determined through careful study of market activity and nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported Bid. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary in accordance with the needs of the dealers, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

UPDATE!

The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

^ 450,000

\$ 2
billion

CAC has evaluated over ~~400,000~~ coins with a market value over \$1.8 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over ~~\$275,000,000~~ worth of coins.

^ \$300,000,000

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

CAC[®]

Morgan Dollars Move Up

Common 20th Century Slabs Targeted

Dealers will soon have plenty of opportunity to purchase fresh material on the west coast. June will be a busy month early on, beginning with the Goldberg Pre-Long Beach auction in Los Angeles, June 2-4. Bonhams is next, holding their auction June 3 in Los Angeles as well. Long Beach will include a sale from Heritage June 5-9. This auction includes a special section of over 600 lots referred to as a Premier Session and is identified in the auction catalog by green edging on the respective pages. We have included several highlights herein. On public display for the first time, the Long Beach Expo will feature the all-time finest Half Cent set, the Missouri Cabinet Collection, which includes examples from 1793-1857. Also on display will be the all-time finest sets of German Empire Proofs. Collectors Universe is continuing its sports celebrity appearance program with Joe Montana and Dennis Rodman attending the Expo June 8 to sign autographs. PCGS will be offering two grading classes at the Long Beach Expo: Coin Grading 101 for beginners, and Coin Grading 102, advanced. Both classes will be offered Saturday, June 8, from 10 am to 3 pm. NGC will offer an introduction to grading class as well, at the Whitman Baltimore Summer Expo Saturday, June 22 from 9 am to 4 pm.

Strong support at current Bid remains in place for most Dollars of both series this week and, while Morgan enthusiasts upped their demand for a number of these issues, 1891-O Dollars in PCGS MS65 were among the very few better-date cartwheels unable to keep pace with the rest of the pack, resulting in a \$200 decline. However, Bids for 1892-S Dollars in MS63, of which a total of only 12 have been graded as such by either service with 35 specimens grading higher, are receiving heftier sight-unseen Bids. PCGS certified examples have jumped by \$3,500 while NGC slabs increased \$2,000. A sight-unseen Bid of \$90,000 is now being tendered for any of the three 1901 Morgan Dollars NGC has graded as MS65. Final issue year Morgan Dollars that are brilliant white and original looking are getting premium consideration. One such Dollar, a 1921-S in PCGS MS65+, sold through Teletrade last weekend for \$1,725. Type material in both Mint State and Proof is relatively stable, given the diversity of issues comprising this segment. However, a few setbacks did occur this week, with Copper Nickel Indian Cents in PCGS MS64 tumbling 19% and the most

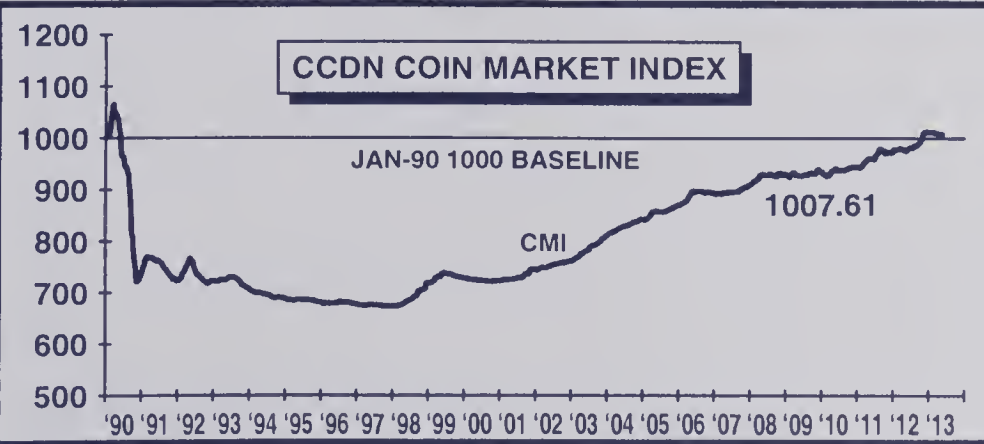

common of these same Cents in Proof Bronze grading PR65RD by NGC slipping by \$25. Type 2 Three Cent Silver Pieces in PCGS MS63 also finished the week's trading session short by 12%.

Buffalo Nickels didn't make much news this week other than 1938-D and 1938-D/S issues in MS65, the former in NGC plastic and the latter in PCGS holders, each missing their current Bid targets by \$2. Competition is already quite strong among on-line Bidders contending for a beautiful, white, original 1921 Mercury Dime, graded NGC MS67FB, being offered up by Heritage during its upcoming Long Beach auction. Only seven specimens of this semi-key date Dime, the third lowest mintage of the series, have been graded at this level by both services with none finer. About a dozen common late-date Merces in PCGS MS67FB ascended mildly with bulk orders in place. Semi-key 1920-D Walking Liberty Halves in NGC MS65 have been Bid up to an even \$6,000 and, in just two weeks, 1934-S Walkers in PCGS MS67 have gained \$1,000. PCGS has graded only eight specimens of the 1936-S issue at the MS67 level and, last week, sight-unseen Bid for these Halves increased to \$6,000, the support level of which will be further tested as one such specimen falls to the gavel in Long Beach. Comparably graded 1945-S Halves in these slabs have gained nearly 130% from a year ago.

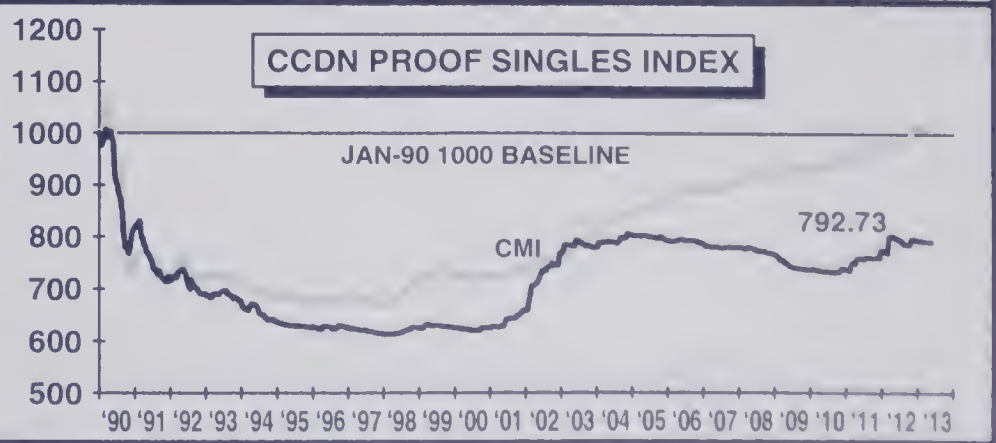

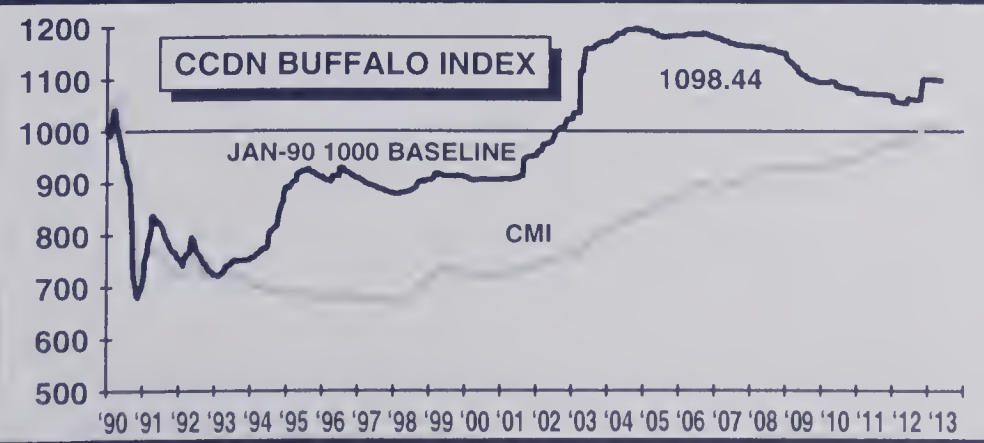

Even though sight-unseen trading within the Silver Commems segment was quite voluminous, current Bid support was lacking for a few issues that sent them sliding significantly lower. Aside from Connecticut Halves in MS66 sinking to a Bid of \$440, 1926-S Oregon Trail and 1936-D San Diego Halves, both in PCGS MS67, each of which was at a previous Bid of \$750, have now been reduced by a respective 15% and 8%, the former issues having dropped on a percentage basis this week by approximately as much as the latter have dropped in one month. Comparably graded Booker T. Washington Type issues, also in PCGS plastic, were discounted as well. Lower wholesale Asking prices and poor auction outings pressured at least three Gold Commem issues lower this week, resulting in a particularly hard fall for Pan-Pac Dollars in MS61 and MS62.

Not all generic Gold Type reacted as negatively as expected to Gold Spot's retreat to back below the \$1,400 per ounce level; however, the dissipation of interest for a variety of generic issues persists while most of the material within this segment is remaining resilient enough to at least hold at current Bid. There actually was greater call this week for Type 1 Gold Dollars and \$2½ Indians in MS61.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of national and internationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid to an Ask. Trades which are near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary from region to region, and may fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows, and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. Listing Policy: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "w" - Lowest asking price during the week prior to publication (week old); "m" - Lowest asking price during the previous three weeks (month old); "t" - Trade during the most recent month; "lm" - Lowest asking price appearing last month; "lt" - Trade appearing last month; "ot" - Trade older than 2 months; " " a blank, for all Market prices older than two months; "a" for auction transactions; "oa" - auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

MORGAN DOLLARS

PCGS DMPL and NGC DPL Bids are for fully Deep Mirror Prooflike coins. Bids for PCGS PL and NGC PL dollars will be listed monthly in a supplemental insert. CDN (Greysheet) Bids have always represented fully deep mirror prooflike specimens.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

* Price guaranteed for three years. Cancel at any time without penalty.

Greatest Gold Mine of Coin Data - Yours FREE!

CAC's POP Report puts all the data you need at your fingertips

Data for each stickered-coin is compiled in CAC's Population Report – an absolute “must have” if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's a convenient way to access a gold mine of CAC coin data, the FREE CAC POP report.

Need to Mail?

Need to contact America's leading numismatic dealers?

Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the **2013 Numismatic Dealer Directory™** are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000+ current names and addresses. And current is a promise taken seriously — the database is updated daily. All for only \$385 — well below the mailing industry standard of \$95/thousand.

Need just one state or region? Need a trial sample?
Pay only 8¢ per address and \$25 set-up.

YES, I want to order mailing labels averaging 5,000+ names and addresses from the 2013 Numismatic Dealer Directory.

I understand that my \$385 fee entitles me to only one usage of these addresses.

☐ My check for \$385 payable to CDN, is enclosed. ☐ Visa/Master Card _____ Exp _____

Superb Morgans On The Rise Small Gold Strengthens

It's steady as she goes in the sight-unseen marketplace, at least with regard to dealer-to-dealer trading through the electronic networks. Transactions totaled over \$500K in the last week—not bad considering all that's coming up the first week of June. This includes the Long Beach Expo running June 6-8 with an auction by Heritage. Before that the Goldbergs will host their Pre-Long Beach sale June 2-4. Bonhams will also have an auction before Long Beach on June 3. All this So Cal action plus Gold is on the rise, climbing back over \$1,400 per ounce to close at \$1,412 despite predictions that it may descend below \$1,300 due to rosier economic forecasts making headlines this week. Silver is showing some strength as well, now higher than it's been since mid May at \$22.67 an ounce.

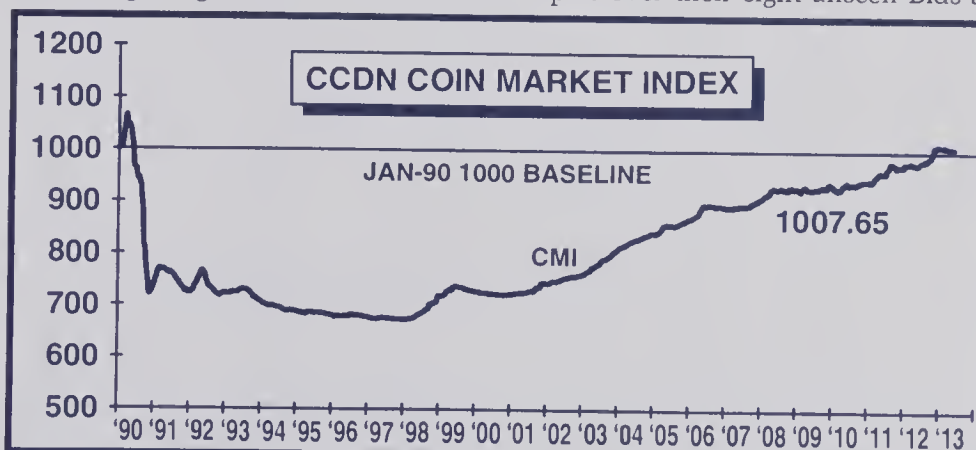

Type 1 Gold Dollars and \$2½ Libs in MS61 through MS63 are continuing to see greater demand, but \$3 Indian Princesses in PCGS MS65 persisted in their descent to below \$10,000. The big convention in Chicago this August will be highlighted by Stack's Bowers' presentation of the Bentley Shores Collection, consisting of what is considered the finest known examples of \$10 Indians ever assembled. Included in this prominent collection is a 1907 Wire Rim with Periods in PCGS MS67, one of only 500 struck, an astoundingly near flawless 1908-S graded NGC MS69, and an exceptionally rare surviving specimen of the historically iconic 1933 Eagle, graded PCGS MS64.

1893 Columbians in NGC MS64 and comparably graded Monroe Halves in PCGS holders were the only Silver Commems to decline this week. Only one issue advanced moderately—the 1952 Washington-Carver PDS Sets in MS61. Gold Commems all remained solidly in place, many of which are still testing current Bids that moved considerably lower only within the past four weeks, marking this month as one of the most trying for this series in recent memory. Bidders are demanding more generic early S-Mint Morgan Dollars in PCGS MS67, offering up an extra \$25 for these issues. These four commoners ('79-S, '80-S, '81-S, '82-S) have a combined PCGS pop of just over 5,550 in MS67. Obviously, original looking, brilliant white Dollars that are within the top end for their assigned grades can often fetch multiples over their sight-unseen Bids at

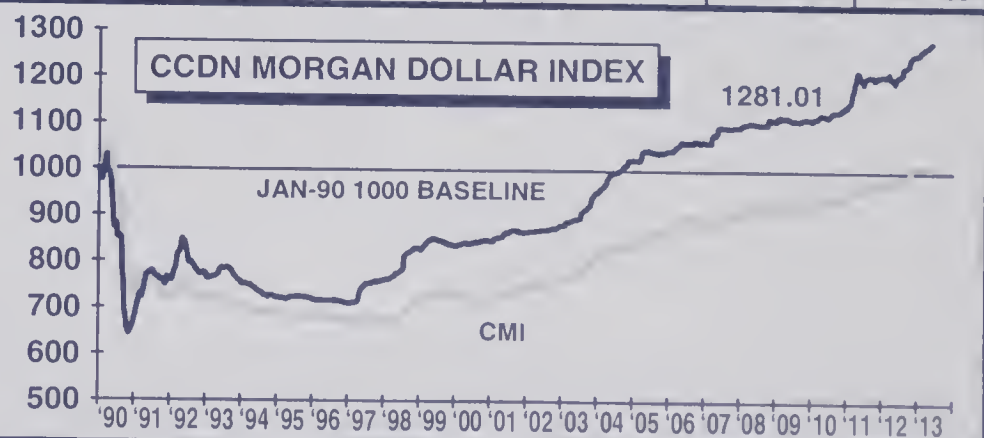

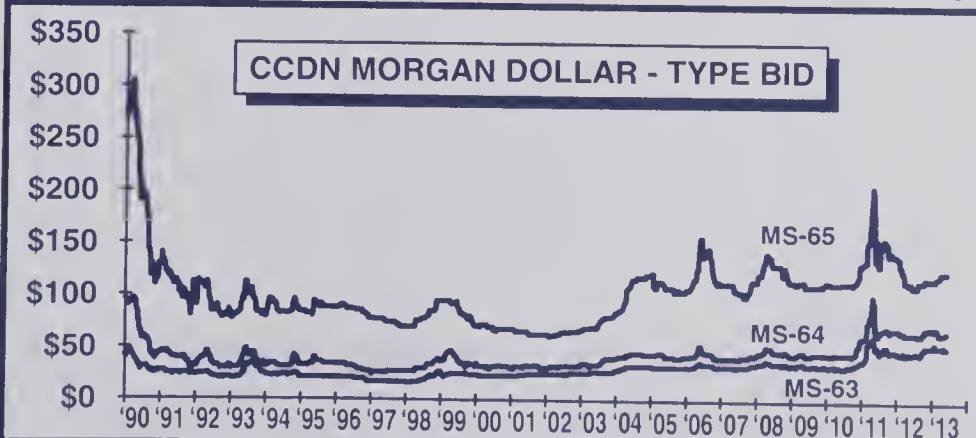

retail public auction, and they don't necessarily have to be a key-date or even rare. Teletrade sold a 1902-O Morgan, graded PCGS MS66+ with CAC approval, for just over \$1,600 this past weekend. A truly rare 1923-D Peace Dollar, graded PCGS MS67, has been piling up the offers from on-line Bidders competing for it through Heritage's Long Beach auction. This is the finest and only Dollar of its kind graded at this level by either service.

One aspect of the Type market that is continuing to experience noticeable strength concerns pre-1858 Proof issues in just about every denomination and variety. These unofficially released specimens have a lure and historic significance all their own in that they were largely produced in highly limited quantities as special presentation pieces for government dignitaries of the day, particularly those who were involved in decisions, either directly or indirectly, affecting our coinage system. Some of these specimens show signs of mild wear, as is the case with an 1831 Original Proof Classic Head Half Cent, graded PCGS PR58, due to finalize its Bidding session in Long Beach next week.

Strong auction reception for early high grade Buffalo Nickels is being demonstrated with respect to three of the top lot Buffs in Mint State featured in the Long Beach auction, all of which are graded PCGS MS66. They are a 1919-D, a CAC approved 1923-S, and a 1924-D specimen, which has a combined pop of just four with none finer. Slight weakness at the auction block caused 1931 Mercury Dimes in PCGS MS65 to arrive a tad short of their current Bid target, as happened to 1943-S Merces in NGC MS66FB. Stack's Bowers will conduct an auction at this year's annual ANA World's Fair of Money Convention in Chicago, offering up a wonderful series of lots comprised of some key-date Walking Liberty Halves in Gem deriving from the collection of George Edward Troll, a decorated WWII war hero and former executive of Sears, Roebuck & Co. This important collection includes specimens of the 1921, 1921-D, and 1921-S, all graded MS65 by PCGS and CAC approved. Several common late-date Walkers in MS66 bounced back up by \$2 to a sight-unseen Bid of \$132 with quantities of either slab acceptable.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity, nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices. The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by a high Bid which is near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

WALKING LIBERTY HALVES

CCDn does not represent that it is possible to purchase selected coins at these Red levels. Current or sight-seen trades can be expected to occur at substantially higher levels in many cases.

UPDATE!

The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

^{^ 450,000}
CAC has evaluated over ~~400,000~~ coins with a market value over ~~\$1.8 billion~~. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over ~~\$275,000,000~~ worth of coins.

^{^ \$300,000,000}
So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

Strong Results For Public Auctions

\$1.6 Million In Sight-Unseen Trades

This week's sight-unseen transactions occurring through the dealer-to-dealer electronic trading networks is very robust, coming in at over \$1.6 million. This is roughly four times as much as usual, with generic Gold Type being the most actively traded market segment. This activity bodes well for dealers in Long Beach attending the Expo and participating in the surrounding auctions. Bohnams wrapped up their June 3 sale in Los Angeles, capturing over \$1.9 million. Ira and Larry Goldberg completed their Pre-Long Beach auction June 5 with a total of \$8 million realized. Making the top lot of \$138K was an 1839 No Drapery Half Dollar graded NGC MS67, a pop 1 example with none finer. We have included several of the many additional highlights herein.

High grade generic Morgan Dollars are hot. Increased demand is targeting the common dates in MS66 and better condition. Lower grade Mint State Morgans are extremely active with numerous trades occurring near current levels, placing this segment firmly on positive ground. New Orleans minted 1882-O Dollars in MS66 are now Bid \$100 higher sight-unseen, common early S-Mint cartwheels in NGC MS67 have spiked up by \$45 since the end of April, and 1885 Dollars in this grade are evidently becoming more appealing to market participants searching for these issues in PCGS holders, which are now Bidding at an even \$1,000. 1879-CC GSA Dollars graded MS65 by NGC now command an extra \$5,000 and, since January, 1890-CC Dollars in their original GSA holders with government issued box and certificate have gained a whopping 44%. This increased interest may be partly related to the recent announcement from PCGS stating that they will now authenticate, grade and encapsulate GSA Dollars in their original holders. This is slightly different than what NGC and ANACS have been doing with their wrap around grade stickers. PCGS is now encapsulating the entire original government slab (existing stickers must be removed) as opposed to cracking the cartwheel out and adding "GSA Hoard" to the label of their standard holders as they have done in the past. Peace Dollars moving to the upside this week include 1923-S issues in PCGS MS66, gaining \$500, and 1924-S Dollars in MS61 are being sought in either plastic, \$10 over previous Bid.

If proof were needed to make a case about how strong this market has been for early Coppers, one need only refer to this week's results of the Pre-Long Beach Auction conducted by the Goldbergs in Los Angeles. Two of the earliest of Large Cents, a 1795 Jefferson Head in PCGS F-15 and an 1803 Draped Bust of the Large Date, Small Fraction variety graded PCGS VF-35, sold for the astonishing sums of \$80,500 and \$115,000, respectively. As for other material pertaining to the Type segment, every Mint State and Proof issue has maintained solid support at current Bid. It's refreshing to note that Silver Commemals all averted downside activity this

week in PCGS and NGC only, as Elgin Halves in NGC MS67 even gained a moderate \$10. More significantly, however, is that one prominent dealer is in search of a number of Texas issues in this grade, offering \$75 over previous sight-unseen Bid for 1934 specimens graded by PCGS but really upping the ante considerably for any 1938 Texas PDS Sets with offers some 25% higher for those slabbed by NGC. Considering the battering Gold Commemals endured all last month this series is at least off to a neutral beginning for June.

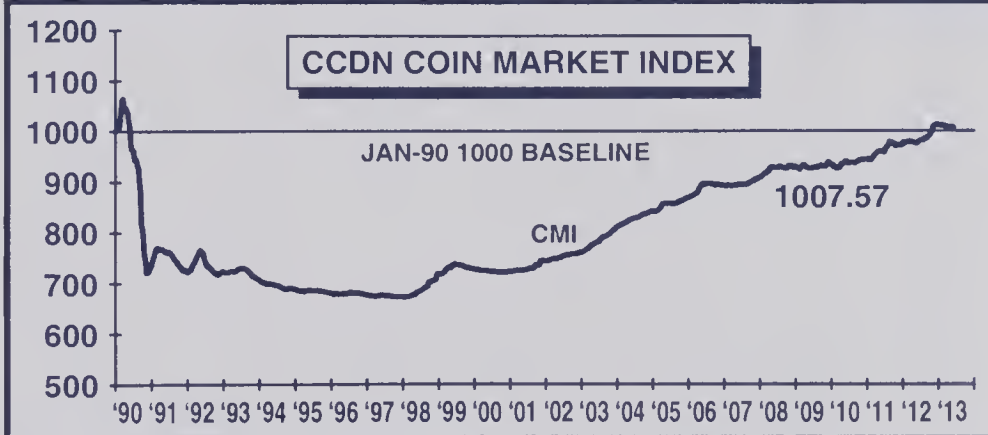

A few very mild Bid adjustments among Buffalo Nickels this week include PCGS graded 1935 and 1936 issues, the former in MS65 and the latter in MS64, while 1938-D Buffs in MS67 graded by either service were elevated to Bid \$115. Over the past four weeks, common-date Mercury Dimes in MS67FB managed to gain an average of 5%, quantities of which have been trading at \$120. Demand for 1942-S Dimes in NGC MS66FB, however, slipped a bit. An increased number of early Mint State Walking Liberty Halves in ANACS and ICG holders are on the rise since last reported. Last week's pursuit of common late-date Walking Liberty Halves in MS66 resumed into this week's activity and included trading that propped up Bids just slightly again for these same Halves in MS64 and MS65. The feverish demand for 1936-S Walkers in PCGS MS67, of which only eight are known, has these issues Bidding higher this year so far by more than 62%.

Recent activity within the Gold Spot market has been more of a drain than a boost to much of the commonly traded Gold Type material. However, Type 3 Gold Dollars in MS61 and MS62, as well as \$5 Indians in MS63, stood apart from the rest in terms of resisting downside pressures. Some over-zealousness at auction with respect to discounting caused certain material to exchange

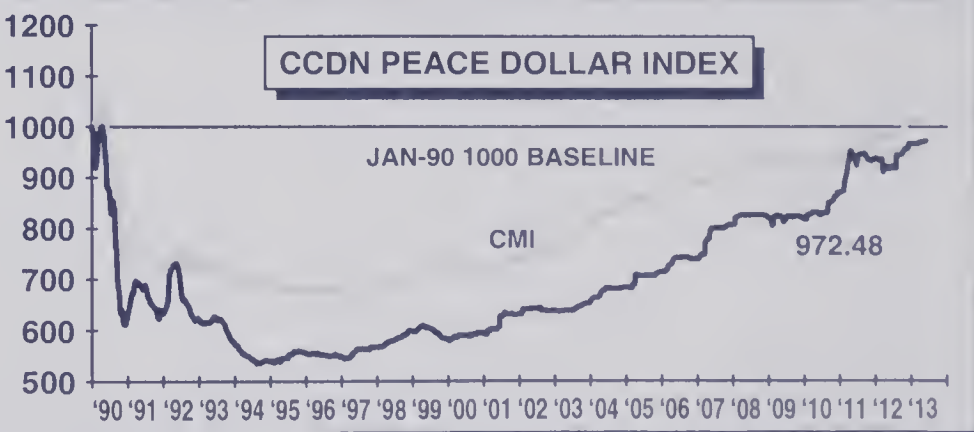

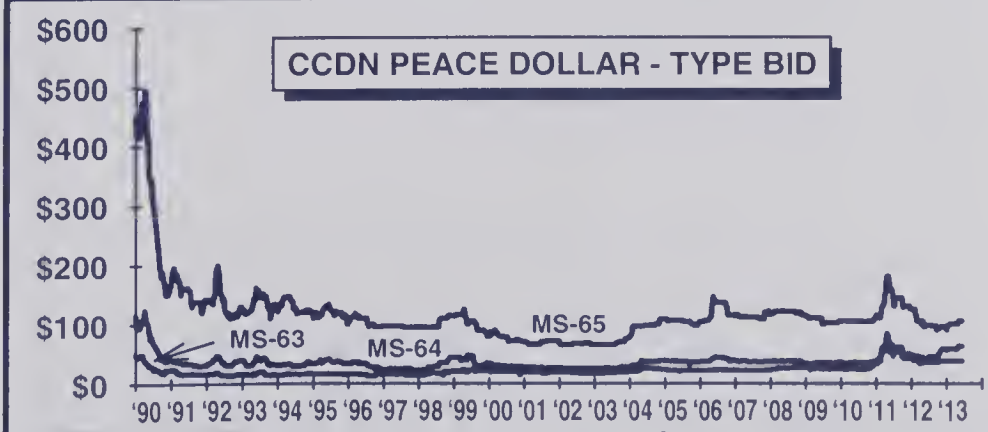

hands for amounts far below sight-unseen Bid, as was the case with some \$2½ Indians in PCGS MS63 and NGC MS64, the latter of which traded below market by as much as \$332. Overall, most issues are maintaining current Bid support, but the sight of another succession of minus signs pervading the columns denoting \$20 Type 3 Libs and \$20 Saints can, perhaps, be a bit daunting.

CAC is now providing two pop reports via their website, one for Green stickers representing coins that are deemed solid for the assigned grade and another for the coveted Gold sticker, suggesting the coin may be under-graded. CAC is offering a free submission of up to ten coins for members of the Liberty Seated Collectors Club through December 31 of this year.

Greatest Gold Mine of Coin Data - Yours FREE!

CAC's POP Report puts all the data you need at your fingertips

Data for each stickered-coin is compiled in CAC's Population Report – an absolute “must have” if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's a convenient way to access a gold mine of CAC coin data, the FREE CAC POP report.

Can You Afford to be out of the Loop?

Information is Power. Join the Future of Electronic Coin Trading.

Introducing CoinPlex - a revolutionary coin trading network exclusively for dealers. Now you can take full advantage of real-time bid and ask values on all coins graded with PCGS+ and NGC+ designations with or without a CAC sticker. In addition, CoinPlex offers an unrestricted bidding platform for generics like Morgans, Saints and Libs.

The CoinPlex network puts a wealth of real-time information at your fingertips. As a member, you can browse the results from all of the major auction firms, review CAC population data, bid on and list coins, and instant message other members. What's more, for a limited time Charter Membership is available at the guaranteed low price of \$100 per month.* You can opt out at any time without penalty.

With all of the benefits membership in the CoinPlex network offers, can you afford to be out of the loop? Join today as we build the best market possible - together.

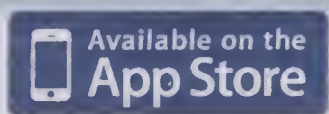

* Price guaranteed for three years. Cancel at any time without penalty.

Need to Mail?

Need to contact America's leading numismatic dealers?

Make your advertising and postage dollars count with America's best dealer listing. The company name and numismatist sections of the **2013 Numismatic Dealer Directory™** are available for rental. Since the Directory is fully copyrighted, this is your only source for this proven list of approximately 5,000+ current names and addresses. And current is a promise taken seriously — the database is updated daily. All for only \$385 — well below the mailing industry standard of \$95/thousand.

Need just one state or region? Need a trial sample?
Pay only 8¢ per address and \$25 set-up.

YES, I want to order mailing labels averaging 5,000+ names and addresses from the 2013 Numismatic Dealer Directory.

I understand that my \$385 fee entitles me to only one usage of these addresses. _____

MERCURY DIMES

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.

Single copy price \$5.00

Baltimore In Sight Blind Trading Strong

Sight-unseen trading is showing continued strength as nearly \$700K worth of transactions took place in the last week over the dealer-to-dealer electronic networks. In addition to the usual trading of generic Gold Type, a couple PCGS plus graded coins changed hands blindly, including a Proof 65+ Trade Dollar for \$9,000 and a Monroe Doctrine in MS65+ for \$1,500. Considering all the action from the last few weeks, including the Bonhams, Goldberg, and Long Beach Heritage auctions, totaling close to \$25 million, it's clear that a good deal of money is available for rare coins, suggesting a very healthy market. Precious metals continue to be quite volatile lately, up one day and down the next. Since the beginning of the year, Gold has lost 18%; Silver has gone down 30%; Platinum has dropped 8%; and Palladium has actually risen by 3%.

Downside activity among Morgan Dollars was far from extreme as a handful of generic cartwheels, mostly in MS63 and MS64, traded moderately lower. Virtually all better-date Morgan Dollars remained resilient, except for 1891 Dollars in NGC MS63 and those flashy looking 1881-O issues in NGC MS64DPL, which perhaps are perceived as too abundant to sustain at current Bid, much less advance. These Dollars, which have a combined pop of 561 with 40 finer, have declined by nearly 40% over the past two and a half years. On the other hand, any 1892-S PL Dollar certainly is a rarity, and offers for them went as high as \$3,000 over previous Bid for those graded MS63PL by PCGS. The situation for 1923 and 1925 Peace Dollars in PCGS MS66 was a bit disconcerting as the enthusiasm for them dissipated to the point of reducing these issues to trade below the \$300 level again.

Flying Eagle Cents in MS61 through MS63 are in short supply, forcing those who want them to dig deeper into their pockets. It's a shame when quality coins such as Proof Three Cent Nickels in Gem and better, as well as Barber Halves in PCGS PR67, slide by at auction for considerably less than what some Bidders are offering, sight-unseen, as happened this week when as much as \$200 was left on the table with respect to the latter issues. Some very low mintage and somewhat underrated Type material will be featured in the Stack's Bowers Baltimore auction. Aside from an exceptional quality 1880 Shield Nickel graded PCGS MS65, this auction includes a pair of not very often seen Liberty Seated Quarters – an 1879 in NGC MS67 and an 1886 specimen, one of only 5,000 struck, graded MS64 by PCGS. Standing Liberty Quarter enthusiasts will appreciate the lovely condition-rarity 1924 example, graded PCGS MS68+ CAC. Although not designated as a Full Head specimen, its centrifugal multi-colored toning and elite state of preservation more than make up for this deficiency. A very

eye-appealing 1846-O Liberty Seated Dollar is also among the highlights, the first branch mint issue of its Type and one of only two graded MS64 by PCGS. There is only one finer known example of this rare early Dollar graded MS65 by NGC.

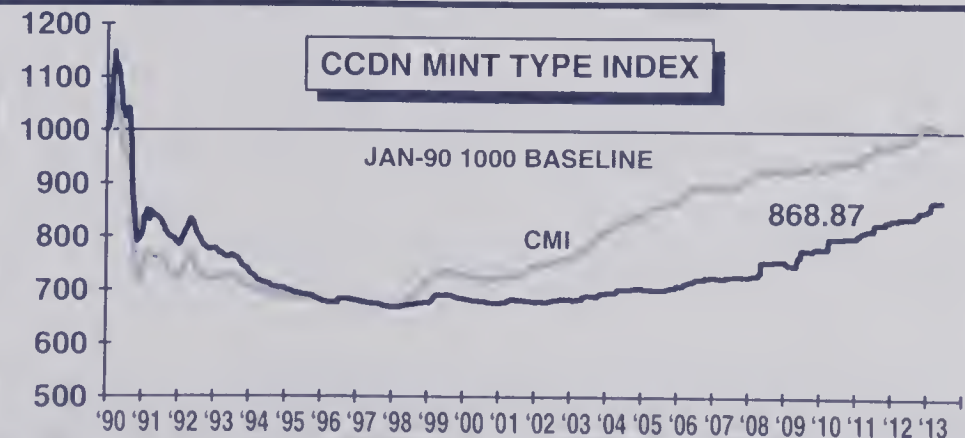

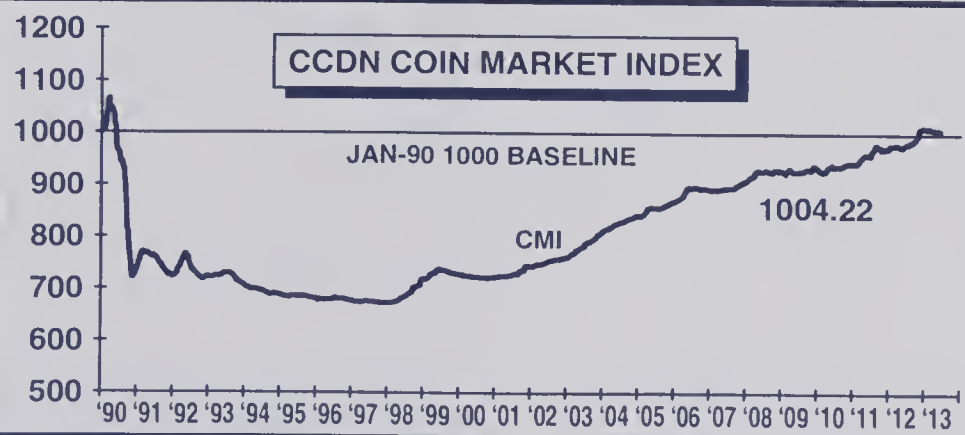

Both Gold and Silver Commems took a real beating during the prolific auction activity that took place on the West Coast this past week, and several important key issues were among those incurring considerable Bid reductions. Lower Silver Commems include Lafayette Dollars in PCGS MS64 and MS65, as those of the latter grade in either slab plunged by at least \$490 while Alabama Halves in PCGS MS66 were forced to roll back by \$140. Grant with Star Halves in PCGS MS64 also were strained, albeit mildly. Other significant declines occurred amongst Pan-Pac Halves in PCGS MS61 and MS62, Rhode Island Type issues in PCGS MS67 taking a bath by as much as 13%, and Sesquicentennial Halves in NGC MS66 falling shy of their Bid target by \$500. Auction participants did not show much mercy in their quest for Gold Commems either, playing hard-ball enough to acquire such issues as 1903 McKinley and 1904 Lewis & Clark Dollars in PCGS MS67 at discounted levels.

There's good turnout so far from on-line Bidders competing for two early-date semi-key Buffalo Nickels offered up by Stack's Bowers in conjunction with its Baltimore event, a 1919-S and a 1921-S, both of which are graded PCGS MS64+ and CAC approved. 1925-D Buffs in NGC MS66 didn't quite make it all the way up to current Bid during this week's auction scene. A quantity trade involving several common wartime issued Mercury Dimes in MS64 resulted in their Bid being lowered by \$1 each. Other than that, the Merces had a relatively uneventful week. It was just a week ago that increased market demand for the handful of 1936-S Walking Liberty Halves in PCGS MS67 raised their sight-unseen Bid by another \$500 and, one of these specimens found a new home to the tune of \$15,275 at the conclusion of Heritage's auction in Long Beach this past weekend. Auction weakness moderately dragged down 1942-D Walkers in PCGS MS67, and 1942-S issues in NGC MS66 are trading \$25 lower.

Not much gainful activity can be expected among generic Gold Type material with Gold Spot unable to advance beyond the \$1,350 to \$1,380 per ounce range, but \$2½ Libs in MS65 and comparably graded \$5 Indians in NGC plastic gave this segment some much needed buoyancy this week as the latter issues regained the \$7,000 Bid level. Coming up June 20-23 is the Baltimore Expo with an auction by Stack's Bowers June 20-21. Among many other collections, the William Porter amassment of Carson City Mint coinage is featured. We have included several of the many auction highlights above.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services determined through careful study of market activity and the latest reported sight unseen Bids, Asks, Trades, prior levels, and auction prices! The CCDN may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades near or below current Bid. CCDN uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly for informational purposes, and fluctuate according to needs. CCDN does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets
Client or sight-seen sales may command a substantial premium above Bluesheet Dealer to Dealer Bids

UPDATE!

The CAC sticker
doesn't add value,
it just helps
to identify
a quality coin.

CAC Stickers Do Not Add Value!

Then why do CAC stickered coins bring a premium?

While it is true that CAC-verified coins bring a premium in the market, the "little green" sticker is not what adds the value. Truth is, with or without a CAC sticker, a quality coin will always bring a premium.

^ 450,000

\$ 2
billion

CAC has evaluated over ~~400,000~~ coins with a market value over \$1.8 billion. Only those coins which meet stringent standards for quality within a grade are awarded a sticker. That is why CAC stickered coins bring a premium - they are placed on only quality coins.

What's more, CAC is a powerful market maker for its stickered coins. In fact, CAC has recently purchased over \$275,000,000 worth of coins.

^ \$300,000,000

So the CAC sticker does not add value - It is just an easy way to identify coins that are solid for the grade. And it gives you confidence in the value of a coin.

CAC[®]

"Because Confidence is Priceless"

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/Ls are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Higher Bids On CAC, + Slabs Tough Go For Gold Type

Moderate weakness prevailed within the Silver Dollar segments, but it affected only the more common issues in MS63 through MS65. A lack of interest for these generic Dollars may be attributed to a shift away from such material in general as collectors have been focusing on less common, scarcer cartwheels that have more potential for maintaining strong demand even in suppressed markets. Truly rare cartwheels continue to elude serious contenders for them as Bids for such issues as the 1890-CC and 1893 in NGC MS66+ have more than doubled this past month. Bids for Gem 1901 Dollars with NGC+ grade increased by 100%. On-line Bidders are already demonstrating fierce competition for a seldom seen 1892-CC Dollar, graded NGC MS65PL, that's available through Stack's Bowers Baltimore event. Also, a beautifully original, untoned 1921-D Morgan Dollar, graded PCGS MS66 with CAC approval, offered by Heritage in conjunction with its auction at the summer FUN Show in Orlando is another hot item having no trouble drawing attention. Common date Peace Dollars in PCGS MS65 settled back down to Bid \$100, trading again on equal footing with their comparably graded NGC peers, while better-date issues in PCGS MS64+ were among this series' best gainers.

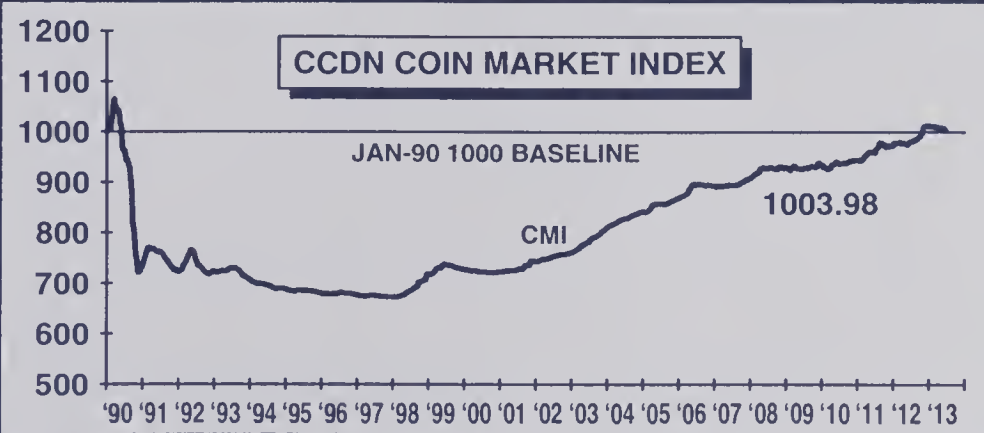

A strong show of current Bid support for all Mint State and most Proof Type material continues as it has been all this month so far and, while Proof Two Cent Pieces in PR64RD through PR66RD are always desirable, Bids for these issues with CAC stickers have been raised by an average of 22% since last reported. Two wonderful Capped Bust Halves graded by PCGS with CAC approval, an 1825 example in MS65+ and an 1826 specimen in MS66, are among the top lots featured by Heritage this year at the summer FUN Show, in addition to an earlier and scarcer 1817/3 issue in PCGS MS64 CAC with eye-catching peripheral rainbow toning.

Buffalo Nickel fans are demanding more of some of the early issues and are offering up significantly higher amounts, especially for those that are NGC+ graded. A serious shortage of 1914 specimens in NGC MS66 caused these Buffs to zoom up this week by 53%. A 1921 Mercury Dime graded MS66FB is now trading sight-unseen for at least \$1,500 more if it is CAC approved, the supply of which amounts to just ten such specimens. One of them, graded by PCGS, is

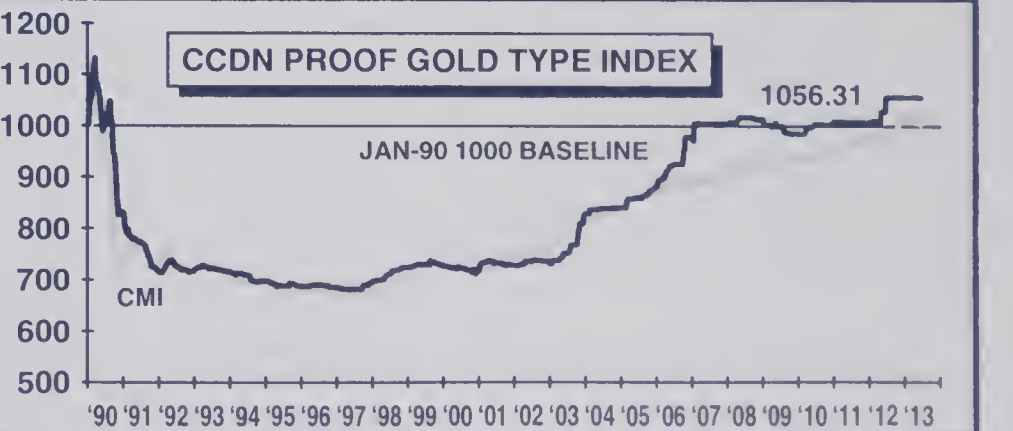

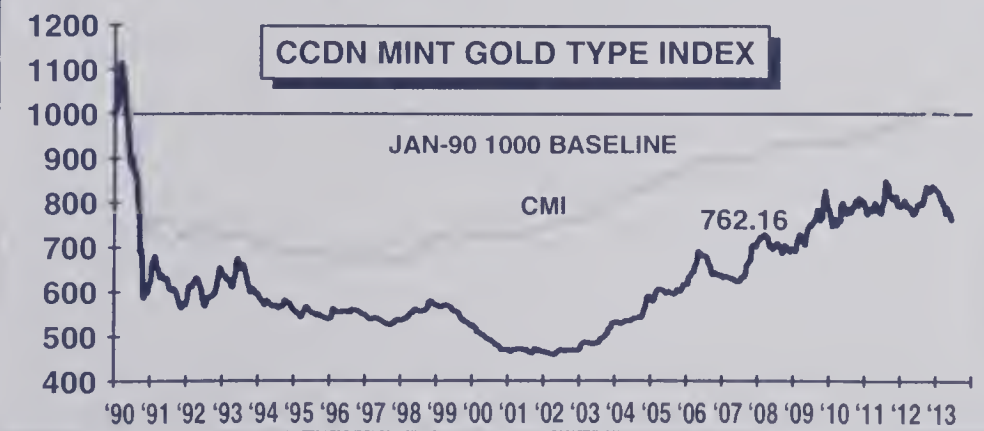

currently up for final Bidding in three weeks at the big Orlando event. Although the overall trading activity concerning Walking Liberty Halves was somewhat subdued, significantly higher offers were also reported to have emerged with respect to key 1921 dated Walkers in MS64 through MS66 with CAC approval. Heritage is offering a 1937 Walker, graded PCGS MS68 CAC, during its Orlando auction. This specimen is tied for finest known with only two other identically graded examples.

Isabella Quarters in PCGS MS65 and MS66 regained \$35 and \$100, respectively, as those of the latter grade did so after plummeting \$500 back in January. However, no other gainful activity emerged within this segment and, for the second straight week, both Grant with Star Halves in PCGS MS64 and Huguenot issues in PCGS MS65 traded lower yet again, the former issues having shed \$120 since the start of this month. A few of the same Gold issues that got beat up last week receded further as well, including 1904 Lewis & Clark Gold Dollars in PCGS MS67 and comparably graded 1916 McKinley Dollars in NGC holders, which are down by 13% this year.

Aside from early variety \$10 Libs in MS61 moving rather moderately to the upside, Bidders appear to have hardly any incentive to jump back into Gold Type, and to an even lesser extent insofar as the most generic of material is concerned, given that the Gold Spot market is still volatile and providing no sign of any near term advancement. Declines continued to be widespread within this segment as they were last week. With Spot Gold down 19% since January, it is not unusual to see the majority of Mint State Gold Type following suit. In fact, 127 of the 238 PCGS/NGC issues we cover each week are lower, with the biggest loser being MS66 \$10 Libs graded by NGC which are 27% lower than their January Bid of \$5,750. Indians of the same denomination are next on the decliner list, with both services falling by 25%. Type 1 and 3 Gold Dollars and common Double Eagles follow – all down by 19% or more. What is a bit of a surprise is how well \$2½ Indians have performed over this same period, increasing by as much as 17% in grades MS61-MS62.

The Certified Coin Dealer newsletter (the Bluesheet) reports current wholesale market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the wholesale levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above Bluesheet Dealer-to-Dealer Bids.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Greatest Gold Mine of Coin Data - Yours *FREE!*

CAC's POP Report puts all the data you need at your fingertips

Data for each stickered-coin is compiled in CAC's Population Report – an absolute “must have” if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's a convenient way to access a gold mine of CAC coin data, the FREE CAC POP report.

MERCURY DIMES

CCDN does not represent that it is possible to purchase selected coins at these Bid levels. Client or sight-seen trades can be expected to occur at substantially higher levels in many cases.
